\$7.50 per year

New Guernsey president Albert Hack, left, is congratulated by PGBA business manager Lee Yost and wife, Martha. Yost is due to be honored at national convention in Ohio.

Calls for 15-cent deduction

Guernsey head boosts promotion

By Donna Tommelleo
Staff Correspondent

LANCASTER — In one of his first duties as new Pennsylvania Guernsey Breeders president, Albert Hack, of Berwick, Columbia County, called for membership support to back a nationwide mandatory 15-cent per hundredweight deduction for promotion of milk sales.

Hack's action came during the 52nd Annual Meeting of PGBA, last Saturday, in Lancaster.

"This should set a pattern to say that dedicated dairy farmers are working in the best interest of promoting our products," said Hack. The new president explained he hopes to get solid support from all breeds.

A second resolution, which

rallied support for the American Guernsey Cattle Club's action to explore the merits of gene migration, narrowly passed by a tight 16 to 14 margin during the annual business meeting.

Pennsylvania members have less than a month before the national convention convenes in Columbus, Ohio, the home of the new AGCC headquarters. Executive Secretary of the AGCC Bernard Heisner was on hand to highlight the club's activities during 1982 — a transitional year.

Heisner explained that some of last year's goals were to process 450 registrations a week and to maintain 50 pages of advertising per Guernsey Journal issue.

"We're meeting those goals regularly," said Heisner, who will step down from the AGCC position on May 1, 1983.

Heisner admitted that 1982 was a difficult year, due to the transition of moving the club from Peterborough, N.H. to Ohio.

"But we were able to get through it and move without borrowing a dime," he reported. Additionally, the AGCC registered a plus in cash flow within the first two months of 1983.

The AGCC secretary called for increased breed involvement and reminded the Pennsylvania membership of the importance of protein testing.

"If you're not now on protein test or paying attention to it, you are soon going to be. Wisconsin breeders on end product pricing

are getting \$.75 to \$1.00 more per hundredweight," he explained.

Heisner offered the group a sneak preview of the line-up in the national heifer sale, which generates revenues that support youth activities.

Several PGBA juniors were honored for their achievements in production as well as in the show ring.

Bedford County youth Brent Snider 15, was lauded for his performance in the Pa. Junior Dairy Show and in the 1983 Farm Show. Snider's entry Sniders Butchs Holly was named grand champion at both shows.

Kevin Schlegel of Boyertown received the Outstanding Boy award. The 15-year-old sophomore at Oley Valley High is the Son of Mr. and Mrs. Richard Schlegel. Kevin is a member of the Eastern Berks 4-H Dairy Club.

Berks County claimed both outstanding individuals, this year. Fifteen-year-old Sherri Zollers, daughter of Mr. and Mrs. William Zollers, is also a member of Easter Berks 4-H dairy Club. This year's Outstanding Girl is a sophomore at Brandywine High School.

The following junior members were honored for milk and fat production: 2-year-old milk, Wendy Kriebel, Benton, 18,467 pounds of milk, 764 of fat; 2-year-old fat, Racquelle Fava, Scenery Hill, 17,382 pounds of milk, 768 of fat; 3-year-old milk and fat, Scott Kriebel, Benton, 17,672 of milk, 773 of fat; 4-year-old, Renee Anne

PFA cites 2-phase milk reform

WASHINGTON, D.C. — The Pennsylvania Farmers' Association has called for two-phased reform of the federal milk support program in order to bring supply in line with demand, and to maintain that balance.

Keith W. Eckel, president of PFA, made the proposal Thursday before members of the Pennsylvania congressional delegation and some 200 farmers at a breakfast here at the Capitol Holiday Inn.

Phase One of the dual-faceted program calls for a \$2.00 per hundredweight reduction in the milk support price for those producers who exceed their 1981-82 production average.

And for those producers who reduce their production by 10 percent, there would be a \$2.00 increase in the milk support price.

This phase would remain in effect until the net CCC purchases of surplus milk would be reduced to 3.5 to 4 billion pounds annually.

Adjustments in the milk price supports would be made quarterly.

Under Phase Two, parity milk support price levels would be placed on a sliding scale based on the net surplus purchases by the CCC.

The scale would range from 60 percent of parity if CCC purchases are over the 11½-billion-pound level to 80 percent of parity if CCC

purchases drop below the two-billion-pound level.

Adjustments in this phase would be made annually. PFA met with Pennsylvania congressmen to push for the two-phased dairy reform program and to discuss other farm issues. PFA is affiliated with the American Farm Bureau Federation and has 54 county units throughout the Commonwealth.

"The (dairy) program as it now stands does not work," Eckel told the congressmen. "It has created the present situation of surplus product, which continually increases the milk stockpiles purchased and held by the Commodity Credit Corporation (CCC)."

Under the proposal put forth by the Administration and passed by the Congress the government would "penalize" farmers 50 cents a hundredweight of milk if they failed to reduce production. Eckel said the proposal is "doomed to failure."

"Farmers who reduce production stand to lose more than

Trish Williams joins staff as new dairy writer

LANCASTER — Trish Williams, of Hockessin, Del. joined Lancaster Farming this week as a staff writer, specializing in the coverage of dairy news and events.

Also joining the staff is Robin Phillips, of Rt. 1, Mohrsville, as Berks County correspondent.

Ms. Williams has a strong farm and dairy background, growing up and working most of her life on her family's dairy farm located in northern Delaware.

"My roots are in farming," she explained, "and the principles of the agrarian way of life are deeply ingrained in me and have guided my education and career growth."

Ms. Williams has completed the course work for a master's degree in Extension Education at Penn State. She is presently finishing up research on agricultural direct marketing to complete the requirements for her M.Ed.. Her course work at Penn State stressed agricultural media and communications.

A graduate of the University of Delaware, she received a B.S. in

Trish Williams

1980 with a double major in animal science and agricultural business management. Active in extracurricular activities, she was a member of University of Delaware's Collegiate Dairy Products Evaluation Team, competing in the 1976 in-

It's a St. Patty's tobacco seedbed celebration

BY DICK ANGLESTEIN

LANCASTER — With quotas soundly turned down in Pennsylvania and Maryland, Lancaster County tobacco growers can proceed with their traditional celebration of St. Patty's Day this coming week by putting in their seedbeds.

In Lancaster County, 733 growers voted against quotas in last week's referendum and 153 voted in favor. Across the state's seven tobacco growing counties, including Lancaster, the overall vote was 788 against quotas and 167 in favor.

In Maryland, the equally lopsided rejection of quotas showed 1,935 votes against and 145 in favor.

A two-thirds vote in favor would have been needed in either state for the quotas to pass.

And, excessive deposits of mud, dirt, silt, manure or other debris can not be left on the roads.

Violation can carry a fine or imprisonment.

Paradise also now has a 24-hour hotline number for the reporting of any acts of senseless violence. It's 1-800-367-1010.

Interest was higher in the Lancaster County referendum this year due to the surplus of Pennsylvania tobacco. Approximately 200 more growers voted this year than did three years ago and the percentage of "yes" votes was higher.

Local growers also had a stake in the Maryland voting due to the increased interest in growing smoking tobacco leaf in Lancaster County. All of the smoking tobacco leaf has been sold this year; while quite a few farmers are still holding one or even two years of Pennsylvania tobacco in their sheds.

The turndown of the quotas in both Pennsylvania and Maryland means that Lancaster County growers are free to grow the

Two Ways To Improve Your Profit Picture XL & DK

Two layers with distinctly different characteristics... From two separate research programs.

You don't have to buy from two different companies to get the two top layers on the market.

The XL shows excellent production under many management conditions. The DK responds best to finely tuned, close management.

DEKALB Layers are bred to possess the economic traits most applicable to your operation. You do have a choice... The high productivity XL or the high efficiency DK.

If you're a feeder pig producer, you want to get top performance out of your operation.

Producing feeder pigs takes good management, and the ability to make the most of every part of your operation. You've got to use your breeding stock and buildings to their maximum potential. A big part of getting maximum output is the right nutrition program. It can make the difference in maintaining sows in good condition and producing large, healthy feeder pigs that are able to withstand the stress of being moved from your operation to another location for finishing.

You want to maximize your sows reproductive potential and produce large, healthy litters.

Pennfield has specially formulated two sow feeds that do just that. Our **642 Sow Prep** is a complete feed formulated to nourish the sow during gestation. This feed provides all the energy and protein required for building large healthier litters.

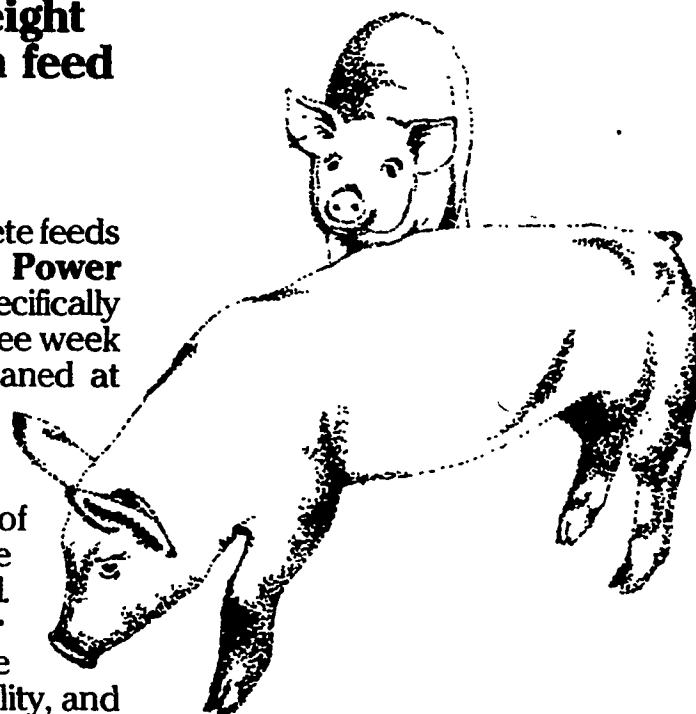

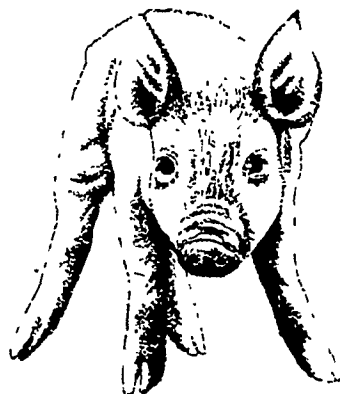

We developed **648 Sow Power** to provide sows with a unique blend of energy, amino acids, and other nutrients needed for optimum milk production. This results in maximum 21-day baby pig weights. Heavier pigs mean healthier pigs after weaning. This new improved feed enables the sows to finish the lactation period in good condition for the beginning of the next breeding cycle.

You want faster weight gains and optimum feed efficiency for your feeder pigs

Pennfield offers two complete feeds for this purpose. **603 Pig Power** was developed specifically for successful three week weaning. Pigs weaned at three weeks need special care and nutrition to minimize the stress of going from a whole milk diet to dry feed. **603 Pig Power**

was developed to provide better digestibility, palatability, and nutrition. The results are excellent gains, super feed conversion, and more uniform pigs. This feed will keep weaned pigs growing when rapid gains are the most important.

616 Pork Power I is an excellent high density feed, formulated with supplementary lysine to give optimum balance of essential amino acids. It also has added fat to assure good weight gain and feed efficiency.

If you're a
feeder pig producer,
you want Pennfield's
specially formulated
hog feeds.

Omaha Cattle

Thursday, March 10

Report supplied by USDA

Slaughter Steers and Heifers ended the week 20-50 higher. Cows 2.00-3.00 higher. Bulls steady.

What little zest noted in fed cattle trading mainly attributed to continuing short live inventories in packer hands. Trading generally a forced business with most buying being done to satisfy immediate slaughter needs. An early week upturn in the dressed beef trade vanished at mid-session and a bearish tone prevailed at the close of fed cattle trading. Mud continued to present problems in the trade although dressing percentages showed some improvement. Cows moved sharply higher as country movement decreased and dressed prices climbed 3.00-6.00.

Steers comprised 45 pct. of the week's receipts; Heifers 34 pct.; Cows 10 pct.; Feeders 10 pct. Four day receipts 7651; Week ago 9379; Year ago 10035.

STEERS AT THE CLOSE: Two loads Choice, few Prime 2-4 1200-1250 lbs. 65.25-65.50. Choice 2-4 1050-1250 lb. 63.00-64.50, several loads 64.75-65.00. Muddy cattle to 62.00. Mixed Good and Choice 2-3 1000-1250 lb. 61.50-63.25. Few Good 59.00-62.00. Mixed Good and Choice 2-3 1150-1300 lb. Holsteins 53.00-55.00.

HEIFERS: Several loads Choice 2-3, few 4's 975-1050 lbs. 62.75-63.00. Choice 2-4 925-1100 lbs. 61.50-62.50. Muddy Cattle to 60.25. Mixed Good and choice 2-3 925-1100 lbs. 60.00-61.50. Few Good 56.00-60.00.

Average of LS 214 detailed quotations for 900-1100 lb. Choice

Steers 63.00, 1100-1300 lb. 63.82. Average cost Steers 63.21, average weight 1147 lbs.; as compared 62.64 and 1147 lbs. a week ago. Average cost Heifers 60.85, average weight 998 lbs; as compared 60.31 and 1003 lbs. a week ago.

COWS: High Cutter, Utility and Commercial 1-3 41.50-44.00, few to 45.00. Canner and Cutter 38.00-41.50.

Livestock market and auction news

THE OLD FARMER'S ALMANAC

MARCH 14-20, 1983
Snow up north, not a time to sally forth.

Turn mattresses now. Spring begins March 20 (Sun) at 11:39 p.m. EST. New moon March 14 (Mon). Average length of days for the week, 12 hours (days and nights are about equal this week, with days getting longer). Robert Goddard launched first liquid-fueled rocket March 16, 1926. Men and pyramids are not made to stand on their heads.

Ask the Old Farmer: I have glassware that has a scum caused by too much dishwasher detergent I have tried everything I can think of to remove it, but nothing seems to work. G.J., Lima, Ohio.

Try adding two tablespoons of vinegar to eight ounces of water in an old spray bottle. Spray and wipe the glassware. If the scum is caused by the dishwasher, try this: put two cups of vinegar in a ceramic bowl and set it in the lower dish rack of the empty dishwasher. Leave the upper trays in. Run the washer through a complete operation without any detergent.

Home Hints: To get bubblegum out of clothing, put garment in the freezer overnight, then hit it with a hammer.

OLD FARMER'S WEATHER FORECAST
New England: Week is cold, with snow north; weekend brings snow-storm, rain on coast.
Greater New York-New Jersey: Cloudy at very start, then sunny, with cold wave; rain mixed with snow, cold, for weekend.
Middle Atlantic Coastal: Week begins cloudy and cold; midweek, partial clearing, more cold; rain east, snow west at week's end.
Piedmont & Southeast Coastal: First of week, cloudy then clearing; remainder of week brings rain east, snow west.

Slaughter supply mainly Choice and Choice and Prime Slaughter Steers with a well above average supply of Holstein Steers; around 35% Heifers and 10% Cows.

SLAUGHTER STEERS: Mixed Choice and Prime 2-4 1050-1250 lbs. 62.00-62.50 early, not tested late. Choice 2-4 900-1250 lbs. 60.50-64.00, closing 62.00-64.00, mostly 62.00-63.50. Mixed Good and Choice 2-4 900-1200 lbs. 59.00-62.00. Good 2-3 900-1500 lbs. 57.50-61.00. Standard to Good 2-3 1000-1350 lb. Holsteins 48.00-55.00. Couple lots Mixed Good and Choice 2-3 around 1300 lbs. 55.25 and 55.75.

SLAUGHTER HEIFERS: Mixed Choice and Prime 2-4 875-1085 lbs. 60.50-63.00, closing 62.00-63.00. Choice 2-4 800-1050 lbs. 59.00-62.00, closing 61.00-62.00. Mixed Good and Choice 2-3 800-1000 lbs. 57.00-61.00. Good 2-3 750-975 lbs. 55.00-59.00.

COWS: (Closing Week Sales) Utility and Commercial 2-4 40.00-43.00. Boning Utility 1-2 43.00-45.00, several 43.00-44.00. High yielding Utility 45.00-46.00, few 47.00. Cutter 1-2 39.00-42.00. Canner and Low Cutter 1-2 35.00-39.00.

BULLS: YG 1-2 1050-2200 lbs. 46.00-54.00, closing 48.00-54.00. Wednesday's weekly sheep auction. Receipts about 325 head. Compared last Wednesday, Slaughter lambs 3.00-4.00 higher. Not enough other classes to test

price trends. Supply mainly Woolled and Shorn Slaughter Lambs.

SHORN SLAUGHTER LAMBS: Choice and Prime 97-125 lbs. freshly shorn to No. 2 pelts 61.00-65.00, mostly 62.00-64.00 to Choice 98 lbs. 58.00.

WOOLED SLAUGHTER LAMBS: Choice and Prime 95-125 lbs. 59.00-61.00. Few Lots Choice 80-105 lbs. 55.00-58.00.

SLAUGHTER EWES: Few individual head Good 15.00-16.50. Few bucks 10.00-11.00.

FEEDER LAMBS: Few small lots Good 60-85 lbs. 55.00-58.00.

FEEDERS: (including around 1,500 at the regular Thursday auction.) Feeder Steers and Heifers somewhat uneven, both classes generally steady. Overall quality not as attractive as last week. Supply mainly Medium Frame 1 400-700 lb. Steers and Heifers. Attendance fairly large.

FEEDER STEERS: Medium frame 1: lot 347 lbs. 79.75; 400-500 lbs. 71.50-76.00; 500-600 lbs. 68.50-73.50, mostly 70.00-72.00; 600-700 lbs. 65.00-68.50; few 725-825 lbs. 61.00-64.25; lot fleshy 860 lbs. 59.00. Medium Frame 1-2 and some small frame 1: 400-650 lbs. 62.25-68.50, mostly 64.50-67.00. Large Frame 2 Holsteins: scattered lots 650-950 lbs. 51.00-53.75.

FEEDER HEIFERS: Medium Frame 1: 375-700 lbs. 58.00-60.75; lot thin 630 lbs. 62.50. Medium Frame 1-2 and small frame 1 300-625 lbs. 55.50-57.75.

COWS AND CALF PAIRS: Few small and medium frame 1-2 mostly middle-aged 750-900 lb. cows with calves at side 497.50-532.50 per pair.

SPECIAL NOTICE
GOAT & LAMB SALE
12 NOON
MARCH 23 - MARCH 30
- APRIL 6

Due to the many goats and lambs we have been receiving for the
Easter trade, we will change our sale schedule a little for the two
weeks prior to Easter Sunday and the Wednesday after Easter.
The dates would be March 23, March 30, and April 6, starting the
sale promptly at 12 NOON, selling lambs and goats first, followed
by our regular sale order. Last year we averaged from 300 to 700
head lambs per week for these 3 weeks and about 100 goats.

After all, it's vo-ag

BY DICK ANGLESTEIN

It's FFA banquet season -- the time that's easy on the food budget but hard on the waistline.

But on a more serious note, these awards banquets provide an opportunity for each chapter to display its accomplishments and the activities of outstanding members before parents, friends, school officials and the community.

In relatively close contact with the FFA scene for the past three years or so, I'd like to make three observations gleaned from the banquets and other events.

First, for the Pennsylvania FFA to continue to function effectively and particularly in national competition when it gets to Kansas City each year, continued assistance and coordination is needed from the Department of Education in Harrisburg. Pennsylvania had some good candidates for both national office and national proficiency awards this past November, but was shut out. When competing with the more readily recognized ag states in such things as national competition, our Commonwealth youths need all the help they can get from Harrisburg.

Second, is it time to take a look at an updating of Supervised Occupational Experience (SOE) projects? How about at least a pilot SOE program in several different areas involving FFA interns.

As their SOE, a few students could intern in such areas as ag communications, banking or legislation. Each would spend a specified number of hours with an ag publication, banker or legislator. These agribusiness cooperators could help set up a supplementary study plan for the students to follow.

These special SOE's should not replace the more traditional projects, but supplement them. We still need and will always need the more traditional ag production projects. But more and more these days, the future of agriculture is being shaped off the farm in such areas as communications, finances and legislation. Participation to begin could be limited to students who show a particular interest in these areas.

Suggesting these new SOE's is not meant as a criticism of the existing program. The SOE visit to this area from the National FFA headquarters last year shows that Pennsylvania's program is held up as a model. But let's look to keep it in the lead.

And third, while ever moving into the future, FFA must not lose sight of its basic roots. Its theme this year has been "Educating through Experience."

It disillusioned me a bit when I read the biographies of the national officers and find all are in the midst of their college careers. How long has it been since a non-college FFA'er held high office?

I hope in the selection process for these coveted offices that equal weight is given to the qualifications and attributes of each youth -- no matter if they're polished in academic circles or honed just as well in the world of experience back on the farm or in agribusiness.

After all, it is still VO-AG.

NOW IS THE TIME

By Jay Irwin

Lancaster County Agriculture Agent
Phone 717-394-6851

To Check Pastures

The snow melted and gently soaked into the soil and with temperatures rising, our thoughts quicken to early spring pastures. We need to be concerned with pastures and exercise lots along rural roads for discarded junk. Unfortunately, people still throw bags of waste from their cars into nearby fields. Some of the material may be poisonous to livestock. Every producer should remove these materials before starting to graze. Also, in hay fields this material should be removed before there is much growth of the forage. Bottles and tin cans will damage equipment and be a threat to the livestock eating the hay. Be sure your animals are not poisoned through someone's carelessness.

To Be Aware of Rural Crime

Crime in the rural area is climbing rapidly. Thieves are drawn to rural communities because of the attitude that crime is a city problem, so it's safe to leave your door unlocked. As long as this notion persists, rural areas

will remain a thieves' paradise. You can make it less so by forcing a burglar to work harder. Install dead bolt locks on all exterior doors and windows. Keep in mind they only work if you use them.

Get to know your neighbors; they can be a great crime deterrent. Agree to watch their place while they are away and they'll gladly do the same for you. It's important to identify your property. Police won't return items unless they're positively identified. Private gas pumps and storage tanks are popular targets for thieves. Be sure to lock these up whenever you're not around. Exterior lights around your home, garage and barn will also do a lot to ward off burglars.

To Treat Farm Pond Weeds Early

Pond owners who experience weed problems last summer will undoubtedly have similar or worse problems this year. Aquatic vegetation will have a tendency to increase where no control measures were taken the year before. These weed problems

unfortunately multiply, according to Arnold G. Lueck, County Agent and Agronomist.

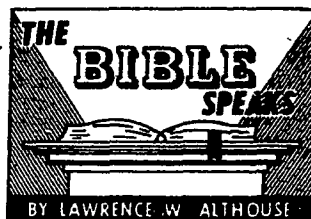

Early in the growing season is the better approach to gaining control of pond weeds. Aquatic plants are more susceptible to control by chemical herbicides when the plants begin growing and grow rapidly; if mechanical controls are to be used, there will be less bulk in plant materials to contend with; control of the unwanted plants before flowering and seed setting occurs has benefits; early treatment means less interference with fishing, boating, swimming or whatever other pond activities are involved.

Always follow label directions carefully where chemical controls are used.

To Prune Fruit Trees

Whether you have a few or several hundred fruit trees, orchard pruning need not be delayed until spring. It may be started in colder weather. But it is a good practice to work on the hardest trees first.

(Turn to Page A12)

WHAT DOES THIS MEAN?

March 13, 1983

Background Scripture: Numbers 11:24-29; Joel 2:28-32; Acts 2:1-42.
Devotional Reading: Ephesians 1:3-10.

For the multitude of "devout men from every nation" who experienced the Day of Pentecost in Jerusalem, there was amazement, perplexity and an overwhelming need to ask: "What does this mean?"

There are still large numbers of people who are perplexed about the meaning of Pentecost. Like most of the events in the Bible -- as well as in our lives -- there are many layers of meaning. Let me suggest some answers to that question: "What does this mean?"

The Promise Fulfilled

1. God Fulfills Christ's Promise. Although the weeks between the first Easter and the Day of Pentecost may have seemed a long time to the disciples, it was not all that long that they had to wait until Jesus' promise that "you shall receive power."

2. The Power Belongs to God. Secondly, Pentecost made it very clear that the fulfillment of Christ's command to be his witnesses would depend, not upon the resources of his followers, but upon their willingness to accept the power God would give them.

3. Inspired, Not Drunk. Although much of being a Christian is living

out his teachings in our everyday lives, there are times when he lifts us out of our normal state of consciousness into something mysterious, ecstatic or inspired. Sometimes we need to be stirred up in some way by God's powerful presence and Pentecost was one of those times.

The Mission Given

4. A Festival Transformed. The traditional observance of Pentecost in the Jewish religion celebrates the giving of the law by God to the people of Israel through Moses. One of the meanings of the New Testament is that, just as Jesus' death and resurrection transformed the Jewish Passover, so Pentecost was transformed to commemorate the giving of something even more important than the law: the Holy Spirit.

5. A Call to Commitment. Having heard Peter's sermon and witnessed the wonderful things that were happening on that day, the people at Pentecost asked, "Brethren, what shall we do?" And Peter had an answer ready for them: "Repent, and be baptized...and you shall receive the gift of the Holy Spirit."

6. The Plan of Outreach. As people from all parts of the Mediterranean heard the good news that day in their own tongues, there was an indication of the path of growth which the gospel would be following: Jerusalem, Judea, Samaria, and the world!

7. More Signs and Wonders. The wonderful things performed by Jesus would continue to be performed by his disciples through the power of God's own Spirit. "And many signs and wonders were done through the apostles" (Acts 2:43).

Pentecost is ever a story that is "to be continued."

OUR READERS WRITE, AND OTHER OPINIONS

Watch additives

Your recent article, "Additives - Then and Now" is a very misleading and possibly harmful bit of information.

While some of the world's population can tolerate the chemicals added to our food supply, an alarmingly growing number cannot. Dr. Benjamin T. Feingold's work with hyperactive/learning disabled children through nutrition therapy (the removal of preservatives such as BHA, BHT & TBHQ, additives and artificial coloring & flavoring from food supply), has proved to hundreds of thousands of families just how adversely chemical additives affect their children and themselves. Yes, even some natural "chemicals" that occur in food can be troublesome to some.

Every person is chemically sensitive to one thing or another.

With the rapidly expanding demand for foods processed without chemical additives, farmers' would be wise to stay tuned. In our area, there are several pure food co-op's, and more starting everyday. We purchase entire

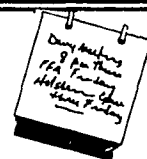

lines of food grown & processed without preservatives and additives. Our children cannot tolerate the dangerous chemicals the government has allowed in our food supply. And the parents do not want to spend their money on "chemicals" - we want the REAL thing! We're always looking for local farmers who will supply us with "clean" foods (grains, vegetables, chicken, beef, etc.) & we'll pay the price for organic food!

The GRAS list is severely under attack by many concerned groups. The FDA has many so-called "safe" additives on their list to be investigated. And it seems more & more often you read of private research groups making recommending the FDA to take a chemical additive off their GRAS list because of the harmful effect it causes in humans.

Please - for the sake of mankind - offer us real - clean - chemically free food again. Great grandmother had it good!

OTIS

END-OF-MODEL REBATES UP TO \$5,500 ON 40- to 228-HP JOHN DEERE TRACTORS

The signals are improving the farm economy is turning up for the 1980s. Reading those signals, consider this money-saving fact: You can now get a new John Deere 40 Series tractor at a model closeout price that will never be as low again. A price that competes with offers on tractors of any make. A bargain price on a tractor that will return you top dollar when traded in.

So, even if you're going into the PIK program to the maximum, you'll be dollar-wise to take advantage of this closeout offer on 40 Series tractors. Because you'll never again be able to match these savings.

John Deere's offering you a maximum cash rebate up to \$5,500* (see chart below) on top of our best deal on a 40 Series tractor. And we're discounting from list prices that date back to 1981! Or you can qualify for a cash rebate waiver of John Deere finance charges to November 1, 1983.* See us for details.

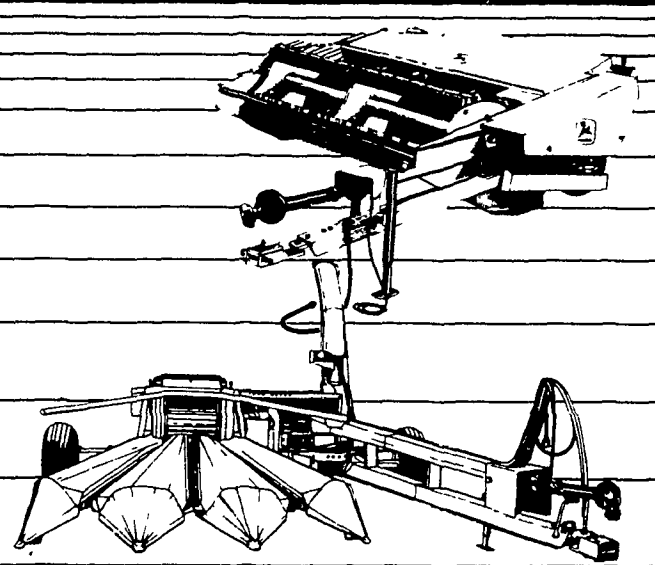

Special cash rebates up to \$8,200 on 50 Series 4WD tractors, too... with the added attraction of waiver of finance charges to June 1, 1983.*

Model	Cash Rebate on Purchase	March '83 Cash Rebate in Lieu of Waiver	Maximum Rebate

(Offer subject to tractor availability)

*Maximum rebates on 40 Series tractors include a bonus for cash purchase for financing with John Deere without waiver or financing where you choose. Availability of John Deere financing subject to approval of credit. These offers may be reduced or withdrawn at any time.

New: John Deere extends hay/forage Pick-A-Team rebates up to \$1,600 through April, 1984

Purchase the new hay or forage tool you need for 1983 now and you qualify for an immediate John Deere money bonus in the amount indicated below for your first purchase. On top of that, you'll get a certificate from John Deere that qualifies you for the total Pick-A-Team Bonus shown below when you take delivery on a specified companion John Deere hay or forage tool ordered by April 30, 1984. (One of your purchases, to qualify for the Double Bonus on both, must be a new John Deere mower/conditioner.)

There's more: finance one or both of your team with John Deere now, before the 1983 offer is discontinued, and finance charges will be waived until the 1983 season of use in this area.*

See us for details on this offer, and get our good deal on a John Deere hay or forage tool that will lower your costs even more!

First Machine Purchase of:	Qualifies for 1983 John Deere Money Bonus of:	Second Machine Purchase by April 30, 1984	Qualifies for Total Pick-A-Team Bonus of:
Mower/Conditioner	\$400	Square or Round Baler	\$1,400
Mower/Conditioner	\$400	3940/3960 Forage Harvester	\$1,600
Square or Round Baler	\$300	Mower/Conditioner	\$1,400
3940/3960 Forage Harvester	\$400	Mower/Conditioner	\$1,600

*Availability of John Deere financing plans subject to approval of credit. These offers may be reduced in value or withdrawn at any time.

Quick Change

Variable-speed drive on 200 Series lets you change speeds fast without shifting gears

John Deere 200 Series Tractors (10, 12, 14 and 16 hp) have a 4-speed transaxle and variable-speed drive that lets you change travel speed within any gear just by moving a lever. There's no clutching or shifting. No power loss to PTO-driven attachments.

These tractors are built to be tough and comfortable. A one-piece welded steel frame and cast-iron front axle provide rigid support. Big one-inch-diameter spindles and an enclosed, lubricated steering gear mean durability.

For your comfort and peace of mind, cushioned

high-back seat, color-coded controls and built-in headlights are standard. Triple-safe starting and safety interlock switch on the seat provide added protection.

The 200 Series also gives you a choice of lift systems. Seven-position mechanical lift is standard, electric and hydraulic lift is standard, electric and hydraulic lift optional.

Available attachments include: 38- or 46-inch mower, 42-inch front blade, 22- to 38-inch tiller and 38-inch snow thrower.

See us today for a 200 Series Tractor

PFA milk reform

(Continued from Page A1)

those who continue to produce at the same level," the farm spokesman said. "As a matter of fact some farmers will actually increase production to compensate for the lost income."

The farm leader said any solution to the dairy program problems must address the surplus problem and make certain that the present situation does not duplicate itself down the road.

"Phase one would be a temporary program," Eckel said, "bringing supply and demand into balance by rewarding farmers who reduce production and penalizing farmers who increase production. That makes sense to us. Why should we assess a dairyman who is doing his part to bring supply in line with demand?"

"Phase two, in our proposal, would maintain the balance between supply and demand by in-

dexing the support price to the purchases of the Commodity Credit Corporation. It would assure consumers of an adequate supply of dairy products, a major purpose of the program, and would require farmers to keep production in line with demands," the farm leader said.

Earlier Eckel told the congressman that the nation's economy was going through a "structural change" which accounts for a lot of the economic stress and unemployment. "We're moving into a new industrial age that depends more heavily on electronics than on a big steel industry," he said. "It calls for less labor . . . more electronics . . . more robots and the like."

He pointed out that "the reason for unemployment and displacement of people in industry like steel is not a depression . . . it's change. We should look for ways in which states like Pennsylvania can

adapt to these changes."

The Lackawanna dairyman said that everyone should be alarmed about the high unemployment rate in Pennsylvania, but not to "over react to slow our movement into this new industrial - electronic age."

On other matters the farm leader stated that the Reagan Administration's proposed federal budget is unacceptable to farmers in Pennsylvania. "A federal deficit of nearly \$200 billion caused by runaway federal spending is not easier to accept under this administration than it has been under the so-called big spenders of the past."

He suggested that congress

freeze all federal entitlement expenditures including farm programs at current levels for three years until basic deficiencies in laws can be corrected to allow for a balanced budget.

Eckel asked the Pennsylvania congressmen to support an independent study on the effects the Surface Transportation Act of 1982 is having on the Trucking industry, and take immediate action to correct any inequities.

He also called for the establishment of a statutory trust to protect growers of perishable commodities; and for the passage of legislation to protect farmers' interests in grain elevator bankruptcies.

Now is the Time

(Continued from Page A10)

Early pruning can involve some problems from winter injury, but in many cases an early start will be necessary to complete pruning of large orchards before spring. By confining early work to the older, harder trees, fruit growers can keep injury to a minimum.

Apple and pear trees are the hardiest of the fruits with plums and sour cherries next in order. Because peach and sweet cherry trees are most tender, delay their pruning, particularly the younger trees, until later in March.

FACTORY TRAINED MECHANICS

SPERRY NEW HOLLAND

One-step fertilization and weed control in half-a-day.

Weed and feed your cornfields in one trip.

Get two jobs done fast, right and on time. Just ask your fertilizer dealer to apply Sutan[®]+ herbicide in combination with atrazine and/or Bladex[®] with your choice of fertilizer, dry or liquid. He'll spread them. You just incorporate.

You have four hours to incorporate.

Of course, your dealer can apply your fertilizer impregnated with Sutan+ faster than you can disc it in. But you don't have to worry about Sutan+ losing any of its effectiveness. Because you're allowed up to a full four hours between application and incorporation.

The best incorporated corn herbicide.

Sutan+ with atrazine and/or Bladex gives you outstanding control of annual grasses and broad-leaf weeds. Sutan+ is the only corn herbicide designed to be incorporated. So you get a weed barrier that works rain or shine.

Check with your fertilizer supplier now about time and labor-saving weed and feed, with no worry about loss of effectiveness. Follow label directions. Stauffer Chemical Company, Agricultural Chemical Division, Westport, CT 06881.

The best incorporated corn herbicide

FOR THE WEEK: Compared to late last week Feeder Steers and Heifers steady to 2.00 lower. Slaughter Cows 1.50-2.50 higher, largely 2.00 higher. Late sales Utility and Commercial 2-4 43.30-45.25, package 1205 lb. 45.75; Cutter 1-2 39.00-43.00; lots Mixed Cutter and Utility 43.00-44.75; Canner and low Cutter 32.25-39.50. Slaughter Bulls steady; late sales YG 1-2 1500-2000 lb. 52.00-58.00; 1100-1300 lb. low-dressing 46.50-48.25. Salable receipts this week near 21,000 head compared with 25,335 head last week and 31,191 head last year. Majority receipts consisted of Feeder Steers and Heifers; Cows and Bulls made up 7 percent of salable supply.

Peoria Auction

Peoria, Illinois

Thursday, March 10

Report supplied by USDA

Slaughter Steers and Heifers were uneven, generally .50 to 1.00 higher for the week on small receipts. Cows fully 1.00 to mostly 2.00 higher. Bulls 1.00, instances 2.00 higher. Trading fairly active both Monday and Wednesday. Demand was only moderate as a result of forced trading on small receipts and buyers attempting to keep dressed costs from advancing faster than the Carlot Beef trade. Receipts about 1,200 this week as compared to 1,582 a week ago and 1,948 a year ago.

Slaughter Steers: Choice 2-4 1,000-1,250 lbs. 62.00-64.50, Part Load 2-3 1,439 lbs. 65.00 on Monday and Load Choice, Few Prime 3-5 1,311 lbs. on Wednesday 64.50. Mixed Good and Choice 2-3 950-1,150 lbs. 60.00-62.00. Good 57.00-61.50. Few Good and Choice 2 1,100-1,250 lbs. Holsteins 53.00-55.00.

Slaughter Heifers: Choice 2-4 900-1,050 lbs. 61.00-63.75, mostly 62.00-63.00. Part Load Choice 2 1,125 lbs. 63.50 Monday and Part Load Choice 2-3 1,175 lbs. Wednesday 64.00. Choice 2-3 850-900 lbs. 58.50-61.00. Mixed Good and Choice 2-3 850-1,050 lbs. 56.00-61.00. Good 850-1,000 lbs. 55.00-60.00.

Cows: Utility and Commercial 1-3 Late 39.00-41.50, Some Utility 1-2 1,300-1,800 lbs. 42.00-44.00. Cutter 1-2 33.00-38.00. Canner and Low Cutter 30.00-34.00.

Bulls: VG 1-2 1,100-1,800 lbs. 46.00-56.00. Mostly 50.00-55.00.

Move silage... From silo to bunk reliably

A Patz feeding system is headed by the unique Patz cutter-and-claw gathering chain silo unloaders. Select the surface-drive 98B or the ring-drive RD-820. The Patz gathering chain with chain-saw action cuts out frozen and hard-packed silage for full-flow feeding.

Spring tension keeps the Patz power cutter tight to silo walls, even if walls are irregular.

Choose from three over-under chain conveyors with varied capacities and one-way or two-way delivery. Or, chose a versatile side-

by-side single chain Patz Material Mover.

The Patz Belt Feeder feeds quickly. The simplicity of design makes maintenance simple and keeps the price low. For other feeding situations, consider a Patz tapered-pan feeder or an in-bunk chain feeder.

All Patz feeding equipment offers a variety of optional accessories to meet your needs.

See your Patz dealer for details. He is experienced in installation, service and he has a parts supply on hand to keep you feeding.

14 Hoffman Formulas 99% Customer Satisfaction

Customer satisfaction with Hoffman Formulas is overwhelming. In 20 years and 50,000 orders, we have received about two dozen complaints. That is an enviable 99.9% satisfaction rate.

There are plenty of good reasons for the increasing popularity of Hoffman Formulas. Each of Hoffman's 14 formulas is a balanced blend of high producing varieties of grasses and legumes. They're designed to help you get peak results when conditions are good, yet provide good protection against loss when the conditions are poor.

Each is composed of matched-maturity, legumes and grasses, specifically designed for Eastern conditions, so there's sure to be several to fit your requirements. Each contains only high performance, high germination seed. Most include varieties sold only by Hoffman. They are imitated but cannot be duplicated.

Hoffman Formulas are unmatched for hardiness and yield over the life of the stand. Join the satisfied customers by seeing your Hoffman Seed Man, or writing for our new Hoffman Seed Book.

Farmers: beware of propane fire dangers

By Joyce Bupp
Staff Correspondent

YORK — Beware farmers and rural homeowners.

If you're heating a shop, or part of your home, with a propane gas cabinet heater, not only are you courting danger you're also breaking the law.

That's the word from Trooper James Boyle, of the York State Police fire marshal's office. Boyle, the chief investigator of the rash of barn arsons in southern York County, is painfully aware of the financial and emotional problems that follow the wake of a fire.

The Pennsylvania Department of Labor and Industry recently issued warnings on the indoor storage of propane gas tanks used with small cabinet heater. Estimates are that about 5,000 of the cabinet units have been sold, primarily through hardware and farm supply and equipment stores.

While noting that as yet no explosion of the heavily pressurized containers has been reported, Boyle wants to do his part to "stop it before it becomes a problem."

He issues additional words of warning to farmers understandably nervous over the series of barn burnings that have erupted periodically for two years, centered in the Stewartstown-

Fawn Grove-New Freedom area of southern York County.

Earlier this year, the arson plague edged across the Mason-Dixon, with the torchings of several northern Maryland barns.

"Don't shoot," he emphasizes, and reemphasizes several times.

"It's a point of law. You have the right to kill a person only if you feel your life is in danger and there is positively, absolutely, not any other possible way out."

"That doesn't mean shoot if you think your property is in danger. You could be criminally arrested for it, and could even conceivably lose your farm in court if you injured someone and were later sued for damages in a civil case," warns Boyle.

Nevertheless, a property owner does have some rights if he believes a trespass with criminal intent is occurring.

"There's nothing wrong with physically restraining a prowler at nighttime, or during the daytime, if a theft or obvious crime is being committed."

Caution is the key. The law simply does not allow a property owner to take a shot at, or punch out, someone who walks inside a barn.

According to the fire marshal, February 7, 1983, changes to the state law strengthened the

penalties to persons convicted of intentionally setting, or paying for the setting of, arsons.

If a death from an arson, results to a farmer or fireman, for instance, who was fighting a set barn blaze, the person or persons convicted of setting the fire would be given either a death sentence, or life imprisonment with no parole.

Conviction for arson in which no lives are lost earns a penalty of the maximum of twenty years imprisonment, or \$25,000 in fines, or a combination of both.

Another change in the arson-related law more directly affects property owners.

Any farmer who wishes to burn out a fence row or brushpile must plant control measures ahead of time, such as enlisting extra help to be on hand if the flames accidentally spread.

If such a fire spreads to neighboring property, the law requires that the property owner notify the fire department. If no such report is made, the property owner who started the fire could be liable for arrest.

While Boyle is not able to comment on the series of York County arsons, due to continuing investigations, he did relate some reasons, from past cases, why farm fires and theft may occur.

Some past investigations have turned up burnings that resulted from attempts to cover up other crimes, such as stealing gasoline or resalable materials such as wire or copper.

According to Boyle, thieves may simply set a barn afire in anger from not having found anything valuable to steal.

Then there are cases that border on the bizarre, like the gasoline thief who couldn't hear the fluid running as he was attempting to siphon it out, so he flicked on a lighter for a better look - and set a building afire.

Seemingly unrelated outside events are sometimes tied to rural crime.

One such incident occurred sometime ago, when police received a long list of farm machinery theft reports. During

For every arson investigation, Trooper James Boyle is faced with a lot of paperwork.

the same five-day time period during which the thefts occurred, investigators learned that a ship destined for an underdeveloped foreign country had been docked in the Baltimore harbor.

"I know it's hard to tell a farmer that he has to change, but crops, equipment, chemicals, nearly every part of farming has changed," he figures.

"Now, a farmer needs to change the kind of barn he'll build. He needs to think security."

Security means building away from roads, unlike the historic trend toward building near the roadways for easy access.

Old barns still standing, especially those along highways, need extra precautionary measures. Locks on doors and screen on windows facing the road could mean the difference between a serviceable building and one reduced to smoldering timbers in the wake of tossed incendiary device.

The same principle applies to deterring thieves.

"If a thief must work at it, and make noise to get in somewhere, it's likely he'll move off to something simpler," says the investigator.

Alarm systems for barns are still not perfected in Boyle's opinion, since they can too easily be set off by such variables as electrical storms, or even a flock of pigeons, flying through the area.

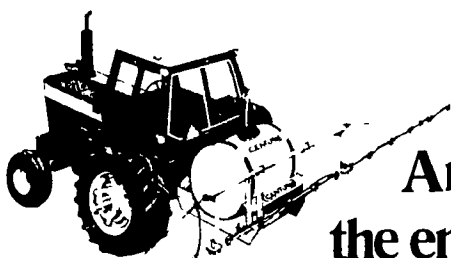

Electrical problems remain the prime cause of fires across the nation, and a major cause of accidental barn fires.

"Look at the wiring in a barn 20 or more years old," Boyle warns. "It becomes brittle with age, develops cracks, and then moisture during heavy rain periods or spells of dampness will short, causing sparking and fires. Barns expand and contract with the weather, stretching electrical

(Turn to Page A23)

Trooper James Boyle, York fire marshal, examines sections of frayed electrical wiring, a major cause of accidental barn fires.

Mastitis management turns dairy losses into profits

NEWARK, Del. — Mastitis costs the American dairy industry close to \$2.8 billion a year, or about \$225 per cow annually. Dairy producers can reduce these losses by adopting a preventive mastitis program, says University of Delaware extension dairy specialist Dr. George Haenlein.

Both clinical and subclinical forms of mastitis hinder production, he says. With either type, cows produce less than they could, but few dairy farmers are aware of the extent of their losses. He estimates that with subclinical mastitis, milk production drops 10 to 15 percent per infected quarter, for an average annual loss of \$147 per cow, compared to losses of \$78 per cow with clinical mastitis.

Roughly half of all cows go into their dry period with subclinical mastitis, Haenlein says. Without treatment, 60 percent will develop clinical mastitis when they freshen.

"If producers look at these figures, they will realize that the real challenge is to eliminate the nonvisible subclinical cases," the specialist says. He suggests they adopt a seven-step management program to reduce infection and loss of milk.

1 - Maintain a clean environment by providing fresh bedding and keeping barns, pens and free stalls clear of manure.

2 - Maintain and sanitize milking equipment properly.

3 - Follow good cow hygiene by

washing and drying teats with single-use paper towels.

4 - Dip teats in a recommended antiseptic after each milking.

5 - Follow a dry cow therapy program by treating quarters at drying off with preparations proven effective against mastitis infections. To cure subclinical infections use antibiotics such as novobiocin, penicillin and dihydrostreptomycin, known to control mastitis-causing bacteria.

6 - Check each lactating cow for subclinical mastitis by running a California Mastitis Test (CMT) or enrolling in the DHIA somatic cell counting program (SCC).

7 - Culture and treat infected quarters showing a "trace" on the CMT, or 250,000 somatic cells or more on the DHIA SCC program.

Haenlein says dry cow mastitis treatments can be 90 percent effective in reducing the incidence of

Staph. aureus infections. When a clinical mastitis infection occurs, treat it immediately. He recommends using a combination antibiotic formulation containing penicillin and novobiocin on lactating cows. This formulation can control the bacteria responsible for 90 percent of all mastitis infections. By following these management guidelines for dry and lactating cows, producers can maintain milk quality and avoid milk losses.

"Mastitis adversely affects the quality of milk and milk products just as it affects production," the specialist says. "If dairy producers are to continue providing the quality milk products consumers demand, they should make mastitis control a top priority in their herd health program."

"Of course, cost is a major

factor to consider when establishing a mastitis management program," Haenlein says. Individual producers must decide whether the program is worthwhile to them. They should look at production loss mastitis would cause, put a dollar figure on it, then consider what a management program would cost. Most will find the money is well spent.

"If a cow is producing 12,000 to 15,000 pounds of milk each year at a value of 13 cents per pound, she's bringing in approximately \$1,500 to \$2,000 each year. After a mastitis infection, it's possible that she could stop milking altogether, but she will definitely have a drop in milk production. Treating the four quarters at dry-off costs only \$6. That \$6 could actually save the producer up to \$1,500 a year," Haenlein says.

Check lactating cows for subclinical mastitis by running either California Mastitis Test or enrolling in DHIA somatic cell counting program.

Good management can make oats profitable

UNIVERSITY PARK — "Using modern oat varieties and managing them carefully will go a long way toward increasing your chances for producing a profitable, bumper crop," declares Harold G. Marshall, USDA research agronomist at Penn State.

He claims that farmers producing 100 or more bushels of corn per acre, using comparable management, should do the job with oats and at about half the cost for corn.

"You may need more fertilizer than you have been using, but otherwise the cost per acre of producing either good or poor oats is similar — so good management is essential," Marshall affirms.

He says oats are worth growing if farmers can harvest 80 to 100 bushels of grain per acre — plus one and one-half ton of straw or more per acre.

Marshall has been doing research with oats for 24 years at Penn State. He and Elwood Hatley,

extension agronomist in the College of Agriculture, suggest a seven point program for farmers to use in producing high yields of oats, given favorable weather:

Proven Variety

First, use an adapted variety of proven performance. Don't limit grain yield and quality by growing varieties that are genetically inferior. In general, the newer varieties have substantially improved standing ability, disease resistance, and grain yield. They should increase the chances of harvesting a bumper crop if weather and management conditions are favorable.

According to Penn State's Agronomy Guide, the best oat variety choices for 1983 are Noble, Larry, Ogle, and Porter. The average grain yield of these varieties in Penn State tests over the past four years has been over 100 bushels per acre.

Larry and Ogle are two high yielding new varieties developed

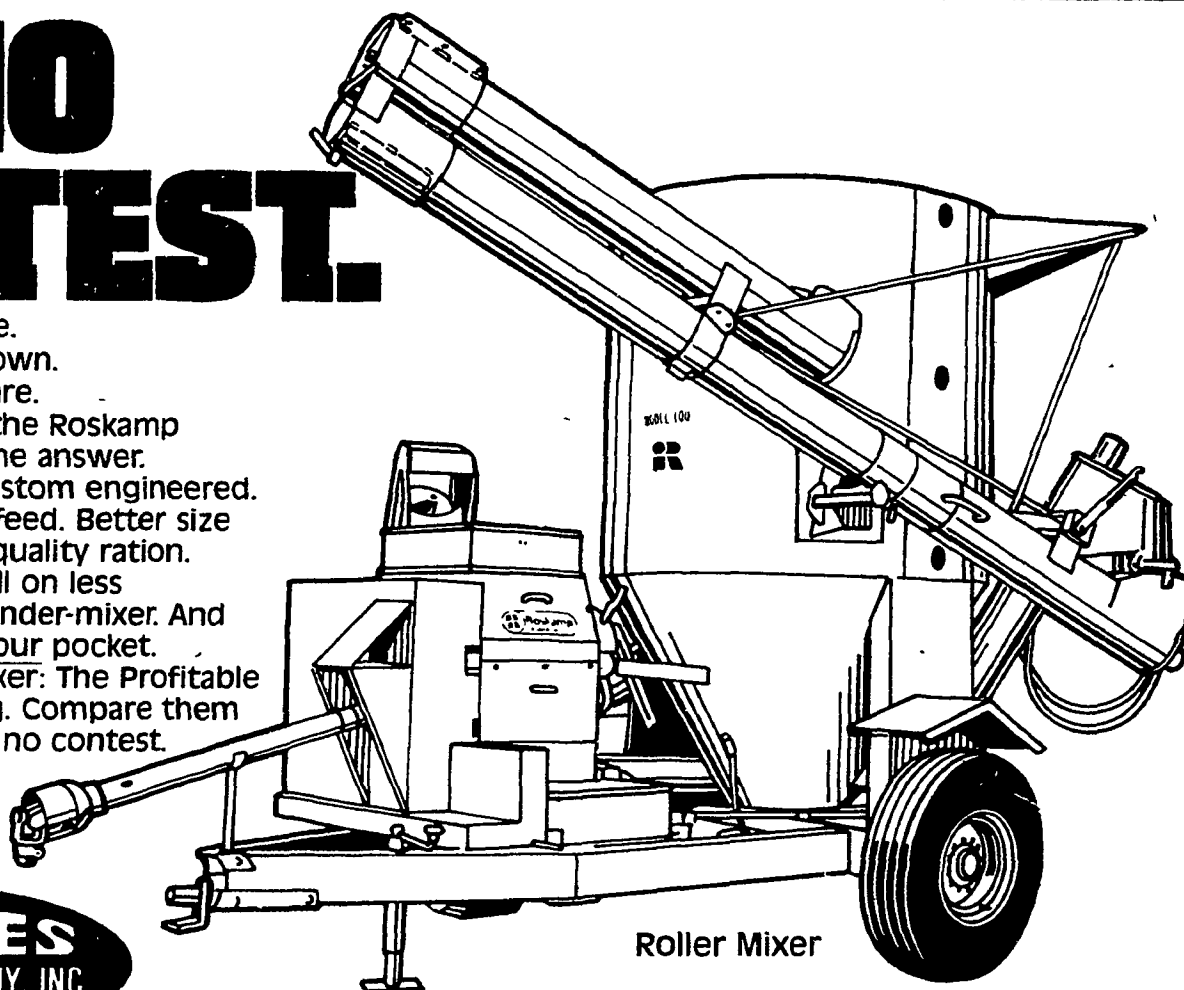

by the Illinois Agricultural Experiment Station and released jointly with Penn State. These varieties have good tolerance to barley yellow dwarf virus (BYDV), transmitted by aphids and able to cause serious damage to oats. They have yielded 10 to 15 percent more grain than the older varieties. Larry is an excellent choice for an early variety. Ogle is a few days later in maturity but is the most lodging resistant of the recommended varieties.

Porter is a new variety from Indiana. It has good resistance to barley yellow dwarf virus, excellent bushel weight, and is high yielding. Porter matures later than the other recommended varieties, and is best adapted in the central and northern areas of the state. It is not the best choice to grow in southeastern Pennsylvania. Risk of damage by heat or drought, or both, is greatest there during the critical grain-filling period.

IMPCO District 5 honors Shertzer, elects officers

BY DEBBIE KOONTZ
WILLOW STREET — More than 130 dairy producers gathered for the annual Inter-State Milk Producers' Cooperative District 5 meeting, Monday, at Willow Valley Family Restaurant, here.

James Honan, secretary of

IMPCO and past general manager for 19 years, urged the participants to get involved in promotion, describing it as a way "to help ourselves," out of the current milk surplus situation.

A highlight of the afternoon
 (Turn to Page A21)

Wilmer L. Shertzer, center, and his wife Esther, were honored with this plaque for five years consecutive participation in Inter-State's Cost of Production study. Presenting the award to the R2 Columbia couple is District 5 director Wade Groff.

The new executive slate for the Millersville Local, District 5, will be filled by, from left, Melvin Shertzer, R1 Millersville, hauling committee member; Glenn R. Binkley, R2 Columbia, delegate; Nelson H. Hershey, Mountville, delegate; and David Charles R2 Lancaster, secretary-treasurer; J. Clayton Charles, president, and Nelson Habecker, vice president, were not present for the photo.

Elected to serve on the West Lampeter Local were, from left, Kenneth Garber, Willow Street, president; James D. Shertzer, Lancaster, delegate; John H. Howard, Willow Street, delegate; and John M. Harnish, Lancaster, secretary-treasurer. Not present for the photo was Arthur L. Breneman, vice president.

The Witmer Local of District 5 will be represented by Harvey E. Heller, Lancaster, secretary-treasurer and delegate; and John Landis, Leola, president and delegate. J. Robert Esbenshade, vice president, was not present.

"Inter-State: Dynamic at 65"

LANCASTER — Usually when a 65th birthday is celebrated, visions of retirement and a life of ease come to mind.

While this may be the case for many individuals, it couldn't be further from the truth for an expanding business such as the Inter-State Milk Producers' Cooperative who describe their operation as "Dynamic at 65."

With headquarters in Southampton, Pa., IMPCO caters to 3,200 farmers in Pennsylvania, New Jersey, Maryland, Delaware, Virginia and West Virginia.

According to the Cooperative, in its 65-year history, Inter-State has progressed from a bargaining agent for members to a cooperative with two subsidiaries providing "needed services to farmer-owners."

Although membership has declined from its peak of 20,000 members to 3,200, the volume of milk marketed has increased from about 381 million pounds to 2.43 billion pounds. This latter figure is the recorded weight for fiscal 1982.

In their recently-printed celebration booklet, Inter-State reports that finances were tight for turn-of-the-century dairy farmers. "For a number of years prior to World War I, farmers received only four cents a quart for milk... and the average dairy cow only produced a profit of 30 cents."

A group of Grange dairy farmers in Chester County organized the Inter-State Milk Producers' Association in early 1917. The first meeting was held on March 15, 1917.

At this time, milk was shipped into Philadelphia and sold at auction. No farmer had assurance that he was paid correctly for his milk — either on volume or butterfat. IMPCO began to tackle the problem.

By their fifth anniversary, IMPCO reported 15,000 members. According to the Cooperative, the average price paid that year, in the 50-mile zone, was \$2.23 per hundredweight for 3.5 percent test.

In the years that followed, Inter-State producers were forced to suffer several price

fluctuations with drastic changes occurring during the Great Depression and the advent of World War II.

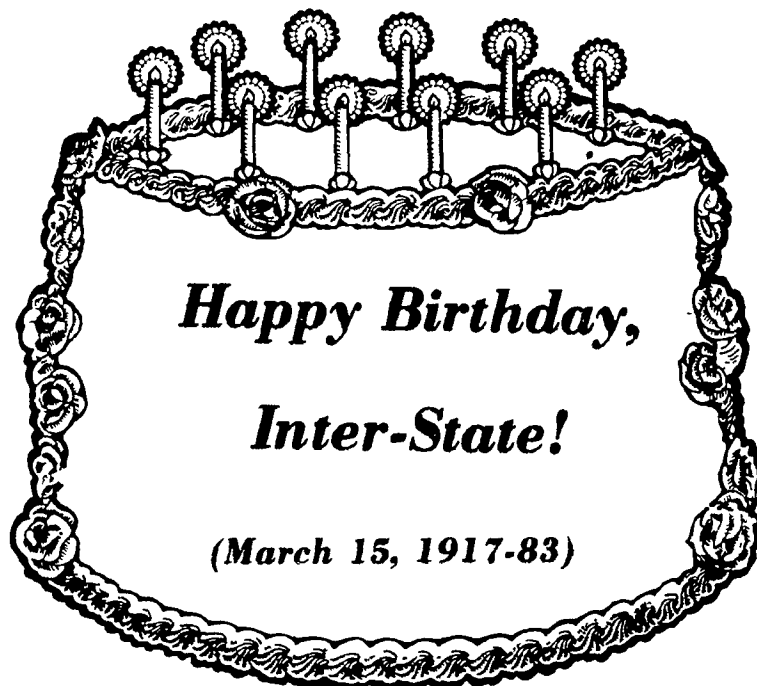

IMPCO, as with other cooperatives, suffered from the intrusion of oleo on the market in the early '40s. Other battles followed as industry leaders pushed for dairy farmer supported advertising and milk pricing, urged the transition from cans to bulk tanks in the late '50s, and faced the changes occurring in competitive cooperatives.

In the late '70s, surplus milk pressures inspired Inter-State and Maryland Cooperative Milk Producers to build a butter-powder balancing plant. The result? The birth of Holly Milk Cooperative in Mt. Holly Springs, Pa. This \$11 million plant was capable of processing an average 1.5 million pounds of milk a day.

Today, IMPCO is the largest cooperative serving dairy farmers in Pennsylvania. Robert B. McSparran became

their ninth president in 1980 and Paul Hand, general manager,

took over his position in 1982. — DK

Farm Credit elects at Kulpsville

KULPSVILLE — The 48th Annual Meeting of the Southeast Production Credit Association and the Southeast Federal Land Bank Association was called to order by Land Bank President Earl Stover on Tuesday night at the Christopher Dock Mennonite High School in Kulpsville, Montgomery County.

Over 400 voting stockholders from the five-county metropolitan area elected directors to both organizations and also selected the 1984 Nominating Committee. Tuesday's meeting was the second of two such gatherings. The first being held at the Oxford Fire Hall, Oxford, Pa. for the convenience of

stockholders living in the Chester County area.

Re-elected to a three year term as Director of the Southeast Production Credit Association was Charles E. Frederick of RD New Hope, Bucks County. He owns and operates a dairy and crop farm in Buckingham Township. Frederick is a member of the Bucks County Farmers Association; the Interstate Milk Producers and was an FLBA director for two years.

With his brother and nephew he owns 87 acres and rents 270 acres for their dairy, grain and crop operation. They also fatten 100 hogs a year. He is a member of Agway and is currently serving on

the Buckingham Township Planning Commission.

Elected to three-year terms as directors of the Southeast Federal Land Bank Association were H. Ralston Brown, 103 Mount Olivet Rd., Oxford; and Jefferson Yoder, RD1 Elverson, Chester County.

Brown is currently a director for the Southeast PCA and the FLBA. His term as PCA director will run until 1986. He owns 365 acres and rents an additional 150 for the dairy partnership he operates with his son in East Nottingham Township. He is a member of the Pennsylvania Farmers' Association and serves on the ASCS Committee.

participation in Inter-State's Cost of Production study.

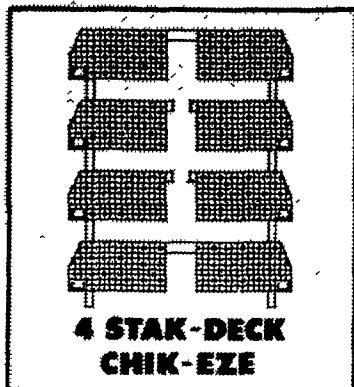

The Shertzers, members of IMPCO for 14 years, milk 85 Holsteins and farm 114 acres on their Whistling Glen farm. The couple has three children: Beth, 11; Mark 9; and Sammy, 4.

Following the District 5 business meeting, the following men were elected as officers and delegates:

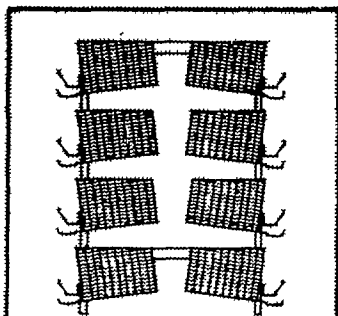

Millersville Local — J. Clayton Charles, president; Nelson Habecker, vice president; David Charles, R2 Lancaster, secretary/treasurer; Glenn R. Binkley, R2 Columbia, delegate; Nelson H. Hershey, Mountville, delegate; David Garber, alternate delegate; and Melvin L. Shertzer, alternate delegate and hauling committee member.

West Lampeter Local — Kenneth B. Garber, Willow Street, president; Arthur L. Breneman, vice president; John M. Harnish, Lancaster, secretary/treasurer; John Howard, Willow Street, delegate; James D. Shertzer, Lancaster, delegate; Moses M. Beiler, alternate delegate; and Philip B. Beiler, alternate delegate.

Witmer Local — John J. Landis, Leola, president and delegate; Robert Esbenschade, vice president; Harvey E. Heller, Lancaster, secretary/treasurer and delegate; J. Robert Esbenschade, alternate delegate; and Jeffrey L. Landis, alternate delegate.

"A little out of the way... but a lot less to pay"

Greensburg seminar stresses heifer replacements

By Sylvia Cooper
Staff Correspondent

GREENSBURG — This year's theme of the Dairy Heifer Replacement Seminar at the Mountain View Inn, Greensburg, on March 3, stressed the development of heifers of proper size and condition to enter the milking herd with a minimum of expense.

A large crowd listened while five speakers outlined their views about heifers.

Judd Heinrichs, Extension dairy specialist from Penn State, pinpointed the financial problem with raising dairy replacements. He said that an 18.6 percent calf loss in the state has resulted in over \$4 million loss to the dairymen. According to Heinrichs, the loss of dollars can be measured in more ways than the loss of heifer calves. On top of the calf loss, a farmer must determine the loss in milk production that would have come from these heifers. There would also be a genetic loss. Most cows are bred to superior bulls to improve the faults of the previous generation. In addition, the dairymen would have less opportunity to cull because fewer heifers would be available to the herd.

Feeding, housing and disease control are the three most critical areas to improve the dairy replacement situation, Heinrichs said. Dairy farmers must do a good job in each of these areas to have well grown, healthy heifers, he stressed.

Calving Goal
Dick Adams, Extension dairy specialist, discussed dairy nutrition. He said that the ideal age of calving is 24 months of age for a

number of reasons. The heifer producing at an earlier age will make the dairyman more money she will tend to be less fat and may consequently have fewer calving problems and be inclined to produce more.

Adams said that in Pa. the average age at calving is 28.5 months of age and much of this is due to a delay in maturity. What the dairyman needs to achieve is adequate size without fattening.

To get to this goal, Adams said that it is necessary to develop the calf's rumen as soon after birth as possible. He stressed the importance of getting a good concentrate mix and high quality forage into the calf during the first week of life. The crude protein content of calf started should be from 16 to 18 percent with added selenium. In cold weather, Adams said that it is necessary to give the growing calf 20 percent more feed. There should be plenty of forage available to the calf because more heat is produced when forages are broken down in the fermentation vat.

Vaccination Data
Dr. Larry Hutchinson, Penn State Extension Veterinarian, told dairymen that it costs at least two dollars a day to keep heifers beyond 24 months of age. "Animals come in heat only when they are sexually mature," he said, "and this means size not age." Hutchinson recommended that dairymen tape all animals to determine if they compare to breed average. He also noted that good restraint facilities are convenient for taping, breeding and pregnancy checking. Without such facilities many problems are overlooked.

To obtain growthy heifers, Hutchinson said that calf scours and pneumonia should be minimized. Scours cause damage to the intestinal lining making absorption poor. Pneumonia, on the other hand, tends to be chronic. In line with this, Hutchinson stated that both internal and external parasites should be controlled. Parasites may cause anemia or low blood count, preventing some heifers from maturing when they should.

Heifers should be vaccinated for Bang's IBR and Pepto. If a heifer is not vaccinated for Bang's she will be susceptible for the rest of her life. Hutchinson said that leptospirosis is common today and the heifers are more liable to get the disease than cows. In defence of IBR vaccinating, Hutchinson said that cows become resistant when they are exposed but young calves have no resistance and many die.

Indiana Survey
County Extension Director, Ward Stover, explained that Indiana dairymen were concerned that their herds were producing 1200 pounds below the state average. The problem was attributed to small two year olds coming into milking herds.

Stover, in cooperation with the

dairymen from Indiana incorporated a replacement heifer measurement program to determine if heifers were grown to adequate size at freshening time. Results of the measuring showed that 80 percent of the heifers measured were below average at 13 to 15 months of age. By 1982, when heifers were again measured, Stover found that only 30 percent of the heifers were below average.

Stover identified several problem areas that dairymen corrected to make the turn around. Number one on the list was a lack of awareness and a necessity for more attention and management. He said that heifers were not being fed properly and that housing was too far away with not enough groups or space. Sanitation with good air and water was another problem area he noted.

Heifer Barn
W. H. Collins, a national authority on calf and heifer housing from Virginia Polytechnic Institute, explained the implementation of the countersloped heifer barn. The barn was designed in Virginia in the mid-1970's for use in both dairy and beef operations. The building is considered a low cost type of confinement housing as compared to

more sophisticated kinds of housing.

To describe the barn, the sloped resting shelter should have a southeast orientation for maximum drying and warming from the sun. A litter alley lies between the resting area and the sloped feeding slab. Litter alleys should be tractor scraped once a week. A series of gates between pens swing around so that scraping can be done with heifers confined in the resting areas.

According to Collins, recent findings suggest that the sloped floor of the barn has improved the feet on heifers. Some heifers have no need to be hoof trimmed until their second lactation.

Collins also presented slides showing permanent hutch housing. He said that movement of hutches may not be necessary. The facility is closed on three sides with wire sided runways between calves.

Animals are free to move and can choose between the protected part of the pen or the open screened area. Labor can be reduced with a facility such as this as opposed to conventional calf hutches. Collins said that owners tend to spend more time with calves if they are in a protected form of housing instead of in conventional hutches.

3 Eastern Lancaster meetings this week

TERRE HILL — The Eastern Lancaster County Adult Farmer Program will sponsor three meetings during the coming week at the Union Grove School, Terre Hill.

The meetings include an educational session on Guaranteed Markets for livestock and crops on Tuesday evening; a Vegetable Growers meeting on Wednesday evening; and a Farmland Preservation session on Thursday evening.

Speaker for the Tuesday meeting at 7:30 p.m., will be Marlin Miller

from the Pennsylvania Farmer Association. PFA offers a program of guaranteed markets for livestock and crops to farmers in Pennsylvania along with a guaranteed price for future feed grain purchased. This program is of importance to farmers now that many banks are requiring a guaranteed market price before they will lend money in today's tight farm economy.

Speakers for the Vegetable Growers meeting Wednesday at 7:30 p.m., will be Larry Yeager, marketing specialist with the Penn State Extension Service and Mike Orzolek, Vegetable Specialist. Orzolek will be discussing the growing of carrots, a crop that will be grown in the area this year by Beachnut Foods through the Conestoga Valley Growers Association. Yeager will be discussing the marketing of vegetable crops to maximize profits.

Are we running out of farmland? Between 1969 and 1978, Pennsylvania lost 150,000 Acres of farmland. During that same period, Lancaster County, the most productive non-irrigated farmland in the United States lost 21,600 acres of farmland. If the loss of farmland continues at that rate, Lancaster County could be running out of farmland.

The Eastern Lancaster County Adult Farmer Program meeting on Farmland Preservation will begin at 7:30 p.m. on Thursday. Speakers for the evening will include Jim Huber, Lancaster County Commissioner; Amos Funk, Millersville area farmer who has been active at the local, state, and national level on both farmland preservation and conservation; and David Watts, Administrative Director of the Lancaster County Farmland Preservation Board. They will be discussing the programs available

(Continued from Page A18)
wiring and weakening and fraying the outer protective covering."

Heat lamps pose a very dangerous fire hazard, and should never be used near combustible materials of any sort.

Even barnyard creatures add an element of danger. Boyle says that he has seen electrical boxes totally filled with mud from the home-building of mud wasps. Rodents, such as mice and rats, can become trapped between floors or walls, and chew electrical wires as a last resort for food. Rodent caused fires, though, are more common to private homes than to barns, Boyle believes.

Spontaneous combustion, from

to insure the preservation of farmland and agriculture in Lancaster County.

The Union Grove School, Terre Hill, is located two miles north of Route 23 on Route 625. For further information on any of the meetings, contact Bob Anderson, Adult Farmer Instructor, at (215) 445-5041.

Fire dangers

stacked hay or straw that is too wet for storage, is not a major problem, but the fire marshal's office does run across it as the cause of an occasional barn fire.

"If you could bottle common sense, and sell it, we'd all be better off," philosophizes Boyle. A 20 year veteran of the state police, half of that time in fire investigation, he shares his offices at York State Police headquarters with partner Robert DeWire.

He laments the burning of the county's landmark barns, which are irreplaceable in their craftsmanship, materials and historic value. With a sigh, Boyle admits that looking at pictures of once-beautiful barns, and listening to the owners reminisce about them, is both a personally and professionally frustrating part of his job.

The Insurance Federation of Pennsylvania maintains reward fund from which up to \$5,000 will be paid for information leading to the arrest and conviction of arsonists.

Persons with information on arson suspects should call the Arson in Pennsylvania Hotline, 800-462-0322.

FURADAN MAKES A STAND.

Some say, if it's not a Furadan® insecticide stand, it's not a stand at all.

And we can take a stand like this because Furadan has the results to back it up.

When you use Furadan insecticide at seeding, you'll have thicker, higher protein alfalfa. Once you put down Furadan insecticide your new crop will be protected from leafhoppers and blotch leafminers from the time it starts to grow.

Field tests with Furadan in Pennsylvania, Maryland and Virginia showed an average yield increase of more than 1/3 ton an acre per cutting over the untreated acreage.

This year start your alfalfa off right. Plant with Furadan. And make a stand.

From FMC Corporation, Agricultural Chemical Group, 2000 Market Street, Philadelphia, PA 19103.

Cumberland Sheep/Wool Growers celebrate 50th

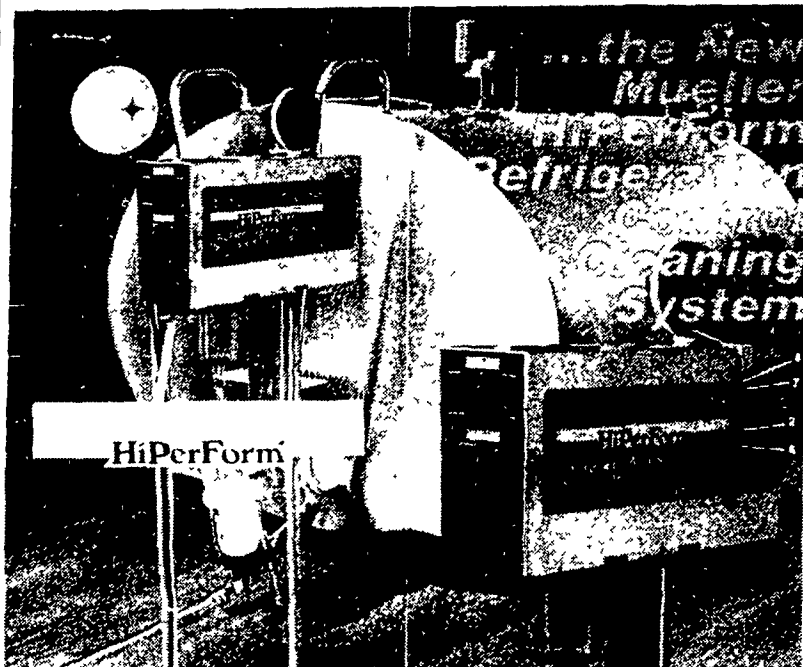

Commissioners of Cumberland County recognize Cumberland Cooperative Sheep and Wool Growers for serving the sheep producers for 50 years. Mrs. Rosemarie Peiffer, County Commissioner presents a certificate from the Commissioners to Marlin Rook, left, President of the Cooperative, and Robert Holtry, vice-president.

Cumberland Cooperative Sheep and Wool Growers celebrated their 50th Anniversary at a banquet recently at South Middleton Firehall, Boiling Springs. Directors and officers include, seated from left, secretary-treasurer, Donna Duncan, Carlisle; President Marlin Rook, Newville; Vice-President, Robert Holtry, Carlisle. Standing from the left, Richard Eigenbrode, Waynesboro; Ben Bow, Annville; Credon Bixler, Carlisle, and Steven Ebersole, York. Richard Kammerer, director from Gettysburg is absent from picture. The directors announced the 1983 Wool Pool will be held June 22 at the Carlisle Fairgrounds, Carlisle.

Profitable oats

(Continued from Page A19)

Plant Early

Second, plant early for high grain and straw yields. Plant at the earliest possible date, even if it's only March; but don't "mud in" your oats. In central Pennsylvania, oats should be planted by April 15. On the average, farmers may lose one bushel yield per acre per day by planting after that date. Plant earlier in the southern part of the state, especially in the southeast. Planting a few days later than April 15 may not greatly lower yields in Northern Pennsylvania during most years.

Early planting does not add to production costs but probably will add more to yield than any other management input.

Good Seedbed

Third, prepare a good seedbed. In most cases, plowing will result in the highest yields. Fall plowing is best if erosion is not likely to be problem. Use a disk or harrow, or both, to work the soil to produce a uniform, level seedbed. If the soil is dry, use a cultipacker to break up clods and improve conditions for seed germination. The final fitting should leave a firm seedbed, but there should be one or two inches of relatively loose soil on the surface. Don't overwork the soil, however, since this can cause crusting of the surface following heavy rain.

Oats also can be grown successfully with a no-till planting system. No-till allows earlier planting and reduces soil losses caused by erosion.

Plant Properly

Fourth, plant properly with a drill at a uniform depth of 1 to 1½ inches. This is important for good stands of plants with deeply placed growing points. Sow 3 bushels of high quality seed per acre to get the 22 to 30 plants per square foot required for a 100-bushel yield. Remember that a poor stand automatically fixes optimum yield below that possible for prevailing conditions. If oats are used as a companion crop for legumens and grasses, however, reduce the seed rate by about one half.

Follow Soil Test

Fifth, if possible, apply lime and fertilizer according to a soil test. The pH should be 6.0 or above for oats alone and 6.5 to 7.0 where legume underseedings are made. If there is no soil test, apply 50 to

100 pounds per acre each of phosphorus (P_2O_5) and potassium (K_2O), depending on the estimated soil fertility level. Apply 50 to 60 pounds per acre of nitrogen unless lodging is a problem. If lodging is likely, reduce the nitrogen rate to 30 to 40 pounds per acre.

To avoid fertilizer burn, apply up to 40 pounds per acre of nitrogen alone or 60 pounds per acre of nitrogen plus potassium through the drill at planting. The remainder of the fertilizer should be broadcast and disked in prior to planting. Another method of handling the nitrogen is to apply about half of the nitrogen at planting and then topdress the rest on the oats 3 weeks after planting. Some risk will be run, however,

since wet weather could interfere with topdressing at the proper time.

If livestock manure has been applied, reduce the nitrogen rate by 4 or 5 pounds per ton on manure. Also use less nitrogen if the oats are following a legume crop.

Control Weeds

Sixth, keep in mind that annual weeds usually can be controlled by tillage prior to planting and by the competition of a uniform, dense stand of oat plants. If additional weed control is necessary, consult Penn State's Agronomy Guide or your Cooperative Extension Service for current recommendations. Be sure not to damage oats by applying herbicides at the wrong stage of growth.

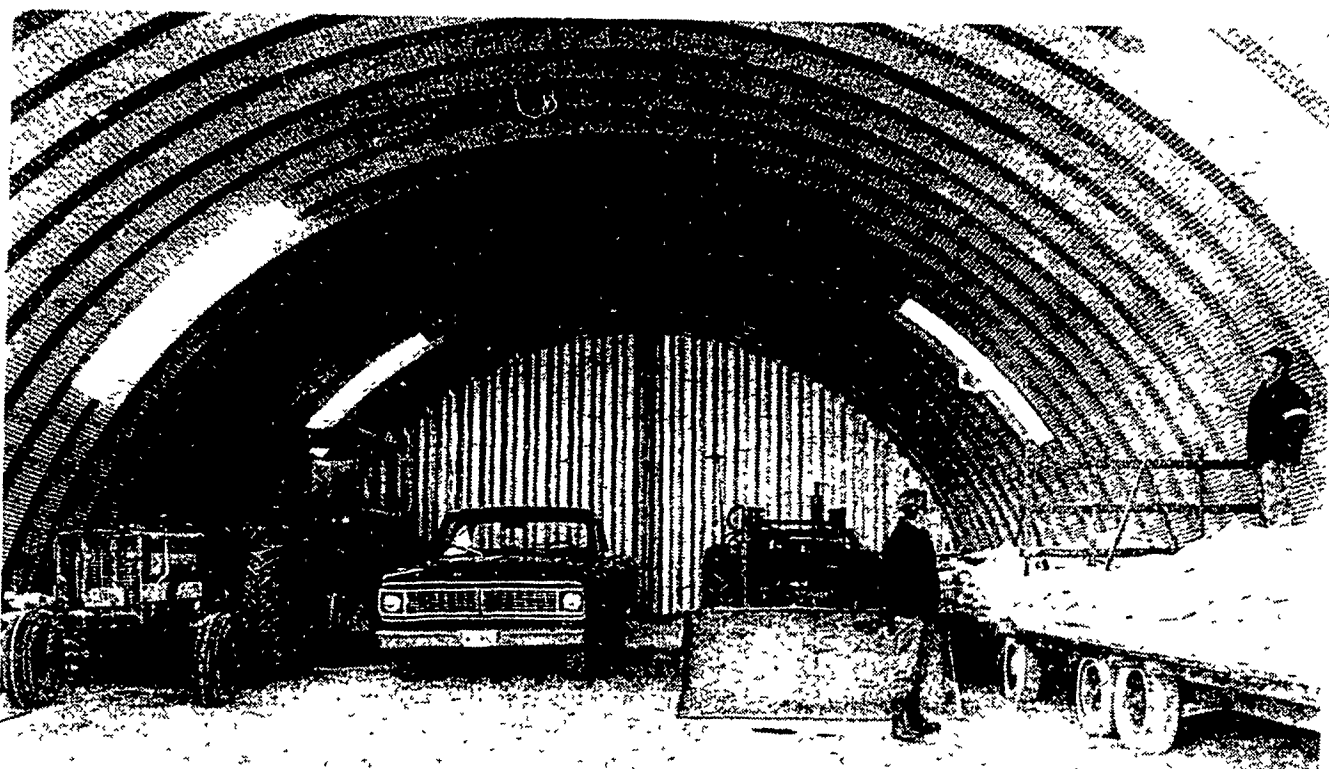

Harvest Promptly

Seventh, harvest oats promptly when ripe to reduce the chances of loss from lodging or lowered grain quality. Grain left in the field during harvesting is not worth much, and lodged crop requires more energy for harvest. Ideally, grain moisture content for storage should be 12 percent or less. Don't risk what you gain from good management by improper storage.

Pa. Guernsey holds 52nd annual convention

Russell Subject, left, purchased this Dari Fayvor daughter for the second high bid of \$2,650 at the annual Pa. Guernsey Meeting sale. Subject and Housleys F. Trixie are joined by Chuck McLaughlin, representing consignor Elesabeth Ingalls Gillet.

(Continued from Page A1)

Fava, Scenery Hill, 17,614 of milk, 748 of fat; 4-year-old fat, Barry Lehman, York, 16,662 of milk, 754 of fat; 5-years and over, milk and fat, Deborah Lehman, York 17,583 of milk, 841 of fat.

The adults took their turn at the awards table, as well. Francis and Ethel Kirk of Peach Bottom collected the honors for High Herd Milk with 15,329 of milk, 687 of fat on 113.8 cows. The Kirks also took credit for Cedar Fringed Mayda, high cow for fat with 19,784 of milk and 1,033 of fat.

K.D. and Else Linde of Oxford earned High Herd Fat honors. The Lindes' 45 Guernseys produced an average of 697 pounds of fat and 15,027 of milk.

Fre Lyn Kellogs Prince Sue, owned by Fred and Evelyn Crider, Nottingham finished top in the state for high cow milk with 23,129 pounds of milk and 1,032 pounds of fat.

Members and guests had a chance to invest in their Guernsey future during the Blue Halter Calf Sale and 52nd Annual Meeting Sale.

Walnut Lane Iris, consigned by Rodney and Darlene Stuff of Mercersburg brought a top bid of \$5,000. Wayne Fowles was last bidder on the Telestar heifer. Out of Elsvie Farms Admirals, Irene with records to 16,433 of milk and 722 of fat, the heifer is bred to Welcome Choice Admiral.

The Blue Halter Calf sale averaged \$934 on 16 head while the

Annual Meeting Sale averaged \$1,836 on 17 head.

The top selling calf, Keystone Big Tex Fanny, brought a \$1,750 bid from Russell Subject. Consigned by W.B. and V.R. Campbell of Halifax, the 6-month-old calf is sired by Co-Hill Farms TH Big Tex and out of Keystone C Farrah.

Youth Achievement and award winners at the annual Guernsey banquet include, from the left, seated, Deborah Lehman, York; Sheri Zollers, Mertztown; Racquelle Fava, Scenery Hill; standing, Brent Snider, New Enterprise; Barry Lehman, York; Wendy Kriebel, Benton; and Scott Kriebel, Benton.

Walnut Lane T Iris was the top seller at last week's 52nd Annual Meeting Sale of the Pa. Guernsey Breeders Assn. The Telestar daughter sold for \$5,000 and is bred to Choice Admiral. Joining the top heifer in the sales ring are, from the left, Rodney and Darlene Stuff, consignors; Wayne Fowles, buyer; Betsy Pereschke, PGBA Queen; and sale manager John Merryman in the box.

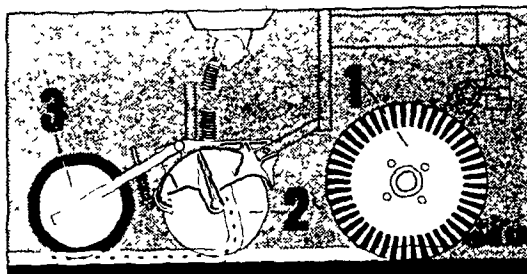

The top calf in the annual Blue Halter Calf Sale at Guernsey Annual Meeting was this six-month-old Big Tex daughter that sold for \$1,750. Keystone Big Tex Fanny is joined by consignor Roger Campbell, left, and buyer Derek Fowles.

Tobacco

(Continued from Page A1)

tobacco of their choice and in any quantity they want.

But a couple of Southern tobacco buyers had some words of advice to tobacco growers at a meeting in Leola last week.

They cautioned growers, especially new ones interested in entering the smoking leaf market, to feel their way along. They also

advised that growers of smoking tobacco should follow recommended growing practices for that leaf, which are different from Pennsylvania tobacco, including the grading of the leaf. (For more information on this meeting turn to a story on Page D8.)

While Lancaster County's smoking leaf has sold into the marketing system, Maryland

tobacco in that state will start to go to auction on Tuesday.

Poundage of tobacco in Maryland is up considerably this year. The crop now going to auction totals over 37 million pounds; while last year it stood at only 33 million pounds.

Observers of the auctions in Maryland say they are hoping for a good, strong market. But there is a question mark as to whether prices will equal last year's record high average of \$1.75 a pound.

Lancaster Farming, Saturday, March 12, 1983—A27

USDA eyes chicken kidney ban

WASHINGTON, D.C. — A U.S. Department of Agriculture proposal would require that kidneys be removed from mature chickens and turkeys after slaughter and banned for use as human food. Available evidence indicates the kidneys are adulterated because of high levels of the toxic metal cadmium, a USDA official said.

"Kidneys from mature poultry — representing in trace amounts in the less than 5 percent of all

poultry slaughtered under federal inspection — are not marketed separately and are included only in certain processed products," said Donald L. Houston, administrator of USDA's Food Safety and Inspection Service. "The other parts of mature poultry are as wholesome as those from other food animals."

Cadmium is present in trace amounts in the air, water and soil and becomes incorporated in various food products. It accumulates with age in animal and human kidneys. While a certain amount of cadmium exposure is unavoidable, a high cadmium intake is associated with kidney disease and other human health disorders. Houston said poultry kidneys are often included in mechanically deboned poultry, a product resulting from mechanically separating poultry meat from bone. Mechanically deboned poultry made with parts of poultry containing the kidneys is currently permitted for use in such products as poultry frankfurters and other poultry sausages, he said.

"USDA is working closely with the Food and Drug Administration to reduce levels of cadmium in the food supply," said Houston. "This proposal from human food."

Public comments on the proposal will be accepted until May 2. USDA is particularly interested in receiving additional scientific data on the cadmium content of mature poultry kidneys and on the effect of cadmium ingestion — from that source and from others — on the human body. Comments should be sent in duplicate to: FSIS Regulations Division, Attn: Annie Johnson, Hearing Clerk, Rm. 2637-S, USDA, Washington, D.C. 20250.

MADE IN PENNSYLVANIA!

NOW THERE'S A NEW BEST-OF-BREED IN FARM BODIES.

What you want in a farm body is rugged durability for uninterrupted service year after year.

You want it tough and big enough for any load you hand it. Simple, easy to convert quickly for grain or livestock hauling. With a finish that stands up to the weather.

Now you can have it all in Reading's new "best-of-breed" farm bodies. Without paying a premium price.

You probably already know the Reading name. We're one of the nation's largest producers of top quality service and platform bodies.

Now we've put our skills and experience to work to create farm bodies of the same high quality.

Our farm bodies are precision-engineered, built with heavy duty steels electrically welded, put together to stay together.

They're made strong. With roll-formed one-piece platform side rails interlocked with twin longitudinal and multiple cross members. All rigidly reinforced to work safely with a hydraulic hoist.

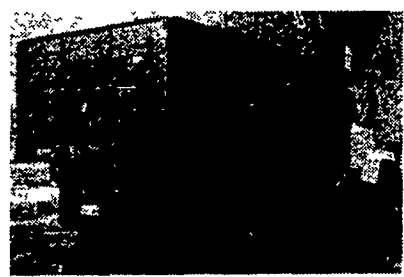

And they're farm-planned in every way to meet your individual needs. With slip-on or fold-down racks. Vented or unvented sides. Pressure treated wood or steel

platform floors. Interchangeable grain and livestock gates.

Reading farm bodies are made by Pennsylvania master craftsmen for Pennsylvania farmers. Ask your local truck dealer for them today.

Or write or call us for the name of your nearby Reading distributor.

Reading Body Works, Inc.,
P.O. Box 14, Reading, PA 19603. 215-775-3301.

SOLID OR VENTED GRAIN SIDES UP TO 52" HIGH. Inside dimensions range from 9 to 24 feet long, 90" wide. Choose standard 42" or 52" die-formed steel sides, add optional 12" solid topper panels to increase bushel capacity up to 28 per cent.

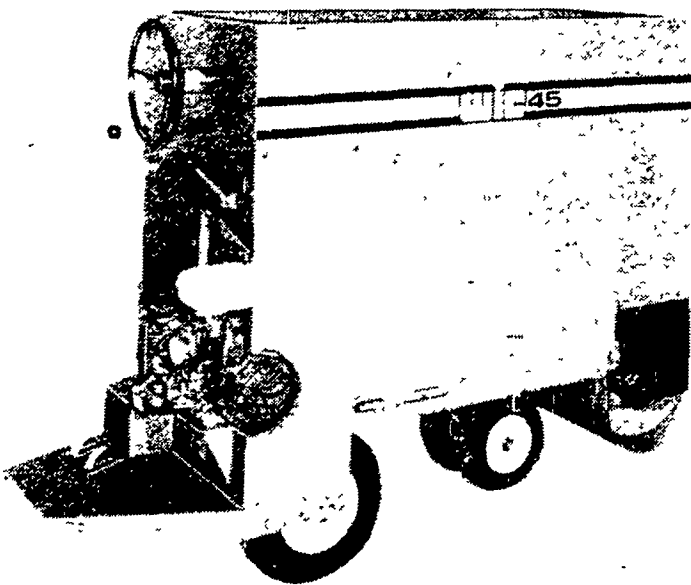

MULTIPLE GATE OPTIONS. Standard center grain metal gate opens full or half-open for fast, smooth grain flow. Full width rear vertical doors open for maximum unloading speed. All steel sliding livestock gate is pulley operated.

STATIONARY P.T.O. LIQUID MANURE PUMP for 10 Ft. Pit - Under \$5,000 LAGOON PUMP AND LIQUID MANURE TANK SPREADERS

Designed For Your Needs BUILT TO LAST

The New Silage Wagon has a hydrostatic drive and a monoshell body of high gauge steel. For use with silage, green or dry hay. Available in 3 sizes, 37, 51 and 74 bushels with 3 unloading options, one or two side and top unloading.

WIC BEDDING CHOPPER

FEATURES:

Motor	Gas: 5 HP, 7 HP, 4-stroke; Electric: 3 HP - Battery
Frame	Steel
Emptying	6' to 8'
Wheels	16" diameter pneumatic
Capacity	1-bale/minute
Dimensions	31" width - 50" length
Weight	460 lb.
Guarantee	One-year on all parts, except blades

The WIC Bedding Chopper chops straw, hay, corn & soybean fodder and spreads it uniformly under your cows whether in comfort stalls or free stalls. When you use chopped bedding you save on straw and your cows stay much cleaner.

It can also be used to chop hay for in mixers and in the manger.

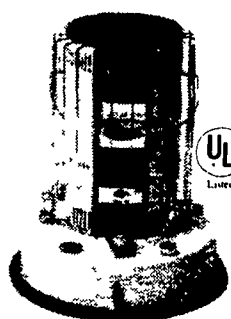

★ The only bedding chopper supplied with a mechanism permitting 3 different cutting lengths.

Quality rates high with Md. DHIC

BY TRISH WILLIAMS
SANDY COVE, Md. — The constant strive for improvement in quality of product, personnel performance, lab analysis and reporting services, was ever apparent at Tuesday's thirtieth annual meeting of the Maryland Dairy Herd Improvement Corporation held at the Morning Cheer Center.

Thirty of Maryland's best DHIC supervisors were honored for the high quality of their performance over the past year, as part of the Supervisor Incentive Program. Over 30,000 dollars was presented in individual checks to these supervisors in recognition of their efforts to test accurately, process samples quickly and increase enrollment. The high check of over 2000 dollars, incentive enough for anyone, was presented to Supervisor Wayne Gaver by President Wally Crum.

Maryland is a forerunner with its Supervisor Incentive Program, other states have looked to

Maryland's program when designing a similar program of their own. Maryland started the program because of a felt need to encourage good work by supervisors and to lower the high turnover rate they had been experiencing. Supervisors are rated on the number of years of service, the number of herds per month they test, and the number of cows they test. An evaluation is done by dairymen, the computing center and state officers, to arrive at a combined score.

President Wally Crum of Woodbine, and Secretary-Treasurer Eugene Long of Detour conducted the business meeting, reporting a sound financial situation and outlook. One of the positive changes Crum reported was the increased cooperation with West Virginia DHIA, and said he looks for a federation with West Virginia in the future.

The five states of Ohio, Indiana, Kentucky, West Virginia and Maryland have come to an

agreement that has put a mobile meter calibration van in operation. "The van is being operated as a division of Ohio Ag Services, with members of each of the five states as an advisory group", said Long. The van came to Maryland in February, all meters in use for DHI in the state have already been checked and approved. May will be 'meter month' for 1984 in Maryland.

Long also warned producer members that the visible identification rule will be strictly enforced. Those not complying with the rule will have unofficial records for one year.

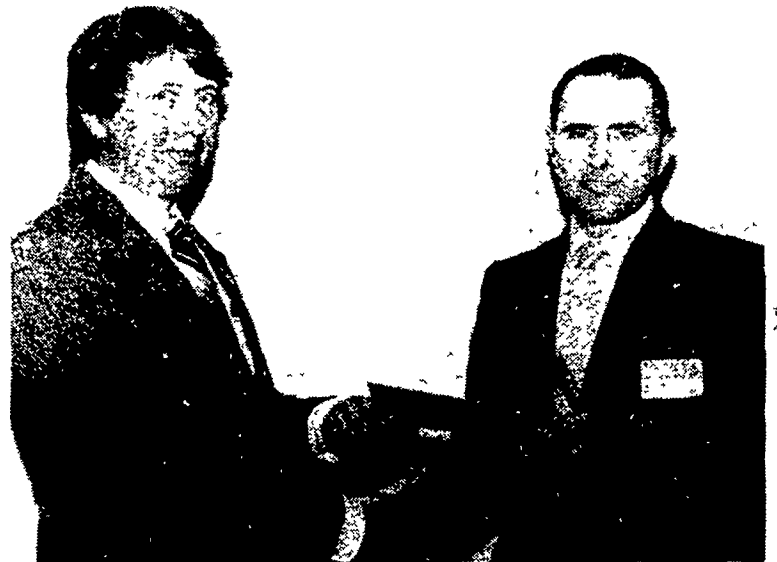

An approved research project to be conducted by Maryland DHIC was announced by Extension Dairyman J. Lee Majeskie. The project will study the effect various methods of handling and processing have on milk samples to determine which method is best. DHI members throughout the nation stand to benefit from this

research that will be privately funded.

Majeskie claims, "DHI can help dairymen through critical times. If there is a reduction in the milk price by 50 cents or one dollar per hundredweight, it is even more critical for dairymen to be on DHI test and use and understand their

records." Workshops are presently being planned for specialist to review with members how to best make use of their DHI records, the workshops will be conducted at the county level.

Two guest speakers addressed
 (Turn to Page A32)

Md. DHIC President Wally Crum, left, presents Supervisor Wayne Gaver with the top-check of \$2,090 as part of the Supervisor Incentive Program.

Annual Jersey meeting/banquet opens Friday

CHAMBERSBURG — The Pennsylvania's Jersey Cattle Club will hold its annual meeting, awards banquet, and calf sale next Friday and Saturday at the Holiday Inn, Exit 5, I-81, Chambersburg.

District II members will be on hand Friday evening, to welcome all to the festivities beginning at 7:30 p.m. with the annual Jersey Queen Contest. Contestants will be interviewed and asked to speak about their own Jerseys and their contributions and dedication to Jerseys, 4-H, and their community.

The winning junior will be an-

nounced at the awards banquet the following day and will be crowned by the outgoing queen, Anna Uhlman, of Chester County. The duties of the new queen will be to represent the Jersey Club at all shows and functions in the coming year and will be eligible to compete in the national contest for the title of Jersey Jug Queen in Louisville, Ky., in November.

Next Saturday morning after "breakfast on your own", District II members welcome visitors to tour their farms and look over their Jerseys while waiting for the Annual Calf Sale scheduled for

10:00 a.m. at the farm of Paul Gsell, 1 mile south of Shippenburg, on Rt. 11. The calf sale will highlight 14 well-bred calves just right for showing to be sold to the highest bidder. Sale catalogs are available by request from Susan Dietrich, Rt. 1, Box 229, Newburg, Pa. 17240, or call (717) 423-6758.

Following the sale, there will be a luncheon buffet at the Holiday Inn. Reservations are needed by Monday. Call or write Ruth Martin, 3962 Guilford Springs Rd., Chambersburg, Pa. 17201, or (717) 375-4367.

The annual meeting of the PJCC will follow the luncheon with the presentation of the Youth Awards -

the Robert Olmstead and Fetherhoff Trophies, the 1st year 4-H and Scrapbook Awards, and the announcement of the 1983 Pa. Jersey Queen. The Distinguished Service Award will highlight the awards presentation and production and protein awards will also be presented to the high herds in the state.

H. Duane Norman, Research Geneticist with the United States Department of Agriculture, will speak on the subject: "Young Sires and the Jersey Breed," following the awards presentations. Norman, originally from Normandell Jersey Farm in Liberty, Tioga County, is primarily responsible for development of the "Modified

Contemporary Comparison" (MCC), the sire evaluation procedure used in the United States for estimating transmitting abilities for milk and fat yields. He is also responsible for developing the USDA-DHIA Milk Components Sire Summary. He developed Sire Summaries and Cow Indexes for type. His procedures are currently used to calculate the official breed conformation ratings for sires and cows of the Ayrshire, Guernsey, Jersey, Brown Swiss, and Milking Shorthorn breeds.

For more information on the program call Florence Robinson, Secretary, PJCC, 9269 Mentzer Gap Rd., Waynesboro, Pa. 17268, Phone: (717) 762-3380.

Chairman is no. 1 TPI sire

TUNKHANNOCK — The line-up of Holstein A.I. proven bulls from Sire Power is stronger than ever. Highlighting the summaries, 9H584 Cal-Clark Board CHAIRMAN continues to be one of the elite sires in the A.I. industry. CHAIRMAN increased his PDM to +2438 and increased his HFA Type Summary to +1.96. This new information gives him a TPI of +737, and CHAIRMAN remains the highest TPI bull in the Holstein industry. CHAIRMAN's credentials combined with a +\$289 Profitability figure makes him a great addition to any dairyman's breeding program.

Sire Power's Young Sire Sampling and Development (GOLD) Program continues to yield outstanding results. There are eight new bulls added to the proven line-up of which six were graduates of the GOLD Program. One graduate, 9H616 Oak-Hill ranch LIBERTY had an outstanding proof of +2041m-.16% +49f +\$223, and +0.35 on his HFA Type Summary. LIBERTY ranks fourth according to dollar value on the line-up. LIBERTY is a Milu son out of a high producing Kingpin daughter. Three other graduates had production proof over +1700 PDM and are all plus on type. Graduating with an excellent HFA Type Summary was 9H622 STEWART with a +1.77 PDT. STEWART is a Job son out of an Excellent Elevation daughter.

The eight bulls added to the Sire Power line-up have Predicted Difference Averages of +1657m -

.10% +\$188 with 62% repeatability. Their Predicted Difference for Type averages is +.55 with 57% repeatability.

A breeder proven bull, 9H786 MAR-BIL Glendell Master, entered service and has a Predicted Difference figure of +1463m-.07% +42f +\$172 with 45% repeatability. This combined with his PD Type of +1.21, will make him a Popular new sire.

Sire Power's +2000 pound milk club now includes 4 bulls. They are: 9H548 CHAIRMAN (+2438m), 9H625 STARFIRE (+2082m), 9H616 LIBERTY (+2041m), and 9H107 JETSTREAM (+2104).

The top 9 milk bulls average +2023 PD milk and are Plus on Type; 11 bulls are over +\$200 Profitability; 14 bulls are over +1.00 PD Type; and 8 bulls are Plus on test. These figures combined with the superior selection criteria has resulted in the continual rise of pedigree indexes which offers outstanding production, test, and functional type throughout the Sire Power line-up.

HERD Always An Energy Saver...

...SAVES FUEL & MAN HOURS

HERD has what you need to cut your energy use. Both fuel and physical energy are saved with **HERD** broadcasters. **HERD** also has a mini-hopper so you can spread both small seeds as clover and alfalfa and oats at the same time doing two jobs in one fast trip and with no strips. Cover up to 40 acres per hour. With **HERD**'s ability to center the spread you can use **HERD** broadcasters for all types of seeds, fertilizers, herbicides, and insecticides with an even pattern guaranteed. **HERD** has 7 sizes to choose from from 77 lbs to 2440 lbs or 12 bu to 32 bu 3-pt electric or V-belt driven so you can get the one of your choice.

The GT-77 (shown right) has been promoted from a garden tractor/seeder (shown) to a farm seeder. Many are putting this seeder on ATVs 3-wheel Motor Bikes with flotation tires and an assortment of vehicles to get the seeding done when ground is wet and soft. Why not have fun while doing your seeding?

producers and interested people.

The beef evaluation results were presented by showing slides of the live animals and corresponding slides of the carcass with the official measurements given. There were 42 contestants in the contest. The junior winner was Julie Myers, Wellsville. The adult winners were: 1st, Bill Holloway, York; 2. place, Jim Eisenhour, Wellsville; 3. Walter Laird, Dover; 4. Tim Livingston, Dover; and 5. Eddie Rohrbaugh, Seven Valleys.

Mr. and Mrs. Charles Sunday were presented the plaque for the cattlemen of the year. Sunday is a steer feeder in York and is very active in the Cattlemen's Association and is chairman of the Feeder Calf Sale conducted by the Association. Directors were elected to the Association. Speakers for the program were Tirk Laidlow from Moyer Packing Company and Bill Myers from North Penn Hide Company.

John Hausner, president, presents Cattlemen of Year Award plaque to Charles and June Sunday.

Md. tobacco auctions open Tuesday

BY DICK ANGLESTEIN
LANCASTER — With quotas soundly turned down in Pennsylvania and Maryland, Lancaster County tobacco growers can proceed with their traditional celebration of St. Patty's Day this coming week by putting in their seedbeds.

In Lancaster County, 733 growers voted against quotas in last week's referendum and 153 voted in favor. Across the state's seven tobacco growing counties, including Lancaster, the overall vote was 788 against quotas and 167 in favor.

In Maryland, the equally lop-

sided rejection of quotas showed 1,935 votes against and 145 in favor.

A two-thirds vote in favor would have been needed in either state for the quotas to pass.

Interest was higher in the Lancaster County referendum this year due to the surplus of Penn-

sylvania tobacco. Approximately 200 more growers voted this year than did three years ago and the percentage of "yes" votes was higher.

Local growers also had a stake in the Maryland voting due to the increased interest in growing smoking tobacco leaf in Lancaster County. All of the smoking tobacco leaf has been sold this year; while quite a few farmers are still holding one or even two years of Pennsylvania tobacco in their sheds.

The turndown of the quotas in both Pennsylvania and Maryland means that Lancaster County growers are free to grow the tobacco of their choice and in any quantity they want.

But a couple of Southern tobacco buyers had some words of advice to tobacco growers at a meeting in Leola last week.

They cautioned growers, especially new ones interested in

entering the smoking leaf market, to feel their way along. They also advised that growers of smoking tobacco should follow recommended growing practices for that leaf, which are different from Pennsylvania tobacco, including the grading of the leaf. (For more information on this meeting turn to a story on Page D8.)

While Lancaster County's smoking leaf has sold into the marketing system, Maryland tobacco in that state will start to go to auction on Tuesday.

Poundage of tobacco in Maryland is up considerably this year. The crop now going to auction totals over 37 million pounds; while last year it stood at only 33 million pounds.

Observers of the auctions in Maryland say they are hoping for a good, strong market. But there is a question mark as to whether prices will equal last year's record high average of \$1.75 a pound.

Md. DHIC

(Continued from Page A28)
the group in the afternoon session. Dr. Robert R. Peters, University of Maryland dairy specialist, spoke on the somatic cell program. A new national system for recording somatic cell counts has been developed, DHI-Provo moved to this system on December 20, 1982. The NCDHIP Policy Board has adopted a ten point scale, each one point increase on the scale represents approximately a loss of production of 400 lbs per lactation or 1.4 lbs per day. "In the past dairymen have not given enough importance to SCC, said Roberts, in economic terms the lost production is important."

A new report, the Somatic Cell Summary can be requested by placing a "7" in the extra management reports box on the herd barn sheet. Roberts said this report provides herd summaries

on several different basis, such as stage of lactation, month of calving, production level and others. Roberts claims this allows the dairymen to more easily identify the stress factors that are causing high somatic cell counts.

The last speaker of the day was Dr. George Grambling, national DHIA quality certification coordinator. A constant push for improvement in quality and standards by which to judge quality

has lead NDHIA to develop the Quality Certification Service program (QCS). The objectives of QCS are to increase the quality of service to the membership and to set minimum standards of performance. According to Grambling, there are three phases to QCS; evaluation of field services, evaluation of labs, and evaluation of the Dairy Record Processing Center. The timetable Grambling gave for QCS is as follows: 1983 - state DHIA's gear up for QCS, 1984 - evaluation of state DHIA's, 1985 - certification of qualifying state DHIA's, those not qualifying will be provisional.

Jersey enthusiast is Berks correspondent

CENTERPORT — The new Berks County correspondent for Lancaster Farming, Robin Phillips lives on a Jersey farm one mile outside of Centerport on the Bernville Road, in Centre Township.

Although never directly involved in farming until the purchase of the farm, she has been around agriculture all her life. From

riding and training ponies and spending time on her grandparents farm, to her family owning a feed mill business, she grew up with horses and steers.

She graduated with honors from Schuylkill Valley High School and attended Penn State Berks Campus before starting work as a veterinary assistant to Dr. Robert C. Dreisbach, veterinarian with a

large and small animal clinic and dairy farm at R3, Hamburg.

In 1973 she married David L. Phillips, of R1, Mohrsville and four years later realized her lifelong dream of owning a farm when they purchased a "dilapidated" operation.

Her husband was raised on a Holstein dairy farm and often promised himself that once off the farm, he would never milk cows again. But with his wife's assistance, they proceeded to build their farm into an efficient dairy operation.

Having been exposed to Jersey cattle in the seven years that she worked for Dr. Dreisbach, Mrs. Phillips convinced her husband that Jerseys were the way to go.

Today, they milk 50 registered Jerseys of their own and just recently started milking 20 Holsteins for a friend until he is able to purchase a farm. On their farm, known as Irish Creek Jerseys, Mrs. Phillips manages the cattle and her husband takes care of the crops and finances.

"I always considered myself lucky to marry a farmer and a builder," Robin explains as she credits her husband with making her dreams come true.

Although she appreciates a good cow of any breed, her love and admiration for the efficient Jersey cow continues to grow.

Her husband often jokes, "If you ever want Robin's undivided attention, you must either look like a Jersey or talk about them."

"Because of their excellent disposition, ease of handling, and the quality product that they produce, I don't see why anyone would want to milk anything else," Robin concludes.

A member of Bellemans

Robin Phillips, new Lancaster Farming correspondent in Berks County, with one of her favorite Jerseys.

Lutheran Church and the Advertising Chairman for the Pennsylvania Jersey Cattle Club, her hobbies include sewing, embroidery, needlework, and playing piano. Her favorite pastimes are attending Jersey functions and sales and buying cows, and playing

with her two daughters, Amy, 6, and Laura, 3.

She expressed enjoyment in writing for Lancaster Farming because she gets to meet more of her favorite kind of people - people involved in agriculture.

New staff members

(Continued from Page A1)

tercollegiate contest. She also served as farm tours chairman for school tours to the U of D research farm, and is a member of Alpha Zeta, a professional agricultural fraternity.

Ms. Williams was the recipient of two scholarships at the U of D - the Delaware State Grange Scholarship and a Southern States Scholarship. As part of a U of D sponsored program, directed by Dr. George Haenlein, Delaware dairy specialist, she studied agriculture in Austria for one semester in Vienna.

While attending Delaware, Ms. Williams worked full time to pay for her education. She worked one year on the U of D research farm with the dairy herd. During her last year and after graduating from Delaware, she worked for ICI Americas for two years in toxicology research, testing developmental drugs for safety evaluation.

"Working in a lab offered many advantages, including the opportunity to apply what I had learned in my animal science courses," she explained.

"But I always longed to be outside, and wanted to get back

into agriculture. I decided to pursue my desire to serve in the agricultural community as a link between research and production. That's when I left ICI to attend Penn State."

She prides organizational work as one of her strong suits. Prior to going away to graduate school she served as a 4-H leader.

"I came up through the 4-H system and profited from adults who willingly shared their time and knowledge with me, and who set high standards to follow," Trish recalled. "I wanted to give a little of myself in return."

As a 4-H member she won many awards and held many offices. She was a member of the 1972 Delaware Dairy Judging Team competing in the National 4-H Contest and taking top honors in the Guernsey breed. Since that time she has coached county 4-H teams and judged local shows.

When asked: What do you think of your new job? Trish smiled readily and exclaimed, "It's great. I'm doing what I always wanted to do, keeping abreast of new developments in agriculture and working with my favorite people, farmers."

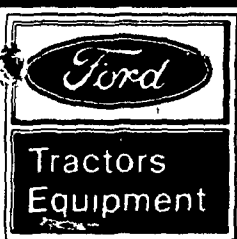

Schuylkill fruit meeting March 22

NEW RINGGOLD — The Schuylkill County Winter Fruit Growers meeting will be held on Tuesday, March 22, from 9:30 a.m. to 3:00 p.m. at the New Ringgold Fire Hall.

Speakers for the meeting will be George Greene, Associate Professor of Plant Pomology, Penn State; Robert Tetrault, Penn State Extension Entomologist; James Travis, Extension Pathologist and Kay Swartz, Pennsylvania Apple Marketing Board. The topics to be discussed will include an update in insect

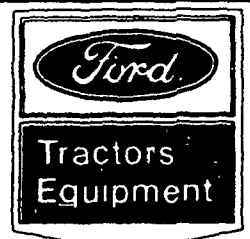

problems in the orchards, methods of controlling bitter pit and cork spot, root pruning, peach tree canker problems and their control, and a slide presentation entitled "Apple Instead."

All fruit growers are invited to attend this meeting sponsored by the Schuylkill County Cooperative Extension Service. For additional information contact George P. Perry, Jr., County Agent - Horticulture, Schuylkill County Cooperative Extension Service, P.O. Box 250, Schuylkill Haven, PA 17972.

Pa. Forage-Dairy Day seeks exhibitors

Dairymen: mark your calendar for July 19

HERSHEY — Dairymen across Pennsylvania can mark their calendars for a new and informative event that's designed to sharpen their feeding skills. The date to mark is Tuesday, July 19.

"Pennsylvania Forage and Dairy Day," as the event is called, will concentrate on forage production, handling, and feeding. Organizers of the one-day activities envision a variety of educational exhibits ranging from actual field demonstrations, crop comparisons, nutrient analysis, feed values, DHIA record-keeping, and much more.

The Pennsylvania Holstein Association and Pennsylvania Forage and Grassland Council are at the forefront of organizing the unique event. Co-chairmen are John Rodgers, of Plum Bottom Farm, Reedsville; and Al Dugan,

Red Rose Alliance

to meet Thursday

BLUE BALL — The Red Rose Alliance, Inc. will hold a general meeting on Thursday at 7:30 p.m. at the Blue Ball Fire Hall.

Discussing the subject of recycling will be guest speaker, Richard Brown, president of Lancaster Environmental Action Federation.

of the Milton Hershey School Farms, Hershey. John Baylor, recently retired agronomist from Penn State, serves on the organizing committee in an ex-officio capacity. Other members of the organizing committee include:

Richard Adams, dairy nutritionist at Penn State; Nelson Gotwalt from the ag communications department at Penn State; Richard Hann, supervisor of the Milton Hershey School Farms; Joe Hartle, Centre County dairyman; Richard Hill from the U.S. Regional Pasture Research Laboratory at Penn State; John

Itle, representing the seed industry; Dieter Krieg, Farmshine editor; Bill Nichol, executive secretary of the Pennsylvania Holstein Association; Ray Pruss from the DHIA office at Penn State; John Shenk, noted research agronomist who specializes in forage analysis at Penn State; Bill Stringer, Centre County dairyman and agronomist; and Albert Vigilante, from the Milton Hershey School Farms.

Organizers of "Pennsylvania Forage and Dairy Day" emphasize that the event will in no way conflict or compete with Ag

Progress Days, the annual ag extravaganza that attracts tens of thousands of visitors to Penn State's research farm during August. Forage and Dairy Day will concentrate on educational exhibits and demonstrations designed to make dairymen more aware of the potential of forages. The purpose is to make forage production more efficient while bringing utilization close to optimum levels. The day's activities will follow forages "from field to cow."

Forages will be harvested during the day, analyzed at the site and

then fed to a cow. Predictions, equations, etc. will be discussed during the demonstration, planners say.

Numerous other demonstrations will be going on throughout the day which visitors can examine at their leisure. All activities will relate closely to feeding and production.

Firms and organizations which are closely allied to forage production and feeding are invited to participate in this new event. To inquire about exhibit spaces, contact John C. Itle, 962 Rayme Drive, Lancaster, Pa. 17601. Phone: (717) 898-8690.

1st Poultry Progress Day attracts 200

BY DEBBIE KOONTZ

LANCASTER — The first day-long Lancaster County Poultry Progress program attracted almost 200 people to the Farm and Home Center, Thursday, to represent this county's \$167 million industry.

From poultry financing to pest control, from ventilation equipment to the dreaded Marek's disease, the agenda included such highlights and more as Secretary of Agriculture Penrose Hallowell and State Senator Noah Wenger delivered the latest in agricultural legislation from Harrisburg.

Presenting an update on the "Right to Farm Act," Wenger told

the audience that the bill was intended to "give assurance to farmers that they would not be forced out of business before they had a chance to pay their loan or to make it in farming."

The bill states that ordinances cannot be passed after its adoption which put restrictions on a farmer's operation practices.

"But people then questioned, what about constitutionality? Can you really keep people from bringing suits against farmers?" Wenger elaborated.

"To my knowledge no one has really brought any suits against farmers," he said. "When it comes to the matter of public health, we

have to be careful that farmers don't use this as an excuse to run a sloppy operation." He cited one example of a person who contacted him about a farmer spreading hog manure so close and in such concentration by his home, that it was coming through in his basement.

Noah W. Wenger
State Senator

Carl Brown
General Manager,
Farm Credit Assn.

In financing, Carl Brown, general manager of Farm Credit Association, assured the audience of their desire to work with the poultry industry.

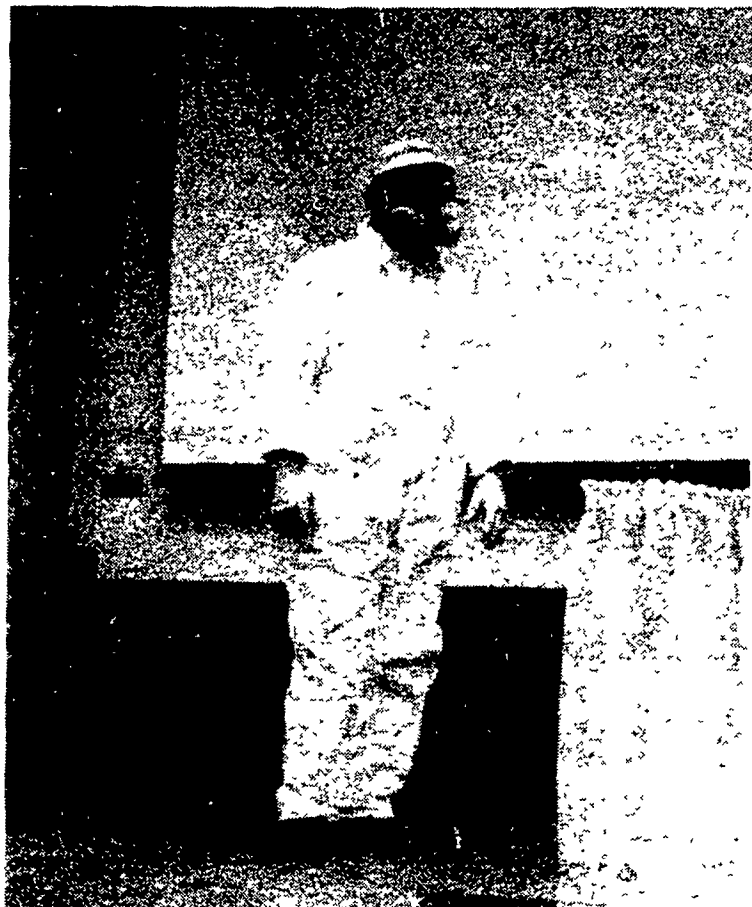

In retrospect, Brown noted several examples of management moves made in the past that are now "haunting" poultry producers. Chief among these is that "poultry houses were being built with the idea that this would be a cure-all for all financial problems. I haven't seen one that

has done that yet. I think some loans were made that way."

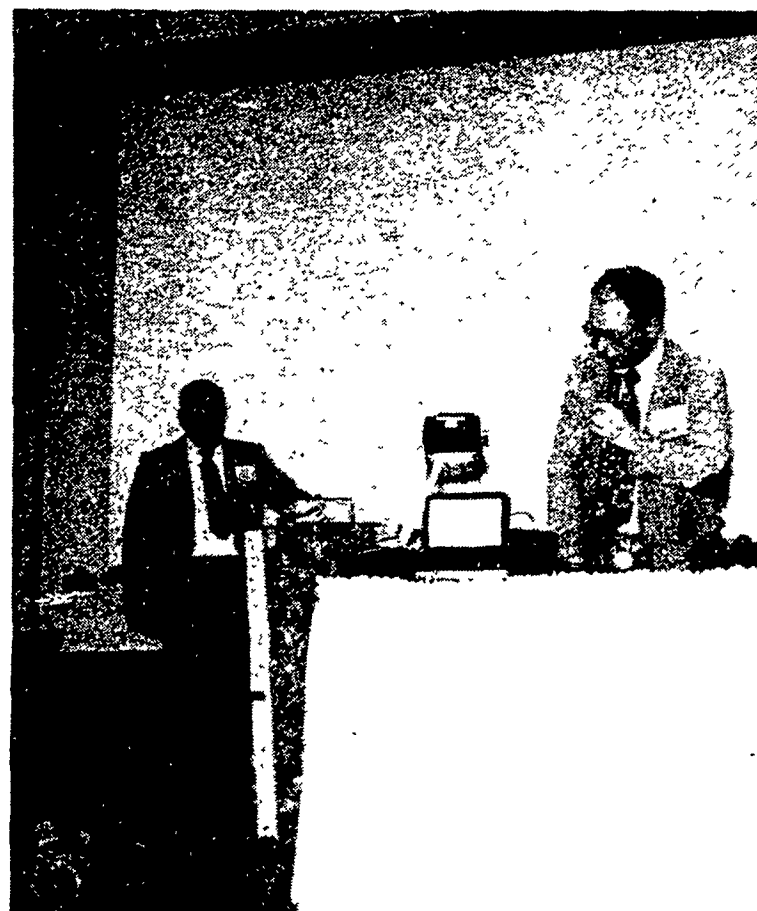

Poultry pests and their control was discussed by Clarence Collison from Penn State Extension. Citing three beetles which cause extensive structural damage to poultry houses, Collison said, "As with all operations, the best control is sanitation."

Of the three beetles, (the Lesser Mealworm, the Hide Beetle, and the Larder Beetle), the lesser

(Turn to Page A38)

Poultry Specialist Forest Muir, from Penn State Extension, donned this gear to help Extension agent Jay Irwin demonstrate proper clothing for applying pesticides. Take note of the boots and gloves as well as the suit and goggles.

Forest Muir, left, and Robert Graves, engineer, right, demonstrated ventilation equipment, helping the audience draw their own conclusions as to which systems are most efficient.

FARM COMPUTER SEMINAR

Topics to be discussed:

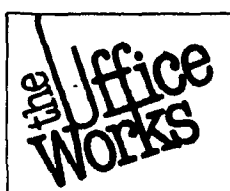

- What can a computer do for me on my farm?
- How do I decide which computer to buy?
- How much will it cost?
- How do I learn how to operate it?

Plus demonstrations and operation of farm programs

Seminar will be a "hands-on" seminar, with the participants operating the computers. Wives are encouraged to attend. Apple computers will be used in seminar.

Cost Per Person... \$50.00; or \$75.00... For Husband & Wife, Lunch included. Call now for reservations. Maximum number of persons per session is 20.

Butler County Agent reports on heifer survey

By Sylvia Cooper
Staff Correspondent

WEST MIDDLESEX — The 1983 Dairy Day, held at the West Middlesex Sheraton Inn on Monday saw many farmers departing their farms for the day to listen to several speakers and view dealer displays.

As part of the days program, the Wilmington Area FFA demonstrated the construction of a counter-clope heifer barn. The group placed first at the Pa. Farm Show for the demonstration. When the demonstration was finished, the FFA'ers had constructed a scale model barn that spread across the stage. The demonstration featured the procedure of construction, as well as the advantages of building such a structure.

The four-member team is made up of two seniors, Rusty Davis and Rich Bruner and two juniors, Tom Garrett and Rob Ratvasky. Davis lives on a dairy farm at Plaingrove and Ratvasky comes from a dairy

farm near Pulaski. Bruner and Garrett both work on dairy farms near New Wilmington. Their advisor is David L. Ward.

A well-known dairy specialist from Canada, Harold Clapp, discussed heifer nutrition, housing, health care and economics. Clapp said that Canadian heifers were averaging 32 to 34 months of age at calving and that the ideal is 24 months. It may cost as much as three to five dollars per day to keep heifers beyond two years of age.

Clapp cited reasons for freshening heifers at 24 months. Some of these included an increase in the genetic gain; decrease in rearing costs; the ability to cull at a younger age; more dairyness in younger heifers and increased conception rate in younger heifers.

In order to freshen heifers at two years of age, Clapp said that they have to be of good size.

"Size," he said, "is two dimensional. It is weight but also stature. More attention should be given to stature because we don't need short round heifers."

Clapp advised the use of a heifer growth chart which uses both weight and stature to determine growth for each month of the heifer's life. A heifer that is below average in stature should be below average in weight and vice versa. Clapp said that in his opinion stature is a more important factor than weight.

Clapp suggested placing heifers in groups of four to six with plenty of extra feeding space. There should be enough room for exercise and all animals should be identified so that daily checking for heat and other health problems is simplified. Housing should be dry and clean with good air. Scours and pneumonia should be minimized. Clapp said that genetics plays a lesser role than proper nutrition, management, housing and health care.

Butler County Extension Agent, Robert Rugaber has been involved along with several other surrounding counties in surveying heifers. Heifers were measured by the farmers themselves and information relayed back to the county agents. In the end, one of the largest surveys in the country

had been conducted with 212 herds participating and over 2,500 heifers measured in all.

Rugaber said that the data was arranged into groups of excellent, above average, average, below average and poor. Of the heifers measured, 51 percent were below average and 37 percent were poor.

He stated that poor growth of some of the heifers was due to the concentrates being fed, not the liquid portion of the diet. Rugaber advised the use of as much high quality forage as possible. He also recommended freezing colostrum of older cows because it contains more antibodies than a younger cow's.

In conclusion, Rugaber said that lots of heifers suffer from lack of attention. They are easily forgotten until it comes time to put them into the herd. By that time it is difficult to get good performance from them.

Joe McCurdy, Ag Engineer from Penn State, used a model of two farms on one electrical system to demonstrate the problem of stray voltage. By this method, he demonstrated that some stray voltage can come from a neighboring farm.

According to McCurdy, an increase in electrical demands on the farm may cause an imbalance in the system or an overload. The result may be stray voltage. Cows are most exposed when milk is flowing through the milk line because it provides a direct link between the cow and the electrical system.

McCurdy said that the cow is super sensitive, up to ten times more responsive than a human being. Anything over one volt will cause an immediate response. McCurdy recommended the use of a good meter to check every object the cow comes in contact with.

Cows may react to stray voltage in differing ways, he said. They may be nervous, reluctant to enter the parlor, have an uneven milkout, require longer milking time, drink less and production may decrease due to mastitis.

McCurdy said that if you suspect stray voltage is a problem, check the entire farm system for unbalanced lines, poor connections, switch corrosion, frayed insulation and faulty equipment. If this fails to correct the problem, the power company should be consulted.

Recipe available for lawn

NEWARK, Del. — Lawns do much to enhance the environment and require very little in return.

"Lawns are part of nature's air conditioning system," says University of Delaware Extension turf specialist William Mitchell. "They hold soil in place so it won't wash away and pollute streams. They keep dust from blowing into the house. They absorb noise and make a neighborhood a quieter place to live. And they're much nicer to look at than bare, dry dirt."

Unfortunately, not everyone has a nice lawn. Homeowners who would like to start a new one or improve an old one will find much valuable information in an extension publication Mitchell has prepared. Called "A Recipe for

Successful Lawns," it tells how to establish a new lawn, gives recommended turfgrasses and mixtures, seeding dates and methods, and even tells how to prepare a minimum tillage seedbed where erosion is a problem or tillage equipment is unavailable.

The publication also has advice on fertilizer practices and liming, tells how to use grass clippings as a nutrient source, and discusses the benefits of slow release fertilizers vs. those making all the nitrogen available at once. There is also a section on weed control.

Homeowners interested in obtaining a copy of this informative booklet should contact the county Extension office in Newark (302) 738-2506.

Top-selling heifer, Glen Valley Astronaut Tutti was bought by Clair High, left, Middlebrook Farm manager, Quarryville. Kenneth Umble, Glen Valley Farm, Atglen, consigned Tutti.

Relief sale nets \$80,000 for world's needy

BY TRISH WILLIAMS

LANCASTER — The true spirit of helping a fellow man in need is still alive and doing well, thanks to groups like the Mennonite Central Committee, of Akron.

The MCC's Third Annual Pennsylvania Relief Heifer Sale held Thursday at the Guernsey Sales Pavilion netted an estimated \$80,000 for the world's needy.

The sale has grown each year since its beginning five years ago. The first year no heifers were sold and donated straw, hay and implements brought in \$1800. The next year income from the sale doubled. In 1981, MCC held the first World Relief Heifer Sale, bringing in \$80,000. MCC through its diligent efforts has maintained a sale in-

come during the past two years despite hard economic times for the farmers who consign and buy the heifers. The 1982 sale grossed \$85,000; this year's sale fell slightly to \$80,000.

A total of 100 heifers were sold Thursday, all Holsteins and most registered, with a few nice grades. Most of those donated came from Lancaster and Chester Counties, with the remainder coming from adjacent counties, said Wilmer Kraybill, sale manager. Some of the breeds most popular bulls were represented, including: Jemini, Arlinda Cinnamon, Molly Chief, Marvex, Elevation, Astronaut, Pabst, Electric, Sexation, Kenny, Chairman, Triple Threat and others.

The top-selling heifer Glen Valley Astronaut Tutti brought \$1625. Tutti was consigned by Kenneth M. Umble, Glen Valley Farm, Rt 1 Atglen. The buyer was Steven O. Sirota, Middlebrook Farm, Quarryville. Tutti is sired by Paclamar Astronaut and her dam is Glen Valley Marvex Tonya, a three year old.

The sale attracted over 140 serious buyers and many spectators, who bought and consumed food that was donated. After the heifer sale, semen was sold from the following sires: Very, Metore, Dream Street Fast Buck, Spirit, Valiant, East Star, Arrow. Also

(Continued from Page A35)

mealworm, known as the darkling beetle, causes not only structural damage to beams and bracing, but has proven to be vectors and reservoirs for several poultry disease pathogens.

According to Collison, "the adults and larvae of all three species are very active and commonly found in poultry litter and manure. Leaky water fountains, excessive grain, broken eggs, and dead birds encourage infestations.

"The lesser mealworm feeds on damp, moldy grain and is commonly associated with spilled poultry feeds. Both the larder beetle and the hide beetle are scavengers, feeding on stored animal and plant products," he said.

"Achieving adequate control is difficult since thorough cleaning of the houses does not occur regularly. Once the houses become infested, thorough cleaning along with chemical control seems to only suppress the population for a

short period of time. Adults migrate throughout the structure during cleaning and are found in cracks and crevices, insulation, eaves, etc. which increases the difficulty of achieving adequate control," he explained.

Ventilation systems were addressed by Forest Muir and Bob Graves, both from Penn State Extension. They advised that, generally, greater efficiency comes from large fans, two capacitor motors, lower nameplate amps and smaller motors.

Dr. Spangler Klopp, Inter-Continental Biologics, Inc., and Barrett Cowen, Wiley Laboratory at Penn State, joined the program discussing the Marek's and Gumboro problems in poultry.

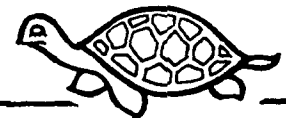

Jay Irwin, Lancaster County Extension agent, informed the audience that a 12 1/2 minute slide presentation on the Lancaster County's poultry industry is available for school functions and other programs by contacting him at the Extension office, 394-6851.

sold were donations of hay, straw, firewood, and seed corn.

The MCC will direct the \$80,000 raised to its World Relief Program which sends emergency shipments

of food, medical supplies and bedding to the world's most needy people, according to Lowell Detweiler, director of MCC's regional office.

Auctioneers were Robt. E. & Jeffrey R. Martin and Frank L. Steller.

PIK data planned March 22

WASHINGTON, D.C. — The U.S. Department of Agriculture's Statistical Reporting Service will issue a special report Tuesday, March 22, at 3 p.m. detailing farmers' sign-up in the 1983 acreage reduction and payment-in-kind programs.

According to agency administrator William E. Kibler, the report will include data on the number of farms with base acreages and the number of farms enrolled, as well as total base crop acreage and the number of acres enrolled for feed grains, rice, wheat and upland cotton. He said the release will carry both national and state totals for each of the four program commodities.

Data, which will cover

all states except Hawaii (but which will include Puerto Rico), will be summarized from raw sign-up figures channeled from county offices of USDA's Agricultural Stabilization and Conservation to Statistical Reporting Service state offices and tabulated under security at USDA's Washington headquarters.

The special report also will provide state and national data on each of the program signups: acreage reduction, 10-30 percent PIK and whole farm PIK.

Farmers must participate in the previously announced reduced-acreage and paid-diversion programs to be eligible for program benefits such

as Commodity Credit Corporation loans and purchases, PIK and target price protection. For wheat and feed grain producers, participation is also required to be eligible to enter the farmer-owned grain reserve.

The report also will indicate the percent of farms and base acreage enrolled, the acres required for conservation use, the base acreage of participating farms and total permitted acreage by states.

Because of the sensitivity of the enrollment and acreage data, the report will be released from the Statistical Reporting Service's lockup facility following the close of commodity markets.

FEEDER SALES "Cattle & Pigs"

We've got a reputation of selling clean, local home raised cattle at these sales. Farmers come here from all over the Tri-State area to buy or sell. Plan to market your cattle in these widely advertised sales.

Demand for pigs is also good at these sales since many farmers who feed cattle also feed pigs.

Schedule of Special Sales - Wednesdays

Mar. 16	Mar. 30	Apr. 13
Apr. 27	May 11

Young Cooperators Couple earns honors together

By Beth Hemminger
Staff Correspondent

When it comes to honors, Stanley and Janice Burkholder have a trunk full.

The Burkholders are this year's Maryland and Virginia Young Cooperators and the first vice-president of the organization. But according to the young cooperator couple, this didn't happen overnight.

"It first started," said Janice, "When we were encouraged to enter the competition by our family, friends and our co-op."

Once the decision was made to enter, Stanley and Janice had to fill out numerous forms about the improvements they had done on the farm, as well as their participation in community activities. They were judged on this material and a 10-to 15-minute interview and impromptu questions asked by the judges during the Young Cooperative Convention.

At the Young Cooperator convention last June, Stanley and Janice - along with many other couples from Maryland and Virginia, and couples from Interstate, Capital, and Dairyman - competed within their own co-op for the award.

The most enjoyable part of the convention for this couple, they said, was the interaction with other young farming couples who are facing the same problems and concerns.

Janice remarked, "We have learned so much about our milk cooperative in the past year, it is mind boggling, and," she added, "very beneficial for us. The young cooperative program is a learning experience in every way."

A portion of this learning experience has come from attending the Maryland-Virginia Board of Directors meetings. This is a responsibility the Young Cooperative couple attained upon

winning the award. Since June, Stanley and Janice have been traveling once a month to the Maryland-Virginia main office in Arlington, Virginia and participating in the meetings. And Janice remarked, "We were made to feel a welcome part of the group."

Stanley and Janice have both noted that from these meetings they have learned the intricate working of a co-op.

"We realize the boundaries the board works within and the problems faced by them," Janice said. Janice said she is happy that this year there has been an emphasis placed on couple involvement in the program and that she has learned a great deal about the financial aspects of a co-op which has helped her in her responsibilities at home as the bookkeeper.

Stanley added, "I am glad Janice is at the board meetings with me because she can learn more by being there. She knows as much about our farming business as I do and should be involved in everything pertaining to our business."

Stanley further remarked that, at these meetings, everyone learns how strong or how weak his/her cooperative is. And he emphasized, "I am glad to know Maryland-Virginia is very strong."

As the young cooperators of Maryland-Virginia, the Burkholders have been invited to many cooperative banquets to tell about their experiences as young cooperators and encourage other young farming couples between the ages of 18 and 35 to enter the competition.

Along with their speaking engagements, another major responsibility Stanley and Janice tackled was to attend the National Milk Producers Federation con-

Here's is a cow's eye view of the Burkholder Farm owned by Stanley and Janice Burkholder, in Chambersburg Franklin County. Currently, Stanley farms in partnership with his father.

Homestead Notes

vention representing their co-op. At this convention, the Chambersburg farming couple was elected the first vice-president of the National Young Cooperator Organization. With this nomination the couple will represent the entire southeastern area of the United States on the national planning board for the Young Cooperators.

It is quite unusual for a freshman couple to be elected into this official capacity immediately under the president according to the Federation.

"However," said Janice, "we were encouraged to run for the office by Maryland-Virginia and they were very proud when we won. Usually the officials of the organization are elected during their second year attending the National Milk Convention."

Janice added, "Our experience at the National Milk Convention was definitely a learning and enjoyable one. We are grateful that we had the opportunity to work with young dairymen from numerous cooperatives around the United States. Now we can communicate with all the other cooperatives that we have met at the convention and work together to solve problems such as support pricing."

Stanley and Janice have developed lasting friendships with young couples in the program.

The couple's responsibilities didn't end at the convention, however. They are presently planning the program for the Young Cooperators contest that will be held in Arlington, this year. Janice remarked, "We are looking forward to an exciting, fun-filled three days for the competitors of this year's competition."

This young couple is in a 50 percent partnership operation with Stanley's parents.

The partnership was developed in 1972 with Stanley and Janice

owning half interest in the cattle and machinery. At that time, the father and son team farmed 250 acres, of which the partnership owned 100 acres. Then in 1979, the Burkholder partnership purchased a second farm of 90 acres.

Stanley stated that over the years his father has slowly stepped out of the management role giving him the opportunity to gradually learn all he needed to about operating a successful business. Last year, Stanley and Janice purchased the farm where they live and Janice took over the

bookkeeping responsibilities for the partnership. Stanley said that he is glad Janice was the business bookkeeper because of the time and know-how involved in that step of the business. Janice added that she enjoys every minute of it and is happy to be a real working member of the partnership.

Since the partnership began, Stanley and Janice have increased the herd from 65 milking head to 130 with a 100 percent registered herd and nearly 100 head of replacement heifers. The partnership is now farming 400 acres.

Other changes at the Burkholder farm have been the recent installation of a computerized feeding system with a screen located in the office area where the feeding process can be monitored at all times. The Burkholders are field testing their system and report that the overall results have been good. Stanley said he feels the computerized feeding system is a benefit to any farmer who wants to get the most out of his feed for each individual animal.

The Burkholders' two children, Janell, 9, and Clinton, 7, are also eager to get into the farming business on a small scale by joining a local 4-H dairy club in a year or two.

This year's Young Cooperators of Maryland-Virginia Co-op and recently elected first vice-president of the National Young Cooperator Organization, are Stanley and Janice Burkholder of Chambersburg with their children Janell and Clinton.

Chester, Delaware plan Ladies Day Out program

GUTHRIESVILLE — Members of the Chester/Delaware Farmer's Association will hold its annual spring banquet at the Guthriesville Fire Hall, on Tuesday, March 22, at 7 p.m.

Richard Breckbill, Oxford, Chairman, said that legislators and local officials have been invited to attend. Carl Riehl, Russellville, a 15-year-old prodigy, will provide the entertainment on violin and piano.

Farmer's Association members and others wanting to attend should make reservations by next Saturday by calling Association Directors.

The Chester/Delaware Farmer's Association is affiliated with the Pennsylvania Farmer's Association and the American Farm Bureau Federation. Its local, state and national policy is

developed from the grass roots through kitchen conferences, policy development meetings and the adoption of policy at county, state and national meetings.

Among state policy recommendations are: (1) that state owned land be considered for toxic waste disposal before private property; (2) that local municipalities and PennDOT be compelled to divert road runoff according to SCS recommendations in order to avoid erosion and/or crop damage; (3) that we oppose the designation of streams, rivers, lakes and wilderness areas for wild and scenic areas; (4) that articles in magazines and documentaries on T.V. against pesticides be documented with proof rather than opinion; and (5) that the importance of agriculture be taught in the elementary grades.

For the avid gardener

Asparagus

Do you relish fresh asparagus in spring but can never afford all you'd like to serve your family? Why not beat the high prices of store-bought asparagus by growing your own? It's easier than you think, and a planting, once established, provides tasty spears every spring for as long as 20 years.

The fastest way to get asparagus into production, according to Ted Torrey, Burpee vegetable research manager and home gardener, is by planting healthy, one-year-old roots. Sometimes you can make a light cutting the second year after roots are set out, more the third year, and an ample harvest from then on. (This is about two years faster than planting asparagus from seed.)

Mary Washington is a time-tested asparagus variety that produces thick, straight, dark green spears tinged slightly purple at the tips. The flavor is delicious and the yield heavy and dependable. Plants are resistant to asparagus rust.

In recent years, hybrid varieties of asparagus have been introduced, and Brocks Imperial is outstanding. The extra-strong plants start producing shoots earlier in spring than other varieties and also keep on longer

into early summer. Spears are extremely thick and heavy, yet stay tender and tasty. They are an eye-appealing medium green with less purple tinge than Mary Washington.

Asparagus will be producing in your garden for a generation or more. The best place to plant it is in a sunny bed at the north or west side of your vegetable garden, where it won't be disturbed or shade other vegetables. The feathery, fern-like foliage that follows the harvest season grows 4 to 6 feet high and makes an attractive background or can screen an unsightly view.

If you don't have a vegetable garden, you can still enjoy home-grown asparagus. Plant it along a fence. You'll be picking succulent spears in spring, and later the attractive green tops will soften the severity of the fence. You can also plant a row of asparagus at the rear of a sunny flower border, but you'll need to leave a little access room to reach and pick the shoots in spring. After the harvest period, the tall foliage will enhance the beauty of the flowers growing in front of it.

Whatever the location, you need to prepare the soil well for your long-term asparagus crop. Its success over the years depends a great deal on initial soil conditions

and fertility. First of all, soil drainage must be good. Asparagus cannot stand "wet feet" very long after a heavy rain. Try to choose a place without this problem, or correct it by incorporating sand or cinders in early spring, as soon as the ground is workable. Next, dig the soil to a depth of 8 inches or more and remove stones. Work in generous amounts of compost, peat moss or well-rotted manure; also add a balanced vegetable fertilizer according to soil test recommendations or manufacturer's directions. At the same time, add ground limestone if your soil tests lower than pH 6.0 on the acidity-alkalinity scale. Asparagus thrives in neutral to slightly acid soil.

Now you're ready to plant asparagus roots. Allow about a dozen for each member of your

family to have enough asparagus during the harvest season to serve a couple of times a week, with some overage for guests or to freeze.

Spread out the roots, octopus fashion, as far as they will go. Cover them with 3 to 4 inches of fine soil. Fill in the trenches gradually, as the shoots grow. Water deeply if the soil is very dry.

It's very important to control weeds during the growing season, especially the first few years when the asparagus planting is getting established. A pre-emergence weed killer can be used in early spring; check with your local county agricultural agent for latest recommendations.

For the rest of the season, cultivate the asparagus bed shallowly and often to remove weeds while they're small. Be careful not to damage the spreading asparagus roots or emerging shoots. A better and easier method of weed control is to

midsummer, apply a balanced garden fertilizer to the asparagus planting. Water deeply during long dry spells. In late fall, when the tops of the plants have turned brown, cut them off at ground level and add them to your compost pile. In areas with severe winters, mulch the asparagus planting with well-rotted manure, hay peat moss or compost after the ground has frozen.

Do not cut any asparagus the first season the roots are set out and none the second, unless the shoots are at least 1/2 inch in diameter. If they are this thick, then you can pick and savor asparagus from your garden a few times, but don't overdo it. The plants still need to make as much top growth as possible to become fully productive for the rest of their long life. The third year, you can expect to harvest asparagus for about 4 weeks. After that, the asparagus season will last for about 6-8 weeks, from midspring until diminishing spear diameter indicates it's time to stop picking and let the top growth develop.

Spears should be 7 to 10 inches long at harvest time and you can either cut or snap them off at ground level. Use them as soon as possible after picking or store them for a short time in plastic bags in your refrigerator. To serve, steam spears until tender and drizzle with melted butter or hollandaise sauce. Use leftovers in soup, casseroles or cold in salads. Also remember to freeze excess asparagus. It will taste extra good "fresh" next winter.

use a mulch (covering over the ground) of straw, salt hay, wood chips or some other organic material; the mulch must be loose enough to allow asparagus shoots to emerge, yet will smother or shade out sprouting weeds. These materials also benefit growth by adding humus to the soil as they decompose.

Guard Against Garage Sale Goofs
Spring is coming and so is the time to move the car out and move the old clothes and other goods in. It's garage-sale time. Garage and yard sales can be wonderful ways to stretch the clothing budget, but they must be approached carefully to be truly economical.

The first step to successful buying at these sales is to plan before you even leave the house. Measure yourself and the clothing you have that fits well. Carry these measurements and a tape measure along with you to the sale so you'll be able to check fit accurately. Also, make a list of what everyone in the family needs — then stick to that list. Impulse buying, even when buying bargains, is uneconomical if nobody needs or wants the bargain.

When you find an article of clothing you need, ask yourself some questions before you buy:

— Will you be able to wear it with something else?

— Is it expensive to clean and take care of? Check the care instructions.

— Does the garment show signs of wear? If it's too worn, it may not be worth the money.

— Are the fibers of the cloth worn at the knees, elbows, crotch, cuffs, collars or hem folds?

— Are there ripped or pulled out seams or other tears?

— Are there stains? Check especially under the arms.

— If the garment is a sweater or furry garment, is it pillled or matted?

— Are there burn holes in the fabric or holes in the pockets?

— Are there ripped buttonholes, alterations that might cause strain on the fabric, worn linings or collars and lapels that stick up?

— Are the plaids unmatched, hems visible, or zippers not flat or hard to work?

When buying footwear at garage sales, be careful. Shoes and boots usually shape themselves to one owner's foot and may not fit another's. Try them on. If you buy a garment that needs altering, make sure the time you spend altering is worth it. Sewing on buttons, hemming a skirt or repairing a seam usually doesn't take a lot of effort. But if the garment does not fit quite right and major alterations to the shoulders or bust line must be done, the effort could be too great. Replacing zippers may also cause problems.

Careful planning and shopping at garage sales can make the experience a happy and economical one.

Be A Sensible Consumer

Concerned about food prices - if so become a sensible shopper.

One way to be a sensible shopper is to compare the prices of store brands or generic brands of products with those of name brands. Often smart shoppers will find that the generic or store brands cost less.

Sensible consumers also shop only for what they need. They follow their shopping lists made up from planned menus adjusting for store specials and do not buy on impulse. They compare products they have coupons for with those that they don't to see if the coupons are really saving them money.

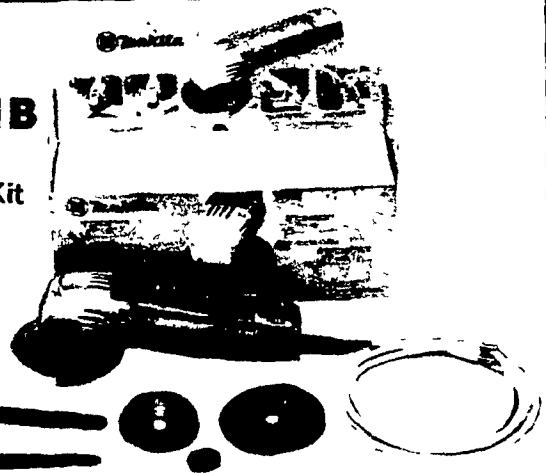

Being a sensible consumer also means buying foods correctly. For fruits and vegetables, a sensible consumer compares the different forms to see which is cheaper — fresh, canned or frozen. Often when the fruit or vegetable is in season and the supplies are good, the fresh form is the best buy. Certain vegetables like onions, carrots and potatoes are available fresh year round.

Home On The Range

What can I bake today?

Rainy days and slightly dropping temperatures seemed reason enough to offer recipes for baking one week earlier than planned. You can find spring's favorite dishes next week.

When the rain beats a cadence on the rooftop and the puddles form just outside your door, that's the time to stay safe and dry inside creating masterpieces in your kitchen.

Let the kitchen be your studio and the food your paint as you demonstrate your talent to your family with a delicious, warm dish fresh from the oven. Try some of these favorites:

FRESH APPLE DEEP-DISH PIE

3 T. quick-cooking tapioca
3/4 c. granulated sugar
1/3 c. firmly packed brown sugar
1 t. cinnamon
1/2 t. nutmeg
1/4 t. salt
10 c. thinly sliced peeled fresh apples
1/3 c. raisins
1/2 c. water
2 T. butter
pastry for one-crust 8-inch pie
1 egg yolk
1 t. water

Combine tapioca, sugars, spices, salt, apples, raisins, and 1/2 c. water in 2-quart shallow baking dish. Dot with butter and let stand 15 minutes. Meanwhile, roll pastry 1/8 inch thick. Cut several 2-inch slits or a fancy design near the center. Fold pastry in half or roll loosely on rolling pin; center on

filling. Open slits with a knife to permit escape of steam.

Trim pastry, allowing it to extend 1/2 inch over rim. Fold pastry over edge of dish and press to rim. Roll pastry scraps and cut into shapes, if desired; moisten on bottom, place on crust. Combine egg yolk and 1 t. water; brush over crust. Bake at 425 degrees for 45 minutes, or until syrup boils with heavy bubbles that do not burst. Serve warm.

General Foods, White Plains, N.Y.

CHEWY OATMEAL COOKIES

1 1/2 c. butter
3 c. brown sugar
4 eggs
2 t. cinnamon
2 c. flour
1 t. salt
1/2 t. nutmeg
1 1/2 t. soda
2 t. vanilla
4 c. quick oats
Cream butter, sugar, and eggs. Add other ingredients as given. Filling:
1 beaten egg white
2 c. powdered sugar
1 t. vanilla
1 1/2 c. Crisco
Put filling between 2 cookies.

Esther Zook, Belleville

PEANUT BUTTER BARS

1 1/4 stick butter
1 c. peanut butter
1 c. brown sugar
2 c. white sugar
1/2 t. salt
3 eggs
2 c. flour

Gather your apples and bake a deep-dish apple and raisin pie for a deserving family. Quick-cooking tapioca thickens the mixture and allows the fresh apple flavor to come through. It's so easy to mix all ingredients in a baking dish and bake in the same container.

Cook's Question Corner

QUESTION — Do your readers have any recipes for a pumpkin cookie that looks and tastes like a small pumpkin pie?

Donna Lencoski
Latrobe, Pa.

QUESTION — Do any of your readers know the secret for getting a thick pie filling? I have tried following recipes with flour or cornstarch added and they never come out thick like a store-bought pie or pie filling from a can. Do you add tapioca or sure-gell, or cook the pie filling first? Can anyone help?

Jean Entriken
West Chester, Pa.

Recipe Topics

March	
19	Spring's favorites, and yours
26	Favorite desserts
April	
2	Dishes for Easter
9	The incredible, edible egg
16	April showers bring chicken

2 t. baking powder
2 t. vanilla
3/4 c. coconut

Cream butter, peanut butter and sugars. Add eggs one at a time. Add salt and vanilla. Mix in dry ingredients. Fold in coconut. Spread in 9x13 pan. (Thinner around edges than in center.) Bake at 350 degrees for 15-20 minutes. Cool. Cut into bars.

Patricia Layton,
Federalsburg, Md.

BAKED PINEAPPLE

20 oz. crushed pineapple
3 eggs, beaten
3/4 c. sugar
1/4 lb. butter or margarine
5 slices cubed bread
Melt butter, stir in cubed bread. Mix together pineapple, eggs, and sugar. Add to bread mixture. Pour into 8x8 baking dish. Bake at 325 degrees for one hour. This is usually served with ham.

Patricia Layton,
Federalsburg, Md.

PLANTATION MARBLE CAKE

2 c. flour
1/2 c. oleo or butter
3/4 c. milk
1 c. sugar
1 t. vanilla
2 t. baking powder
2 eggs
Mix all above very well. Put half of batter into 8-inch greased loaf

pan. To balance of batter add:

1 t. cinnamon
1/2 t. nutmeg
2 T. honey

Pour on top of first batter and cut with knife to swirl. Bake at 350 degrees for 50 minutes.

This batter is almost like a pound cake and was supposed to have come from an old Southern plantation approximately 100 years ago.

Donna Lencoski, Latrobe, Pa.

Cushion the brittle sounds of rain with something fresh from the oven ... something like this Italian Biscuit Ring. It is simply convenient for you to spread seasoned, sweet cream butter on refrigerated big buttermilk biscuits while the zesty, robust flavor of this herb, pull-apart bread warms your family's appetites.

It's not paying a feed company double for commercial starter.
It's paying yourself to make one pigs like better.

Charity starts at home — with a BottomLine™ Swine Starter pre-mix.

A freshly-ground BottomLine ration is not only the best way to make sure baby pigs eat and gain fast — but is also the best way to make sure you are the one getting paid for a job well done. So pay yourself by beginning with good, energy-rich grain, mixing in the prescribed amount of soybean meal (or another natural protein), and balancing the ration with a Vigortone BottomLine Swine Starter pre-mix. That's a way way to cut half of the out-of-pocket portion out of your costs — and a way to cut middlemen out of the profit that's waiting for your family.

See your Vigortone dealer today.

Ida's Notebook

Ida Risser

Our home has been a bit livelier the last few days as Cindy was home from college for ten days. The telephone rang more often and the car went up our lane frequently. There were appointments to keep and places to go. She visited her sister Judy, who just returned from a business trip to California. And, as she has applied for several scholarships, she had to go to another county for an interview.

Sleeping late and then helping me were a welcome change for her demanding studies in the engineering field. One day we baked pies, raisin bread and cookies and then of course ate too many desserts. Another day we cleaned up the garden and burned the old tea plants as I have two large beds of various kinds. She also picked up the stones that I lay in the tomato bed to keep the

plastic bags from blowing away. They always do a good job of holding down the weeds.

She was ambitious enough to shampoo my livingroom rug for me as it is light colored and shows the dirt. It wasn't the kind of vacation that or oldest daughter just had but it was definitely a change of pace from college life.

Nancy and her family just returned from a February vacation in Hawaii. She has a two and one half-year-old boy and he changed their usual sightseeing schedule to one of swimming and sun bathing. They had suffered from flu and pneumonia in Seattle this winter and she tells me that the sunshine and 80 degree weather did wonders for their health.

One of these days we too will have summer weather again.

Order No. 4 prices

ALEXANDRIA, Va. — The Order 4 Class I milk price for March 1983 is \$15.40 per hundredweight.

This price is unchanged from February's price and is 7 cents higher than last March's Class I price, according to market administrator Joseph Shine.

The Class II milk price for January 1983 was \$12.67 per hundredweight and the butterfat differential was 16.9 cents. The January Class II milk price is 3

cents lower than December 1982, and the butterfat differential dropped one-tenth of a cent.

These prices are based on the January 1983 Minnesota - Wisconsin manufacturing milk price of \$12.62 per hundredweight at a 3.5 percent butterfat content.

The USDA reported that the wholesale price of Grade A butter at Chicago for January was \$1.4725 per pound and the nonfat dry milk price was \$.9419 per pound, f.o.b. plants in the Chicago area.

What can I bake?

(Continued from Page B6)

ITALIAN BISCUIT RING

1/3 c. sweet cream butter, softened
1 t. Italian herb seasoning
1/8 t. garlic powder
2 pkg. refrigerated buttermilk biscuits

Heat oven to 400 degrees. In small bowl combine all ingredients except biscuits; stir to blend. Spread one side of each biscuit with slightly less than 1 t. seasoned butter. Place biscuits on edge in 9-inch baking pan, forming a ring. Bake 20 to 25 minutes or until biscuits are deep golden brown. Let stand 5 minutes to absorb

butter. Remove from pan. Makes 20 biscuits.

CHEESEBURGER CASSEROLE

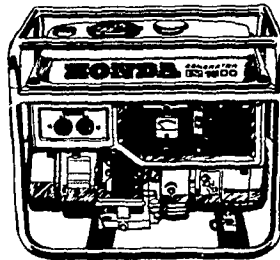

8 slices day-old bread, toasted
1 lb. ground beef
1/2 c. chopped onion
1/4 c. chopped celery
1/3 c. catsup
4 t. Dijon-style mustard
1 t. salt
4 slices Cheddar cheese, cut into 2 triangles, each
1 c. milk
1 egg, beaten
1/4 t. dry mustard
1/8 t. pepper

Preheat oven to 350 degrees. Butter both sides of toast; set aside. Cook beef, onion and celery in skillet over medium heat until beef is browned and crumbly; drain-off excess fat. Stir in catsup, mustard and salt. Layer 4 slices toast, half of the ground beef mixture and 4 triangles of cheese in a buttered 8-inch square baking dish. Repeat layers, omitting top layer of cheese. Combine milk, egg, dry mustard and pepper. Pour over casserole. Bake until hot and bubbly, about 35 minutes. Remove from oven and place remaining cheese on top. Let stand 5 minutes to allow cheese to melt.

BROCK GRAIN BINS

THE MOST NEW FEATURES IN MORE NEW MODELS

Over 300 models in dual purpose and commercial bins 15' through 90' diameters. New or improved features — from the large fill hole that allows greater air flow, down to the anchoring brackets that hold the bin walls securely. Engineered, manufactured and warehoused in our plants with careful supervision. Quality is further increased by the prime, high grade steel used in all bins. All these features combine to make a handsome, safe bin that makes your facility more attractive while increasing your profits.

Giant
Fill
Hole
Gives greater air flow with out additional openings. Rigid 24" diameter center ring makes mounting of accessories easy.

Roof
Rib
Brock's high rise rib with the step down design combines with a 35° pitch to give more strength with minimum weight. All roof panels are one piece construction to eliminate leaks and speed erection.

Chester/Del. Farmers Assn. plans banquet

WEST CHESTER — Non-farm women are invited to attend Ladies Day Out, a luncheon session on March 17 at the Upper Octoraro Presbyterian Church, Parkesburg, Denise Wilkinson, chairman of the Chester/Delaware Farmer's

Association Women's Committee announced this week.

"This will be a chance for urban and suburban women to get to know their farm counterparts, learn more about county government, learn techniques for tracking down historic farms and buildings and enjoy a fashion show Wilkinson said.

"Reservations should be made by March 12 with members of the Women's Committee. They are: Denise Wilkinson, (215) 274-8171; Dorothy Bartels, West Grove, (215) 869-2126; and Dawn Kulp, Pottstown, (215) 322-2409.

Robert Thompson, chairman of the Chester County Commissioners will discuss the responsibilities of elected county officials.

Jane Davidson, director of Historic Preservation in Chester County will review the qualifications for listing a farm or building in the national register. (Participants should bring questions and dates that farm buildings were constructed.)

The fashion show will feature creations from the 410 Shoppe in Avondale. Farmer's Association women will participate as models for the showing. They will also be

the hosts for the program.

Wilkinson urged urban and suburban women to attend the get-together. "Farm women would

appreciate the opportunity to meet with and exchange experiences with the non-farm women," she said.

Extension strategy

WASHINGTON, D.C.

— After a year's study, a national committee today recommended that Secretary of Agriculture John R. Block and other leaders in the nation's

**informal education
network strive to:**

— Boost educational programs in production technology, farm and home management, and marketing strategies for U.S. farmers, ranchers and their families. Cooperative Extension Services nationwide provide these services in cooperation with the U.S. Department of Agriculture.

— Maintain Extension Service agricultural programs as a major thrust of the total extension effort, as programs supporting the food and fiber system will be equally as important in the future as they were in the past.

— Increase the translation of research results into computer software packages and make these accessible to family farms, agribusiness, marketing institutions, families and communities.

Entitled "Extension in the 80's," the report culminated the work of the special committee, which had been set up to guide the future mission, scope, priorities and policies of the nationwide informal education system.

Among other recommendations are:

— Increased application of management technology to improve land use decisions and the production and management of both renewable resources and those which cannot be renewed.

— Continue through home economics and family living programs to help individuals and families identify their needs, conserve their resources and achieve desired levels of living.

— Maintain emphasis on 4-H youth education programs; strengthen access of all rural and urban youth to these programs, regardless of economic status; and, work to increase involvement of the private sector by volunteers and financial support sources.

— Reexamine and strengthen Extension Service linkages with other USDA and federal agencies, as Extension's function within USDA calls for a flow of information from those agencies to the nationwide Cooperative Extension Service system for relay to the public.

— Maintain research as the base for Extension's major educational and information efforts, with additional support made available for applied research and demonstrations.

Chester sheep talks Wednesday

COATESVILLE — The 1983 Chester County Sheep Producers Seminar will be held on Wednesday beginning at 7 p.m. at the Central Chester County Vocational Technical School in Coatesville. This year's program features two outstanding individuals working in the sheep industry. Claire Engle, Penn State sheep

specialist, will speak on the Lambing Ewe, an indepth coverage of the management aspects of the lambing season. Helen Acland, assistant professor of pathology at the University of Pennsylvania, will speak on Perinatal Lamb Mortality. Dr. Acland, a native of Australia and Chief of

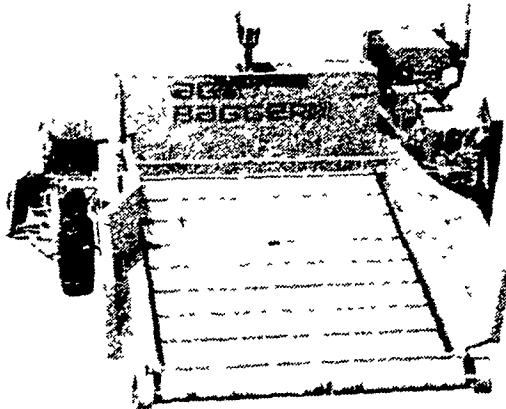

Large Animal Pathology at New Bolton Center, is known world wide for her work in lamb mortality and for discovering Hairy Shaker Lamb Disease prevalent in the western part of the United States. The meeting is open to all Chester County producers and those in surrounding counties.

Teach yourself calligraphy

Despite the advent of typewriters, word processors and data terminals, calligraphy has survived the centuries.

There is still no way to duplicate the beauty of handwritten invitations, certificates, place cards, greeting cards, canister labels, posters, documents and special correspondence.

According to the dictionary, calligraphy means beautiful handwriting. In practice, it is an art form that conveys a message.

Calligraphy is distinguished by thick and thin strokes, curves, flourishes, plumes and genuinely elegant letters. With a flatnibbed pen and a steady hand, nearly everyone can learn the art.

In the Far East, calligraphy is as highly revered as painting or sculpture. In the Western world, calligraphy was at first reserved for writing the Scriptures.

By the 15th century, Europeans had already begun using calligraphy for their personal correspondence. According to "Teach Yourself Calligraphy," by Ellen Korn, (William Morrow & Co. Publishers), Leonardo da Vinci wrote his personal letters and papers in a calligraphic hand.

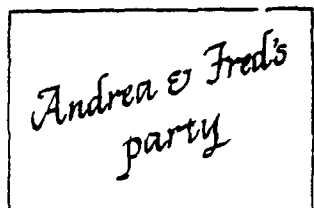

Korn's book shows how anyone can learn calligraphy through simple exercises. Her projects

include labels, address books, book plates, place mats, bookmarks, stationery, gift tags, greeting cards and the invitations below.

Here are directions for teaching yourself calligraphy:

MATERIALS: Black, chisel-tip felt marker or fountain pen, with a 1/16-inch nib; pencil; paper; ruler.

ITALIC GUIDE SHEET: 1. Rule lines on paper, 1/2 inch apart, alternating two solid lines with one dotted line. 2. As an alternative, purchase an italic guide sheet at an art supply shop, or trace a guide sheet from a calligraphy book.

CALLIGRAPHY PRACTICE: 1. Holding your chisel tip marker or pen at a 45 degree angle, draw an X. 2. If your X is correct, it will have one thick line and one thin line. If not, try again. 3. Practice writing other letters on your page. Either copy the letters illustrated, another calligraphic alphabet, or invent your own letters.

CALLIGRAPHY DIRECTIONS: 1. Using italic guide sheet, draw lower case letters between solid lines. 2. Extend your capitals up to the dotted line. 3. Do not twist the pen as you write. 4. Use a light, even touch. 5. Check your pen regularly to make sure it remains at a 45 degree angle. 6. Slant all your letters at the same angle. 7. Keep letters close together; words evenly spaced.

Wayne Co. to hold tractor safety programs

HONESDALE — Wayne County Extension plans to begin their tractor safety program on Wednesday, March 16 at the Wayne Co. Extension Office, here.

The purpose of this 4-H program is to stress safe operation of farm

tractors and equipment, and to learn how to properly make routine tractor maintenance and safety checks. Also, 4-H'ers between the ages of 14 and 16 will receive a certificate stating that they have successfully completed the requirements of the program and are eligible to work on farms this summer.

A total of five 4-H club meetings will be held with two at local farm equipment and tractor dealerships: Holbert's Farm Equipment and Marshall Machinery, Inc.

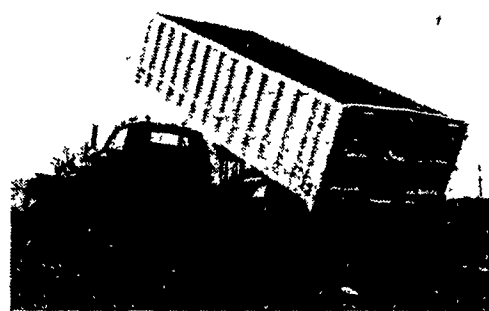

If any youth is interested in the program, contact the Wayne Co. Extension office at 253-5970, Ext. 114.

PARTY INVITATIONS: 1. Either buy or make foldover notes with matching envelopes. 2. Draw guidelines on notes with a pencil and ruler. 3. Using the same size guidelines, write message on scrap paper. 4. Draw a decorative border inside and outside the notes. 5. Write message on invitations. 6. Erase remaining pencil lines.

Lancaster Co. Society 1

Lancaster Farm Women 1 met at the Farm and Home Center on Saturday, March 5 to entertain Society 27 and the county farm women officers.

Joyce Bupp, staff correspondent

Lancaster Co. Society 5

Lancaster Society 5 met on Saturday, Feb. 26 at the Calvary Homes and featured a skit entitled "Unnamed Women of the Bible."

Lancaster Co. Society 26

Lancaster Society 26 met at the home of Dorothy Hess, recently, for a white elephant sale. The members will entertain the

for Lancaster Farming newspaper, entertained the group.

The next meeting will be held Saturday, April 9 at the home of Margaret Bucher.

The next meeting will be held at the home of Mrs. Paul Stern of Manheim, on March 26.

county officers and Society 19 at the East Fairview Church of the Brethren on Thursday, April 28.

Lancaster Co.

Society 28

Lancaster Society 28 met at the home of Ruth Book of Lancaster recently to hear speaker Kathy Young discussing dressing with color.

Society 28's next meeting will include a one pound auction and a candlewicking class at the home of Brenda Book.

Berks Co. Society 4

Berks Society 4 met at the home of Charlotte Mauger of Bechtlesville.

Members are planning to attend the 15th anniversary of the Shartlesville Grange Hall on April 26.

The evening's entertainment consisted of slides and presentations about the Salvation Army.

The next meeting, scheduled for the home of Esther Sheeler, will include a cakeless cake sale.

Fulton Grange 66

Fulton Grange 66 met on Monday, Feb. 28 at the Oakryn Hall in Lancaster.

The Grange announced their family-style turkey supper will be held April 9. Tickets will be \$5 for adults and \$2.50 for children.

Members voted to donate \$25 to the Lancaster County IFYE program for a 4-H'er to visit Trinidad.

The next meeting will be held March 14 and will include a session on estate planning.

ADA/DC names communications director

SYRACUSE, N.Y. — Ralph L. Lindsey, Jr., executive vice president of the American Dairy Association and Dairy Council announces the appointment of Christine Siebold as director of communications. ADA/DC is a milk promotion association funded and directed by dairy farmers of New York State and the Federal Order 2 portions of New Jersey and Pennsylvania.

As communications director, Ms. Siebold will be responsible for relating the promotional efforts of the ADA/DC to dairy producers and assisting ADA/DC staff with their communication needs.

Ms. Siebold recently completed graduate work at Syracuse University's S.I. Newhouse School of Public Communications, receiving a master's degree in public relations. Prior to and during her education, she worked as a public relations assistant for Syracuse University and Binghamton General Hospital.

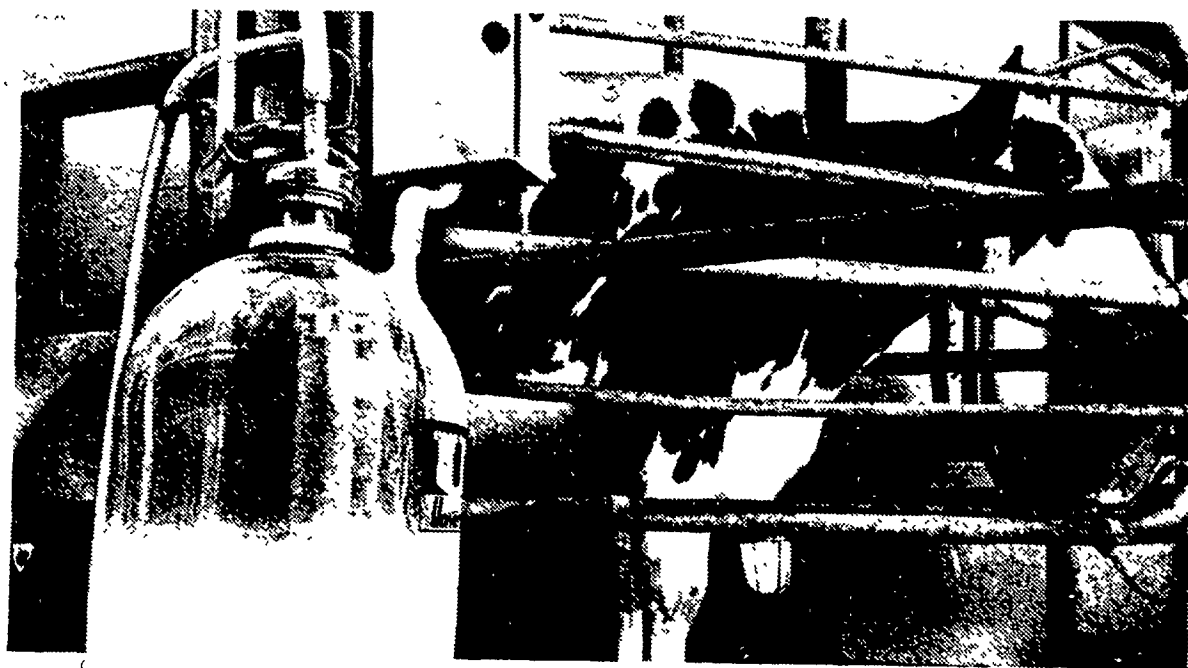

Her undergraduate work was done at the State University of New York at Binghamton. She is a resident of Syracuse, originally from Hampton Bays, Long Island.

Christine Siebold

She's producing 5% more saleable milk ...

and being dewormed at the same time

With Agway Baymix, wormtime isn't downtime

There's no question that worming your herd can pay big benefits... up to 400 to 800 lbs. of increased milk production per cow per year. That's up to 5% more milk.*

The question is, how to deworm your herd quickly and effectively without withholding milk. And the answer is Agway Baymix Crumbles.

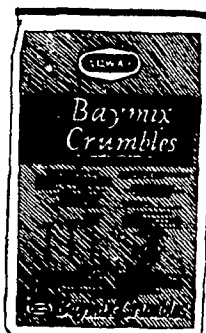

Deworm the whole herd

With most wormers, you have to withhold milk if you administer the wormer to lactating cows. And if you use the wormer only on dry or fresh cows you run the almost certain risk of reinfection from unwormed herd mates. But with Agway Baymix Crumbles you can safely deworm all your cows at once without withholding milk. That means no downtime, and reduced risk of reinfection.

Easy and economical

But perhaps the biggest benefit of Baymix is the convenience. You simply topdress the cow's daily ration with one ounce per hundred pounds of bodyweight for six days. Palatability is excellent, and there are no stressful boluses or drenches to administer.

Ask your Agway Store Representative or Salesperson for more information on Agway Baymix Crumbles, the simple, effective way to deworm your whole herd, and boost milk production.

*Based on university test trial results of 769 lbs. extra milk production over 15,342 lb. lactation.

280 attend Cedar Crest FFA annual banquet

LEBANON — Some 280 attended the 18th annual Parent and Member Banquet of the Cedar Crest FFA on Tuesday night, which highlighted the presentation of awards, including the honoring of the chapter's three 'stars.'

Star Greenhand at Cedar Crest is Brenda Peiffer, who also received awards for scrapbook activities, citrus sales and scholarship.

Star Chapter Farmer honors went to Jeff Zuck, who also

received the Foundation Medal for diversified livestock and trophies as outstanding stockman, for swine production and small grain production.

Chapter president Dave Ludwig received the DeKalb Award and was named Star Agribusinessman. He also received his Keystone Degree pin and the Foundation Medal for fruit and vegetable production.

Featured in the program at the

Clyde Forney is most recent American Farmer from Cedar Crest FFA.

Cedar Crest FFA's trio of "stars" include, from the left, Jeff Zuck, Star Chapter Farmer; Dave Ludwig, Star Agribusinessman; and Brenda Peiffer, Star Greenhand.

Cedar Crest Middle School was Mike Pfautz, of the Cloister Chapter at Ephrata High School, who is State Eastern Region Vice President. Addressing the assembled chapter members, parents and friends, Pfautz compared an FFA career with his recent experience at beginning skiing.

"Get up; don't give up," he told the FFA'ers.

Harvey Smith, area consultant, also took part in the Keystone and American presentations.

Honorary Chapter Degrees went to John Menser, Jay Zuck, Eugene Martin and Richard Kreider.

Certificates of Appreciation were presented to Julie Krall, Edgar Gish, Grant Krall and Mrs. and Mrs. John Ludwig.

Awards presented by Harold Berkheiser, chapter advisor and vo-ag instructor, include:

Foundation medals — Ann Lansberry, public speaking and horse production; Heidi Peiffer and Jenny Embich, floriculture; Dan and Dave Groff, Ed Zuck, beef

production; Gary Krall, swine production; Richard Houser, placement in ag production; Dwayne Gish, crop production; Scott Eckenrode, ag mechanics; and Dana Lape, poultry production.

Project Book Contests — Mark Patches, Jeff Zuck, Richard Houser, Dana Lape. Ed Zuck, Dave Ludwig, Jenny Embich, Steve Wenger, Dan and Dave Groff, Heidi Peiffer, Dwayne Gish, Ann Lansberry, Dave Felty, Gary

(Turn to Page B15)

Twin Valley FFA honors outstanding members

ELVERSON — Parents, friends and supporters of the Twin Valley FFA gathered Friday, March 4, at the high school to participate in the chapter's annual awards banquet.

Leading the list of the award winners were the top three chapter members:

— Mark Zerr, Star Chapter Greenhand.

— Bill Kirk, Star Chapter Farmer.

— Duane Aulenbach, Star Chapter Agribusinessman.

The trio were also among the members who received Foun-

ation Medals for their proficiency in specific ag areas, with Zerr in Fruit and Vegetable Production; Kirk, Placement in Ag Production and Aulenbach in Ag Electrification and Soil and Water Management.

Other Foundation winners:

Chris Coblenz, ag mechanics; Joe Nonnemacher, ag sales and service; Scott Stoltzfus, crop production; Mike Kline, dairy production; Eric Timm, fish and wildlife; Gail Raser, horse production; Rod Stoltzfus, livestock production; Pam Trostle, ornamental horticulture; Chris

Cylcewski, floriculture; Chuck Reiff, poultry production.

Also, Diane Stoltzfus, public speaking; Greg Raser, swine production; Chad Myer, nursery production; David Naples, ag processing; Mary McMullen, home improvement and outdoor recreation; Kevin Griest, beef production; Steve Plank, sheep production; and Pam Trostle, forest management.

Also honored as Keystone Farmers were Pam Trostle, Scott Stoltzfus and Tom Hornberger. Tom Kearns was cited for reaching the coveted American Farmer Degree level.

Honorary Chapter Farmer honors went to Charles Dombay,

Mr. and Mrs. Ronald Trostle, Mr. and Mrs. John W. Stoltzfus and Mr. and Mrs. Thomas Lafferty. Certificates of appreciation went to Tim Markevitz and Wilmer Nissley, of Pioneer Seed; Steve Fisher, of FMC; and William Ash, acting superintendent.

Honored for receiving the Honorary Keystone Farmer Degree was Robert Moyer.

Receiving their Greenhand Degree were Glenn Stoltzfus, Carol Kurtz, Chris Cylcewski, Mark Zerr, Jim Gollub, Rich Geedy, Chad Myer, Steve Plank and Gail Raser.

Chapter Farmer Degrees went to Mary McMullen, Joe Non-

(Turn to Page B15)

Tom Kearns is Twin Valley's American Farmer for 1982.

The three "stars" honored at Twin Valley FFA banquet include, from the left, Mark Zerr, Star Chapter Greenhand; Duane Aulenbach, Star Chapter Agribusinessman; and Bill Kirk, Star Chapter Farmer.

Extension Agent Assn. names winners, elects officers

Siegel earns recognition

Linda Siegel, left, Lebanon County 4-H agent, receives Blue Ribbon Achievement Award from Ellen Harkleroad, Perry County 4-H agent, awards committee chairwoman.

UNIVERSITY PARK — Linda Siegel, Lebanon County 4-H agent on the Penn State Extension Service staff, has been named recipient of the first Blue Ribbon Achievement Award presented by the Pennsylvania Association of Extension 4-H Agents.

The award was established to recognize outstanding educational 4-H programming by a member of the Extension Service staff.

According to Ellen Harkleroad, Perry County 4-H agent and awards committee chairwoman, Mrs. Siegel assisted 4-H leaders in establishing systems to improve programs and increase volunteer involvement. She also was instrumental in developing a Lebanon County 4-H program council which dealt with such concerns as leadership development, program evaluation, finance, recognition, and promotion.

The award recipient developed innovative leader training methods including an organizational notebook, leader newsletter, and kitchen conferences. Sixty-seven county 4-H leaders took part in her series of "Dig into Leadership" training workshops.

Mrs. Siegel also assisted in organizing four 4-H clubs for handicapped youths. Many of these boys and girls were "mainstreamed" into existing 4-H clubs and county programs.

A native of Selinsgrove, Mrs. Siegel has been a member of the Penn State staff since 1979. She received a bachelor of arts degree from Bucknell University.

**4-H—
a family affair**

Officers of the Pennsylvania Association of Extension 4-H Agents for 1983, elected March 1 at the Association's annual meeting in State College are, seated from left: Richard Kauffman, Berks County, secretary; Carol Schurman, Indiana County, president; and Bruce Richards, Delaware County, treasurer. Standing from left: Edward Horning, Centre County, president-elect; and Gerald McCammon, Cambria County, vice president. All are members of The Pennsylvania State University's Cooperative Extension Service staff and devote a large percentage of their time to 4-H youth programming.

Taylor wins Achievement Award

Karen Taylor, left, Berks County Extension agent, receives Outstanding New Worker Award from Nancy Kadwill, Montgomery County Extension agent and awards committee chairwoman.

UNIVERSITY PARK — Karen Taylor, Berks County Extension agent on The Pennsylvania State University's Cooperative Extension Service staff, has been named recipient of the 1983 Outstanding New Worker Award.

Taylor received a plaque at the Association's annual meeting, Feb. 28 in State College.

The award is presented annually to an Extension staff member with less than 2 years of service and who demonstrates outstanding ability in teaching at community, county, regional, and state levels.

According to Nancy Kadwill, Montgomery County Extension agent and state awards committee chairwoman, Taylor has strengthened the role of 4-H livestock, dairy, and horse program advisory committees in Berks County. Adult and teen leaders have assumed major responsibilities in providing direction for county 4-H animal science programs. Leadership development has resulted in a 60 percent increase in educational meetings and activities conducted by leaders.

A farm safety program for youth and adults was initiated by the award winner. She increased the

awareness and use of safe farming practices through safety courses, public presentations, radio spots, and news articles.

Taylor created an agricultural speakers' bureau and assisted in introducing an agricultural curriculum in the county's public schools.

She has been a member of the Berks County Extension staff since March 1981. The award winner received a bachelor of science degree in animal science from the University of Vermont.

The Extension agent is a member and regional director of the Pennsylvania Association of Extension 4-H Agents and member of the Pennsylvania Association of County Agricultural Agents.

- Feeding Savings
- More Dollars over feed cost
- Improve Herd Health

"THE EXECUTIVE" 8085

SERIES II

Computer Controlled Dairy Feeding System

Efficient feeding = Higher PROFITS

Group feeding is costly and inefficient. To maximize your profits, you've got to supply each cow with the exact amount of feed she needs to maintain her milk production level. The computerized Selective Feeder Executive 8085 System lets you do just that. It's so effective, most dairymen find the system pays for itself in reduced feed bills and increased production in less than a year!

It's simple

You determine a daily feeding allowance for each cow by programming the computer to dispense a certain amount of feed during each 6, 8 or 12 hour cycle. You choose a unique ration for each animal by mixing supplement and base rations with the computer.

- Each cow wears an inexpensive, reliable identification tag.
- Cows can feed at any feeding station.
- Feeding auger automatically stops when cow steps away.
- Each cow receives only the amount of feed you have programmed for it.

Money-saving management tool

You can get a printout from the Executive 8085 at any time. Each printout gives you the valuable feed management information:

- Amount of feed programmed for each cow
- Amount of feed dispensed to each cow, this cycle
- Amount of feed dispensed to each cow, this month
- Summary of previous cycle.

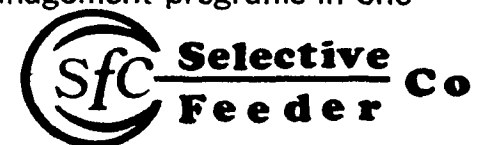

You can quickly spot problem cows by asking the computer to print out all cows not eating 75% of their programmed ration.

Total herd management system

For a total dairy management system, connect your Selective Feeder System with our Zenith Farm Management System. Readouts are available in your office on the Zenith computer. Optional software programs allow you to integrate health, breeding, production and feeding management programs in one computer system.

For more information write for free product literature.

Ritchie® Fountains deliver. Even in the dead of winter they are out there working. You're not.

Weatherproof. You bet they are. Heating systems and efficient insulation keep water ice-free... just set the Watt Watcher™ thermostat for minimal energy use.

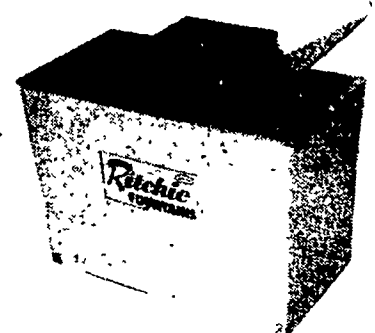

Big-throated, non-stick plastic valves keep water gushing in. Each of your cows get all the water they need to promote peak production.

Ritchie Fountains are tough, too. Quality-built with rugged heavy galvanized steel and CD-50® epoxy finish to stand up to weather and barnlot abuse.

Why take chances on anything less than a red and yellow Ritchie Fountain? Call your Ritchie dealer for water that won't quit.

Curtis gets Delaware ag alumni award

NEWARK, Del. — Harrington farmer, banker and retired vocational agriculture teacher John M. Curtis has received this year's George M. Worl Award from the University of Delaware Agricultural Alumni Association. Presented annually, the award recognizes outstanding service to agriculture by a university graduate.

A native of Harrington, Curtis grew up on a grain, vegetable and dairy farm and continued to work there until he graduated from college in 1941 with a bachelor's degree in agriculture.

After serving in the second world war, he returned to Delaware to teach vocational agriculture, first in Milton and later at Harrington High School which eventually consolidated with other area high schools to become Lake Forest High School. He retired from his teaching position there in 1972.

Over the years he acquired three farms totaling 400 acres, and established a 200-sow farrow-to-finish hog operation which he now runs in partnership with his son, John M. Curtis, Jr.

Since 1974 he has been a director of the First National Bank of Harrington and became its president in 1982. He is a member of the Delaware Vocational Agricultural Teachers Association, Delaware Vocational Association, National Education Association, Delaware Farm Bureau, National Pork Producers Association and the Delaware Pork Producers Association. He presently chairs the agricultural committee of the Delaware

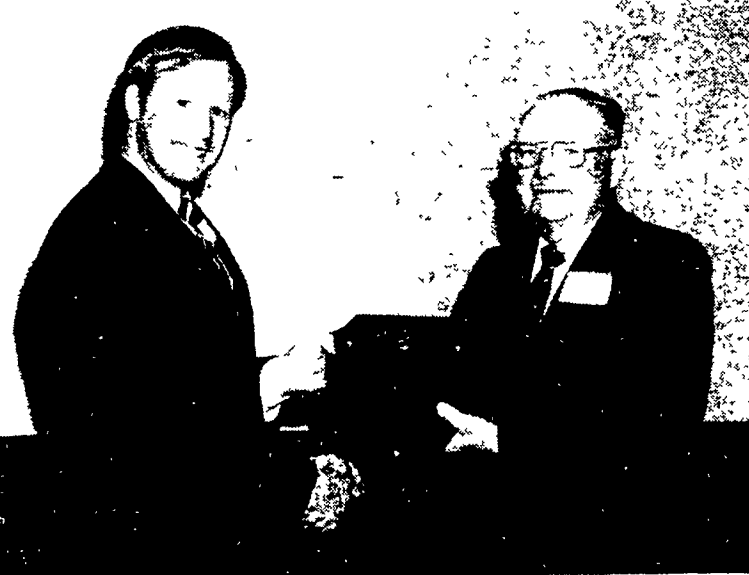

Bankers Association.

Among previous honors, Curtis has received a plaque and citation for 31 years of outstanding service to Future Farmers of America, a citation for 25 years of service to the Delaware Pork Producers Association, and a plaque and citation from the Harrington and Milton Lions clubs. A \$500 scholarship has been presented in his name by the Harrington High School Alumni Association.

Curtis is active in his community as a member of the Asbury United

Methodist Church, the Harrington Lions Club and the Harrington High School Alumni Association. He is also a tax ditch manager.

Over the years he has often cooperated with University of Delaware scientists and extension agents on crop and swine experiments. "The results of these sometimes have completely changed my farming directions," Curtis says. "I continue to look forward to giving them my full cooperation."

Jim Harrison, president of U. of D. Ag Alumni Association, presents 1983 Worl Award to Harrington farmer and former vo ag teacher John M. Curtis.

It's time for USDA's poster contest

WASHINGTON, D.C. — Distribution of teaching kits to every grade school in the country began recently as the U.S. Department of Agriculture kicked off its 1983 Food Safety Poster Contest.

The contest, sponsored by USDA's Food Safety and Inspection Service, runs from March through mid-April. Winners will be announced in May.

Some 72,000 grade schools, public and private, will receive this year's kits. The theme for the contest is the safe handling of food after purchase, and the importance of reading product labels.

"Two popular bad guys — Sal Monella and Arnie Bacteria — cartoon characters well received in previous poster contests, will be back again this year," said Donald L. Houston, administrator of USDA's Food Safety and Inspection Service, "to show students how the organisms that cause food poisoning can contaminate food, particularly meat and poultry products, that is not properly cooked or refrigerated."

Youngsters will also be encouraged to "Be a Label Detective," as they learn what product labels can tell them about food.

"Good consumer habits learned young, last a lifetime," said Houston. "We want these kids to learn how to shop intelligently, and how to care for food properly once they get it home. The contest is a great way to teach, because the information covered in the classroom is reinforced in the

children's minds as they draw their posters to show what they've learned.

"We are strongly committed to consumer education," Houston said. "The USDA inspection process assures that meat and poultry products are safe and wholesome when they reach the market, but consumers must be educated to keep them that way. That's why we're making a special effort to educate tomorrow's consumers — our children — through this contest."

How many youngsters does the poster contest reach?

"Over 300,000 children took part in 1981 and 1982," Houston said, "and with interest in the contest growing, we think this year's participation will be even better."

"There are terrific prizes this year, too," Houston said. "First prize winners in each of three age categories and their teachers win \$200 in U.S. Savings Bonds, and we'll bring the children and their parents to Washington for a special awards ceremony with Secretary of Agriculture John R. Block in May. The kids are thrilled by their success, and it's a great way to dramatize the importance of food safety."

BROCK GRAIN BINS

World's most
complete line of
quality farm and
commercial
grain bins

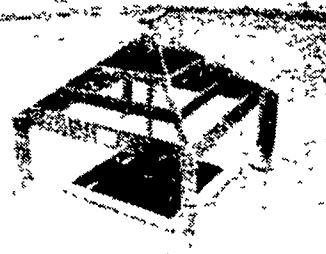

Models and sizes to fit any grain producer's needs and future plans

Whatever your grain storage needs may be, there's a dependable BROCK grain bin built to handle your exact requirements. BROCK's capacities range from 1,350 to over 75,000 bushels in dual purpose farm bins, and up to nearly 300,000 bushels in commercial bins. Choose from over 300 models for farm storage, holding, and commercial storage.

**SPECIAL DISCOUNT ON GRAIN BINS INCLUDING AN
EARLY ORDER DISCOUNT**

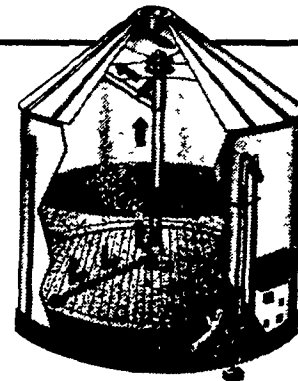

**FREE WELL-GARD™ IF YOU
BUY A GRAIN BIN**

Buy any BROCK grain bin from us at Open House and we'll include a free BROCK WELL-GARD™ Discharge Guard. It solves the problem of chunks of grain clogging the discharge well.

Only Shivvers warrants grain dryer performance

Shivvers' automatic continuous flow grain drying systems are engineered to give long-last, high quality performance for most on-the-farm drying needs. Shivvers is so confident in the ability of its systems to perform as promised that the drying capacity for each Performance Package is warranted in writing.

New SWISH SATELLITE™ System Waters Chicks & Poults From Day 1

The biggest problem with founts and other supplementary waterers is manpower — the labor needed to clean and hand-fill them. Also, birds don't always get clean, cool, fresh water — which can cause health problems and poor feed conversion.

But now there's the new Swish SATELLITE system.

It attaches to any Swish floor watering system (and most other brands, too), to give you an automatic system that baby birds take to immediately.

And your birds get fresher, cleaner, cooler water that they love to drink. Which means they'll drink more of it. And that means healthier birds.

The Swish SATELLITE also cuts water waste — which means drier litter, less disease.

The NEW SWISH - total commitment to quality & service

MEAL-TIME

The programmed feeding system that
cuts your No. 1 production cost

Now there's a way you can boost profits 20% or more. An entirely new way to feed hogs, Chore-Time's new MEAL-TIME Hog Feeding System feeds your hogs 2 or 3 programmed "meals" a day, giving them time to thoroughly digest and fully utilize their feed. The result — feed conversion improved 5% or more for an additional 15 to 20% or more net profit per pig.

Chore-Time offers 3 sizes of MEAL-TIME feeders with built-in waterers to properly fit all hogs and minimize feed wastage.

See us today and find out how you can profit from the Chore-Time MEAL-TIME System.

On being a farm wife -And other hazards

Joyce Bupp

It's a particular quirk of human nature to feel guilty, sometimes even when there's no real need at all.

So when a person runs across some piece of information that justifies what he feels guilty about, a person tends to savor that vindication, to hold it for reference, and comfort, when guilt threatens to sneak in again.

Like this article I recently clipped that suggests a cluttered desk may, indeed, be a sign of productivity. For those of us with desks that masquerade as landfills, that can only bode good news.

Get this — there are levels of desk clutter.

At one extreme is the totally neat, a-place-for-everything, no clutter type. If that sounds impressive, take note that experts claim such a desk may be testimony that the resident doesn't have enough to do.

Never fear. The surface of the house and the barn office desks

appear about as often as Haley's Comet, so that erases that possibility.

On the other hand, it can mean that the resident of the desk simply cannot abide clutter in any way, shape or form. That rules out the parents of any child I've ever known, and 99.5 percent of farmers.

At the other extreme is the slab desk. No further explanation is necessary, and I'll not point any fingers since this one promises to hit too close to home.

Instead, I'd prefer to categorize our desks somewhere in the middle, cluttered, but in loosely-arranged stacks, where everything has a place even though it might not look that way.

Well, almost everything has a place, anyway. Except for one equipment washer kicking around here, and no one will admit to having brought the thing in the house.

For the farmer, his desk stacks represent pedigree and registry

information, sire directories and proof books, milk records and miscellaneous paper-flow generated by the various farm organizations in which he's involved.

My house office desk runs more to stacks of writing background materials, bookkeeping and bill payment records, dairy promotional goodies, news clippings and whatever was plunked down by the youngsters as they charged through on their way home from school.

That could range from a gym bag to a note from the teacher, from soggy hats and umbrellas to a grocery bag stuffed with the cleanings-out of a fifth-grade desk.

Just in case anyone makes a snide comment about this desk anytime in the near future, I plan to keep the clutter-desk article handy, so I can whip it out and let the critic read and make his own decision.

I'll file it just as soon as I find it. I know it's here somewhere in one of these stacks.

Calibration workshop set March 22

NEWARK, Del. — The Delaware Cooperative Extension Service will sponsor a calibration workshop for farmers on Tuesday, March 22, from 1 p.m. to 4:30 p.m. at the University of Delaware Georgetown substation. The meeting will be held rain or shine.

Extension personnel will demonstrate proper techniques for calibrating sprayers, planters, fumigators, and manure spreaders. The meeting is free and open to everyone regardless of race, color, sex, handicap, age, or national origin. It will count toward the recertification of pesticide applicators.

Most crops do better when they are seeded uniformly, says University of Delaware extension power and machinery specialist Tom Williams. Planting today is much more complex than it was when the first mechanical corn

planter was patented in 1893. That device merely allowed farmers to plant without stooping.

Today's farmers ride in air-conditioned tractor cabs with electronic monitors, and plant 30-foot-wide swaths at 5 miles per hour. Planting now may consist of applying dry or liquid fertilizer beside the rows; applying granular insecticide in seed furrows or beside the rows; opening seed furrows; metering seed at a uniform rate; placing treated seed at a uniform depth, with good seed-to-soil contact for fast germination; and covering seed for protection. Herbicides can be sprayed at the same time.

Proper calibration of metering mechanisms is critical if a planter is to apply all these materials at the intended rates under varying conditions, Williams says.

Agency names new staff member

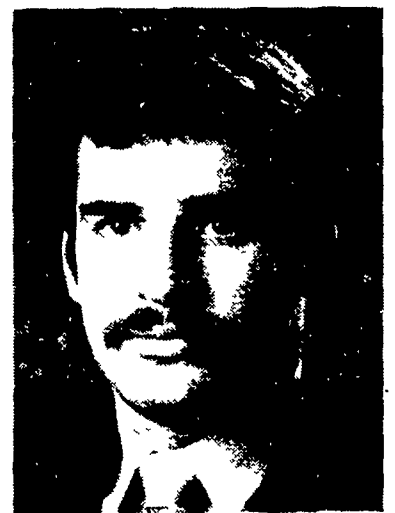

TOWSON, Md. — The Advertising & Promotion Agency/Middle Atlantic Milk Marketing Area is pleased to welcome Mark Klimovitz to its staff. Mark will act as the agency's merchandising director, responsible for coordinating promotional participation of area grocery and convenience stores.

In addition, Mark will supervise use of the all-new mall exhibit which travels to various public

relations events throughout the Middle Atlantic region.

Mark is a native of Baltimore, and has worked in the food retail business for the past four years.

The Advertising & Promotion Agency/Middle Atlantic Milk Marketing Area is responsible for dairy product promotion and funding nutrition education and research in Pennsylvania, New Jersey, Delaware, Maryland, Washington, and parts of Virginia and West Virginia.

THE SURGE BACKFLUSH SYSTEM...THE AUTOMATIC WAY TO CONTROL MASTITIS.

The Surge Backflush System can cut your mastitis losses substantially by helping to prevent mastitis-causing bacteria from hiding in the milker inflations and getting a free ride from infected cows to healthy cows.

HERE'S HOW IT WORKS...

After the cow is milked out, the milking unit is switched from the milk line to the backflushing position. The system then treats the milking unit to a four-

stage cleaning and sanitizing process.

It's all done automatically in just a shade over a minute, completely independent of the operator.

Let Us Show You This Automatic Mastitis Fighter... Call Us Today!

Cure wet basements and damp attics

LANCASTER — Because of the climate in this part of the country, many houses are plagued by wet basements or damp attics. There are a number of ways to cure these problems, says University of Delaware Extension agricultural engineer Ernest Walpole.

"Over half of all wet basement problems result from surface water," says Walpole. "Water seeping through cellar walls can best be stopped before it enters a house."

In new construction, this can be accomplished by installing drain tile around the base of the footing, connecting it to a suitable outlet, and waterproofing the cellar wall.

Set tile in 1/2-inch to 3/4-inch crushed stone to permit free access for water. A storm sewer or ground at a lower elevation are suitable outlets for water which collects. Waterproof outside cellar walls with one or two coats of cement plaster and an asphaltic coating. When backfilling around the foundation, place clay or water-resistant soil next to the wall, sloping the backfill to drain water away from the house. Be sure the final grade around footing is sufficient to take water about 8 feet away from the house.

"All new construction should incorporate these features," Walpole says. "Sometimes there is no possible outlet for the tile line, but there's no excuse for not providing good surface drainage."

With an existing house it may be possible to excavate around the foundation to add tile waterproof outside walls. If this can't be done, at least regrade the ground to improve surface drainage.

Inside cellar walls can be waterproofed with one of several "paints" available at lumberyards and hardware stores. Be sure to

follows the manufacturer's directions. However, if external water pressure is high, this treatment will have little value.

If waterproofing interior walls doesn't do the job, there's still the French drain. This is a channel around the inside perimeter of the basement, connected to a sump. Water collects in the sump and is pumped outside.

Walpole says many builders install French drains in new houses instead of external tile lines. Installing a French drain in an existing structure requires removing a small amount of basement floor around the perimeter. This is best done with a masonry saw, cutting the floor as close to the wall as possible. Then replace the floor, leaving a 1-inch crack at the wall.

The usual procedure is to place 1-inch styrofoam strips next to the wall before pouring the new concrete. These strips can be picked out after the concrete sets to form a channel.

Next create a sump to collect water from the drain by setting a 15-to-18-inch diameter perforated plastic pipe in crushed stone near the drain at some point, being sure the stone extends to the drain to allow passage of water. Install a pump to remove collected water from the sump.

Besides such measures to prevent intrusion of surface water into a basement, homeowners can also take other steps to eliminate moisture and its effects. Walpole suggests treating boards and timbers attached to damp concrete walls with a wood preservative to prevent rot and paint deterioration.

Moisture from crawl spaces under houses without basements sometimes causes floors above to

become damp or warp. A damp crawl space may also cause musty odors in rooms above. Eliminate these problems by ventilating the crawl space.

For adequate ventilation, allow 2 square feet of opening for every 100 square feet of wall, plus 1 square foot per 300 square feet of crawl space. A common way to provide these openings is by installing concrete block vents mortared into the same place as 8-by-16-inch masonry blocks.

If the ground in a crawl space is covered with a vapor barrier of heavy roll roofing paper, 30-pound felt or polyethylene plastic film, only about 10 percent of the square footage of opening otherwise required is necessary for ventilation. Overlap lengths of roll roofing by 6 inches and weight them down to prevent movement by wind, in order to completely seal out moisture.

The attic is also prone to moisture problems in some houses. Moisture can be reduced by installing attic louvers or roof or soffit ventilators.

Louvers installed in gable ends permit moisture-laden air to escape. Provide one square foot of vent space for each 300 square feet of attic area.

In hip roof houses with no gables, a roof ventilator can be used to draw moisture from the attic. When using a roof ventilator, provide for the intake of fresh air through some kind of soffit ventilator (see drawing). Effectiveness of soffit ventilators depends on the direction and strength of prevailing winds, as well as on the presence of gable louvers or roof ventilators to provide an outlet for the warm, moist air being replaced by outside

air coming in through soffit openings.

One consequence of excess moisture in a house is mildew. This may develop in cellars, crawl spaces, basement family rooms, bathrooms or closets. Mildew grows on cotton, linen, rayon, silk, wool, leather, wood, paint and paper. It can cause discoloration,

rot and decay.

To prevent mildew, you must keep things clean in addition to controlling moisture, says Walpole. Remove greasy films such as those found on kitchen walls. Thoroughly clean soiled fabrics—even those made of synthetic fibers usually considered resistant to mildew.

Does your refrigerator

WASHINGTON — Ever have 100 pounds of milk in your refrigerator?

"It might be that a lot of families frequently have the equivalent of 100 pounds of milk in their refrigerators, especially at festive times of the year like Christmas," says Richard Webber, dairy standardization chief in the U.S. Department of Agriculture's Agricultural Marketing Service.

"For example," Webber says, "let's suppose that there's a family gathering, and the chief cook has assembled three pounds of butter, a gallon of ice cream, a gallon of milk and three pounds of different cheeses. That alone represents

more than 113 pounds of milk."

How does that add up? Webber gives these figures:

— It takes 21.2 pounds of whole milk to make one pound of butter.

— A gallon of ice cream, which weighs 4-1/2 pounds, is made from 12 pounds of milk and 15 pounds of butter and concentrated milks are in the recipe.

— Unlike water, milk is not "a pint's a pound the world around." A pint of milk weighs slightly more than a pound, and a gallon weighs 8.6 pounds.

— Each pound of cheese requires about 10 pounds of milk.

"The dairy industry, in transactions between farmers and

have 100 lbs. of milk in it?

buyers of milk, always deals with milk in terms of pounds rather than liquid measures because it is easier to weigh milk than to meter it," Webber says. "Also, a large part of the nation's milk goes into manufactured dairy products that cannot be easily measured in liquid quantities."

So, farmers are paid for their milk on the basis of 100-pound units, or hundredweights, rather than in terms of gallons. A hundredweight contains slightly more

than 46 quarts or 11-plus gallons of milk. Recently, American dairy farmers have been producing more than 134 billion pounds of milk each year.

Webber says this production is accomplished by about 200,000 dairy farmers who have about 11 million dairy cows.

"The remarkable thing," Webber says, "is that 25 or 30 years ago it would have required twice as many dairy cows to produce just about the same amount of milk."

Why the difference? Improved animal husbandry — better breeding, better care, better feed, he says.

"Today the average dairy cow produces about 12,000 pounds of milk a year, compared with 6,000 pounds just 25 years ago. And it is

very common to have dairy herds in which each cow is producing more than 18,000 pounds of milk per year," Webber says.

The average annual production per American dairy cow exceeds the production in almost every other nation in the world.

At 12,000 pounds of milk annually, each dairy cow produces the equivalent of roughly 565 pounds of butter, or 1,000 gallons of ice cream, or 1,200 pounds of cheese, or about 1,390 gallons of milk.

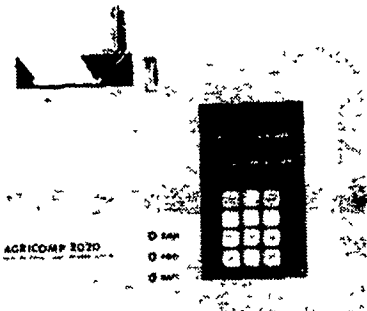

Each American consumes the equivalent of about 540 pounds of milk annually.

"Old Bossy, with careful attention from the dairy farmer, does very well by us," Webber says.

SYSTEM 2000

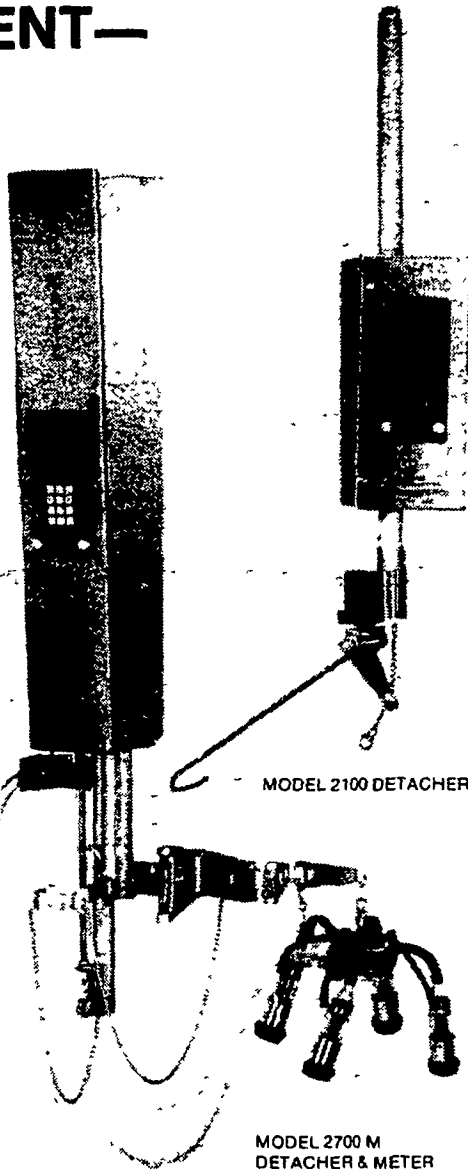

THE NEWEST DIMENSION IN DAIRY MANAGEMENT—

A system designed and built to combine the most innovative dairy automation with computerized dairy record keeping.

AGRICOMP 2025 COMPUTER

The Bou-Matic System 2000 offers you a choice of three stages of dairy automation: automatic detachers, with Models available for either parlor or flat-barn installations; the Model 'M' milk meter, a revolutionary metering device that monitors milk flow and provides individual production data; and the Agricom 2025 computer, an on-farm management and record tool that offers a simple and efficient means of collecting and displaying dairy herd information.

Soil test before using sewage sludge

COLLEGE PARK, Md. — No farmer should consider having municipal sewage sludge applied to farmland without first taking soil samples and having a chemical analysis made by the University of Maryland soil testing laboratory, declares a university Extension agronomist.

The soil test results—and a corresponding analysis of the sewage sludge by the state chemist for the Maryland Department of Agriculture—are absolutely necessary for University of Maryland agronomist to determine how much sludge may be applied safely to a particular field where crops of any kind are to be grown.

Two major criteria are considered in making this determination—the nitrogen requirement of the crop to be grown and the projected heavy-metal accumulation in the soil from the sludge to be applied.

Soil testing should continue to be done on an annual basis after sludge application, says V. Allan Bandel, Extension soils specialist and director of the University of Maryland soil testing laboratory at College Park.

This additional testing is recommended to determine if proper pH—the measure of soil acidity—is being maintained. A pH of at least 6.2 is necessary in order to limit the availability of heavy metals in the soil.

Bandel explained that heavy metals are elements such as cadmium, copper, nickel, lead, mercury and chromium. These elements are commonly found in municipal sludge in varying concentrations, depending on types of industry emptying into the sewer system.

In excessive amounts, most of the heavy metals can prove injurious if they find their way into the food chain of humans and animals. To minimize this hazard, guidelines have been established by local, state and federal governments for each of the metals commonly found in sewage sludge.

General recommendations for sludge application on farmland are contained in a four-page leaflet (Fact Sheet 336) recently published by the Maryland Cooperative Extension Service.

The leaflet is titled "Guidelines for Land Application of Digested Sewage Sludge and Composted Sewage Sludge." It is available from county Extension offices throughout the state.

Recommended procedures cited in the Maryland Extension leaflet include the following:

—Forage and pasture crops physically contaminated by sludge should not be consumed by animals;

—Sludge is not to be used on land where tobacco or vegetables are to be grown;

—Sludge should not be applied on soils with less than 20 inches of depth. The seasonal-high-water table should never be closer than 20 inches from soil surface.

He calls attention to a note of caution contained in the federal guidelines for sludge application which were developed jointly by the U.S. Department of Agriculture and the Environmental Protection Agency.

Food processors have charged that the existing federal guidelines are too vague and ambiguous for precise interpretation.

Bandel noted that Maryland is

currently represented on a regional committee which is drafting a comprehensive set of sludge application guidelines for 12 Northeast states. When those guidelines are published later this year, the Maryland Cooperative Extension Service will revise its current Fact Sheet 336, if necessary.

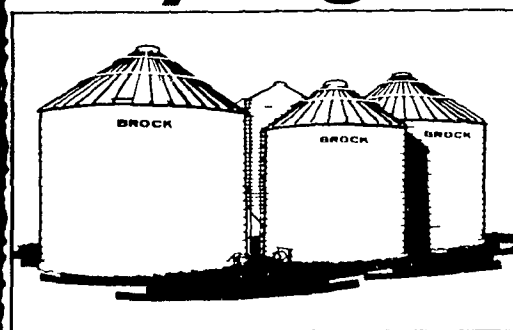

For further information on soil testing and sludge application, Maryland farmers should contact their county Extension office or the University of Maryland soil testing

laboratory, College Park, Md. 20742.

To find out about analysis of sewage sludge, contact the state chemist for the Maryland

Department of Agriculture. He is located in room 0233 of the Chemistry building on the University of Maryland campus at College Park.

After the First one You know They're good

The first Brock bin has proven itself to be dependable on farm after farm. This dependability has resulted in growing Brock Grain Bin complexes throughout the nation. Brock's expert design, handsome appearance and the latest in bin features are convincing arguments for reliability. It takes only one to really know.

ARE YOU SURE?

Most farmers just aren't sure what and how much to plant this spring. If you are one, and may be setting aside all or part of your grain acreage in the federal "PIK" program, here are some dollars and sense ideas for those idle acres. Here's why. Invest a little to build nitrogen, control weeds, reduce erosion, improve soil tilth, and produce forage for fall harvest. This handy chart compares some cover crops:

CROP	N. PROD.	REL. TONNAGE	SEED COST/A	NOTES
MED. RED CLOVER	YES	MED.	MED.	EXCELLENT QUALITY
MAMMOTH CLOVER	YES	HIGH	MED.	ALL ROUND FAVORITE
ALSIKE CLOVER	YES	LOW	LOW	ADAPTABLE ALL SOIL TYPES
YEL. SWEET CLOVER	YES	HIGH	LOW	TREMENDOUS TONNAGE
ANNUAL RYEGRASS	NO	MED.	LOW	QUICK STARTER
"DORMIE" BLUEGRASS	NO	HIGH	HIGH	HIGH YIELDING PERM. FORAGE TYPE

Planter fertilizer does pay dividends

(First in a series of articles on planter fertilizer management in corn production.)

xxx

The key word today in farming is efficiency. As farmers retool with this in mind, they're rediscovering the advantages of planter fertilizer.

Planter fertilizer almost always produces a fast start and usually increases yields, but there are no guarantees. Some growers have concluded that the up and down response of corn to planter fertilizer means improved early growth but no extra bushels in the bin. University of Delaware extension agronomist William H. Mitchell says results of research he's conducted over the past 15 years show that more often than not, planter fertilizer does increase

yields. When it fails, there's usually a good reason.

"It's safe to say that a fertilizer dollar can be stretched by using it to buy planter fertilizer," says the agronomist. This is particularly true for phosphorus, regardless of increased yield. Phosphorus is simply two to three times more effective when banded in the planter, rather than broadcast. Banding this nutrient means a saving of about \$10 an acre plus increased profit from yield in most cases.

In over 500 individual comparisons, Mitchell found that planter fertilizer increased average yield by six bushels an acre. Hybrids in the 100- to 110-day maturity groups were more responsive than late season hybrids. Planting date and soil

condition also affected results.

The tests were conducted on a wide range of soils at several locations throughout Delaware. Purpose of these trials was to measure general response of different corn hybrids to planter fertilizer, not to solve specific fertility problems. But in other plots, use of planter fertilizers selected or formulated to meet specific need increased yields even further.

Planter fertilizer equipment has come a long way from the split boot applicator, or the sharpened sticks used even earlier by Indians to poke a dead fish under each hill of corn. With modern double-disk openers and plastic tubing, wet or dry fertilizers can be placed where needed for maximum plant response and seedling safety,

Mitchell says.

A comparison of several nitrogen sources placed 2 and 5 inches from the row at a rate of 25 pounds of nitrogen per acre showed that the 2-inch location was best. Placing fertilizer any closer injured germinating seed and reduced plant stands. Moving the band 5 inches from the row reduced plant response. "Nitrogen sources such as urea and diammonium phosphate (DAP) which evolve free ammonia when they break down are especially toxic if placed too close to the seed row," Mitchell says. "Urea is the principal offender, and stands were frequently reduced 30 percent when it was placed in or near the seed row." When placed 2 inches away, it caused no stand reduction and gave comparable yields to

other nitrogen sources during a four-year test on sandy soils.

Since urea is the least expensive dry nitrogen source, its potential for seedling injury has special importance. In additional tests, the agronomist found that when ammonium sulfate was mixed with urea on a two to one basis, there was no stand reduction, even when the fertilizer was applied in the row. By itself on high pH soils, ammonium sulfate was safe and most effective when placed in the row. The reverse was true on low pH soils. There the material appeared to depress pH even further, resulting in toxic conditions and reduced phosphorus uptake by corn plants.

Mixing ammonium sulfate and DAP on a one to one basis and applying them in the row also reduced plant stands. Again, there was no problem when DAP was applied 2 inches from the row, either alone or in a blend with ammonium sulfate.

"There is much to be said in favor of blends of nitrogen materials as planter fertilizers are formulated to solve specific fertility problems," Mitchell says. But each has unique characteristics and must be used with care. Nitrogen sources containing ammonia, such as DAP, MAP, urea, ammonium sulfate and 10-34-0 all increase soil acidity in the fertilizer band, which makes micronutrients such as manganese and zinc more available. Ammonium sulfate is an excellent source of sulfur as well as nitrogen.

NEDCO proceeds with acquisition

SYRACUSE, N.Y. — On March 2, 1983 the Northeast Dairy Cooperative Federation (NEDCO) was authorized by its delegate body to proceed with the acquisition of the milk processing facility owned and operated by Glen & Mohawk Milk Association, Inc., in Fultonville, N.Y. According to NEDCO President Edward McNamara, this acquisition will provide NEDCO with its first fluid milk processing plant. It rounds out NEDCO's ability to service its producers' needs in that it adds fluid milk to its butter, cottage and non-fat dairy product lines, he said.

Glen & Mohawk has operated the Fultonville plant since 1918, employing approximately 200 people. The Fultonville location provides easy access to the New York City market and is centrally located among its producer suppliers as well as its customers who are located throughout the central and eastern portions of the state. It is the largest bottling facility in upstate New York.

McNamara said the Glen & Mohawk management group, headed by present owner Robert Abrams, under the authority of the NEDCO Board of Directors will continue to operate the facility anticipating very little change in current operations. The facility processes about 900,000 pounds of milk a day, representing over 450,000 quarts to the consumer. Its distribution is throughout the state. Transaction closing is expected to take place in early April.

Buy one of our new Case farm tractors — get round trip tickets for two, plus cash for your trip

Pa. Foundation Seed Co-op still in operation

UNIVERSITY PARK — Contrary to what you may have heard, the Pennsylvania Foundation Seed Cooperative is alive and well, according to Guy W. McKee, professor of agronomy. It has, however, changed its location and mode of operation.

The Seed Cooperative was organized in 1956 to produce and distribute Foundation Seed of small grain varieties, and corn inbreds and corn single crosses required by companies growing seed of these crops for Pennsylvania farmers. In 1954, a limited-generation seed-multiplication program was established in Pennsylvania. The limited generation sequence for oats, wheat, barley, rye, and buckwheat was Breeder, Seed, Foundation Seed, Registered Seed, and Certified Seed. In 1956, the majority of the corn hybrids used on Pennsylvania farms were double cross hybrids requiring two single cross hybrids and four inbreds to produce.

Certified Seed, the seed class usually sold to farmers, traces directly back to Breeder Seed produced and maintained by the originating plant breeding agency. The purpose of seed certification and limited generation seed increase programs are to ensure that the consumer obtains "true-to-type" seed of the variety or hybrid ordered. In Pennsylvania, the certification program is carried out by personnel from the Bureau of Plant Industry of the Pennsylvania Department of Agriculture.

Obviously, with a limited generation seed increase program, considerable quantities of Foundation Seed of the desired varieties and hybrids are required. For example, if there is demand for sufficient certified wheat seed to plant 200,000 acres, at least 450,000 bushels of Certified Seed should be available.

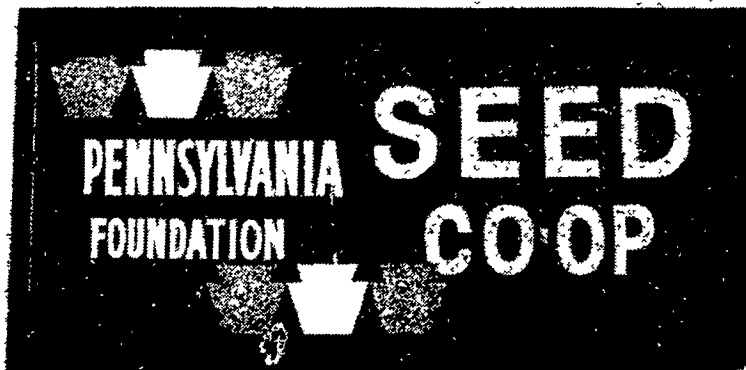

To produce this quantity of Certified Seed would require about 13,000 acres if some allowance is made for stand failure and the failure of some fields to pass certification inspections. This would require about 30,000 bushels of Registered Seed produced on 900 acres. To seed 900 acres to produce Registered Seed would require about 2,000 bushels of Foundation Seed produced on 50 acres by some foundation seed stocks organization.

In addition, when the Pennsylvania Foundation Seed Cooperative was organized, there was need for sizeable amounts of corn inbreds and corn single crosses for distribution to hybrid seed corn growers.

Changing Times

The Pennsylvania Foundation Seed Cooperative successfully met the above needs and grew and distributed Foundation Seed of oats, wheat, barley, rye, and buckwheat — as well as corn inbreds and single crosses from 1956 to 1980. During this period, however, the practice of hybrid corn seed production shifted from the use of double cross to single cross hybrids.

Another change, and one that contributed greatly to the changed mode of operation adopted by the directors of the Cooperative, was the shift over the past two decades from "open formula" corn hybrids developed by public plant breeders at the Pennsylvania Agricultural Experiment Station and neighboring states to "closed formula" corn hybrids developed by private seed companies. Since private seed companies generally maintain their own corn inbreds or

purchase them from private foundation seed stock growers, the demand decreased for corn inbreds from the Seed Cooperative.

As a result of the limited acreage of Certified Seed grown in Pennsylvania and the changing patterns in producing hybrid corn seed, the volume of seed sold by the Seed Cooperative declined as costs increased. Consequently, the directors of the Cooperative decided in 1980 to cease direct production and conditioning (grading and processing) of Foundation Seed and to sell the physical facilities of the Cooperative located at Jersey Shore. This was done in the Spring of 1981.

To meet the needs of Pennsylvania seed growers, the Seed Cooperative has made arrangements to have Foundation Seed of the desired small grain varieties produced by foundation seed organizations in states such as Virginia, New York, Missouri, Indiana, Illinois, and Ohio. At present, all of the varieties of small grain recommended in the Penn State Agronomy Guide oriented in other states with the exception of Pennrad winter barley and Pennquad buckwheat. Supplies of many of the popular Pennsylvania-developed corn inbreds similarly are available from foundation seed stock organizations, either public or private in other states.

To expedite the ordering and distribution of Foundation Seed,

Floyd Imes has been designated as the Coordinator. He may be contacted at the Pennsylvania Seed Cooperative, P.O. Box 513, Manheim, Pa. 17545 (717) 665-5443.

The directors and officers of the Cooperative for 1982-83 are Floyd Imes, Manheim, president; Cecil Irvin, State College, vice-president; Donald Wertman, Hall, N.Y., secretary; William Camerer III, Jersey Shore, treasurer; Richard Morse, Syracuse, N.Y.; Douglas Karper, Camp Hill; David Reist, Elizabethtown.

Thus, the Pennsylvania Foundation Seed Cooperative is still alive, healthy, and functioning in its delegated tasks. The directors recently completed the task of redeeming stock held by those who no longer produce seed. Patronage refunds are being paid seedsmen for past orders. The present goals of the Seed Cooperative are: (1) to continue to assist Pennsylvania seedsmen to secure Foundation Seed of oats, wheat, barley, rye, buckwheat, and corn required to serve the needs of Pennsylvania seedsmen and farmers, and (2) as funds permit, to help support plant breeding and other research efforts of value to Pennsylvanians. The Pennsylvania Foundation Seed Cooperative, the Pennsylvania Department of Agriculture, and the Pennsylvania Agricultural Experiment Station will continue their joint efforts to provide high quality of adapted plant varieties.

Dairymen, Inc. Plans

Young Dairymen Dinner Meeting

BALTIMORE, Md. — The Middle Atlantic Division of Dairymen, Inc. has planned a Young Dairymen dinner meeting for Thursday, at Friendly Farm in Westminster, Md. beginning at 7 p.m. The featured speaker for the evening is Dr. Al Ortego who is Senior Vice President of the Marketing-Planning Group for Dairymen, Inc. Dr. Ortego will talk about the past, present and future of Dairymen, Inc. from a marketing standpoint.

The Young Dairymen Program is open to young people age 18-35 who are living on and taking part in the operation of a dairy farm

holding a Dairymen, Inc. membership agreement. Dairymen, Inc. is a milk marketing cooperative which serves 8,000 dairy farmers in 17 eastern and southeastern states. Its member-owners produced more than six billion pounds of milk in fiscal year 1982. Total assets of the cooperative amounted to almost \$250 million in 1982, an eight percent increase over the previous year.

If you would like reservations for the dinner meeting, please call the Middle Atlantic Division office at (301) 944-6800.

Loan rate at 9%

WASHINGTON — Commodity and farm storage loans disbursed in March by the U.S. Department of Agriculture's Commodity Credit Corporation will carry a 9 percent interest rate, according to C. Hoke

Leggett, acting CCC executive vice president.

The new rate, up from 8-5/8 percent, reflects the interest rate charged CCC by the U.S. Treasury in March, Leggett said.

About the House

How to wipe out mildew

LANCASTER — Mildew has no favorite season. But if there is one time of year it's most irksome, it's winter time. A combination of tightly sealed windows, damp and cold weather outside and the furnace going day and night leads to perfect growing conditions for mildew and other kinds of mold.

The bathroom, with lots of hot steamy air, is the prime candidate for mildew, but the mold also can infect the mud room, the basement recreation room, the laundry and even the kitchen.

To defeat old or heavy incrustations of mildew, spray with an instant mildew stain remover, such as Tilex. Leave the stain remover on the mildew for a few minutes, then rinse off. Heavy stains deep in the grout might take two or three applications.

Soap or detergents and water usually are ineffective against mildew stain. They will not remove the mildew, and the stain and smell will return. What is needed is a mildew stain remover...a proper combination of detergent, a bleaching agent and an active cleaning ingredient.

Used properly, a stain remover will reduce the time and effort you've needed in the past to remove mildew stains from the tile or grout around sinks, tubs and shower stalls. It's also useful on metal, porcelain, rubber and vinyl surfaces.

Mildew stain removers are strong. They have to be to remove stains. So make sure you read, understand and follow the directions.

Most of the areas susceptible to mildew are covered with either tile or vinyl. Both are easy-care coverings, but do need regular attention in order to maintain their original lustrous appearance. Lightly soiled walls and counters can be cleaned easily with a damp sponge or cloth. But heavily soiled areas, such as floors in the mud room or laundry and the tiles behind the stove, are best cleaned with a little elbow grease and a diluted solution of a non-sudsing detergent. One common product, TSP (trisodium phosphate), can be obtained at almost any hardware or drug store and is relatively inexpensive.

Once you have the mildew stains off with a stain remover, a little regular maintenance will do wonders for your tile or vinyl. Simple wipe up any puddles or water droplets on walls, in the seals between the individual tiles or on the floors. If the mildew stain returns, simply apply the stain remover again.

A couple of minutes each day will pay big dividends when you figure in the extra time and elbow grease necessary to play catch-up. You can do it, so just go ahead.

AGCC Convention Plans Announced

COLUMBUS, Ohio — Close to 400 Guernsey breeders from across the country are expected to gather at the Quality Inn on April 15-18 for the American Guernsey Cattle Club's (AGCC) 106th national convention. Special tours, workshops, demonstrations and other activities have been planned by the Ohio Guernsey Breeders' Association (GBA), the host of this year's event.

Registration begins on Friday morning with 13 national Guernsey queen contestants starting the interview process and attending a luncheon in their honor.

Tours are scheduled for

Thomas heads nutrition group

LANCASTER — Doris Thomas, Extension Home Economist, recently accepted the position of chairperson for the Nutrition Subcommittee of the Lancaster Chapter, American Heart Association.

Thomas is a member of the Pennsylvania and American Home Economics Association and the Pennsylvania and National Association of Extension Home Economists. She has been in her present position for 19 1/2 years, receiving her undergraduate degree from Hood College, Frederick, Md., and her Masters of Education degree from Penn State.

Her responsibilities as chairperson encompass the initiation and development of nutrition programs for the Heart Association. Thomas' special interest has been in the coordination and implementation of the Culinary Hearts Kitchen course currently being presented at the Heart Office.

Saturday of the new AGCC headquarters in Columbus, the Select Sires artificial insemination headquarters in Plain City and the Select Embryos bovine embryo transfer fertility in Plain City.

Workshops on Linear Type Evaluation, reading a Guernsey pedigree and herd promotion presented by AGCC staff and industry experts will be held Saturday evening as well as an open forum discussion involving interested members, directors and staff.

Several alternate programs designed for women and youth are planned to take place during the same time slot as the workshops.

Youth is the focus of Sunday's events. The crowning of the 1983 National Guernsey Queen and introduction of the junior production award winners, the

national outstanding young farmer and the outstanding youth in the country will climax the banquet.

The annual AGCC business meeting will begin at 9 a.m. on Monday and will include comments from national directors and board committee reports. The National Heifer Sale and the Ohio Convention Sale, over 75 top pedigreed animals will be sold.

Proceeds from the National Heifer Sale go to the National Youth Fund which sponsors all national junior member programs throughout the year.

For convention ticket order and registration forms, contact Lee and Becky Kohler, 5745 Burchey Road, Baltimore, Ohio 43105. Lodging reservation information can be obtained from the Quality Inn, 4900 Sinclair Road, Columbus, Ohio 43229.

Order 4 sets Class I price

Alexandria, Va. — Middle Atlantic Order Market Administrator Joseph D. Shine today announced a Class I milk price of \$15.37 per hundredweight for April 1983. This price is down 3 cents from March's price but is 13 cents higher than last April's Class I price. Order No. 4 prices are announced for milk testing 3.5 percent butterfat f.o.b. plants located within 55 miles of Philadelphia, PA and also within 75 miles from the nearer of Washington, DC or Baltimore, MD. There is also a 6-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Mr. Shine announced a Class II milk price of \$12.63 per hundredweight for February 1983 and a butterfat differential of 16.9 cents for the month. The February Class II price is down 4 cents from January, while the butterfat differential is unchanged.

These class prices are based on the February 1983 Minnesota-Wisconsin manufacturing milk price of \$12.59 per hundredweight at a 3.5 percent butterfat content.

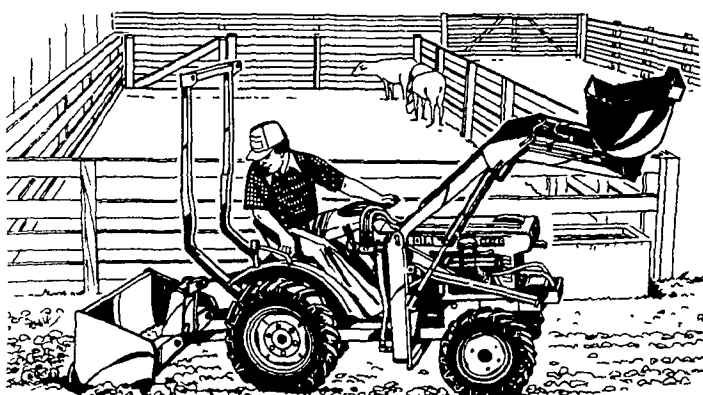

The USDA reported the wholesale price of Grade A butter at Chicago for February was \$1.4725 per pound and the nonfat dry milk price was \$.9393 per pound, f.o.b. plants in the Chicago area.

Maximuck receives conservation award

DOYLESTOWN — The Bucks County Conservation District named Walter Maximuck its "Conservation Farmer of the Year" for 1982 at the annual luncheon of cooperating agencies Tuesday, March 1, at the Warrington Motor Lodge restaurant.

Maximuck, a Buckingham Township grain farmer, received the award for "Outstanding accomplishments in conservation of soil, water and related resources." The ten-year program has resulted in completion of ten terraces and accompanying retention basins on the 102-acre Lahaska farm.

Working closely with the Soil Conservation Service and Soil Technician, Wylie McFarland, Maximuck has completed all but one field on his farm. He explained that McFarland surveys the project and lays it out; they discuss it and modify it to fill the particular needs of his farm; then proceed to carry out the plan.

The initial question is to figure how large an area must be drained. The amount of water dumped by a "100-year rainstorm" is then computed. With these figures as a base the terrace is built so that any run-off is slowed down, and all water is piped into a

nearby creek over a 24-hour period.

There is over ¾ mile of underground pipe in the project beginning with four-inch at the top of the system and expanding up to eight inches at its discharge point into the creek. Each terrace is sloped into a retention pond that holds all of the run-off of a particular field. Each pond has a drain that is connected to the pipeline system. The drain consists of a capped metal pipe extending above the ground for approximately 24 to 30 inches. A series of one-inch holes are cut into the sides of the pipe enabling the water to slowly drain into the pipe

from whatever height it reaches in the retention pond.

Each terrace is connected through the drain pipe system, and a few wet spots have stone bases and perforated pipe to carry off the water.

Maximuck says in the 10 years that he has been carrying out the program, he has completely eliminated ditches, gullies and washouts. In previous years, township trucks hauled loads of soil onto the farm from various highway projects. This soil was used to fill gullies and washouts and sod was started to prevent erosion. It took an average of two years for a waterway or gully to

return, usually in the same spot, and the hauling process would begin all over again.

The terraces have eliminated ditches that could not be crossed with a tractor, and removal of hedgerows has enabled Maximuck to make one long field where previously there had been two. He says there is a definite saving in fuel, energy and time by the elimination of unnecessary turn rows. The slope of each terrace is gentle enough to be farmed, but still deep enough to hold back the run-off.

He farms a total of 560 acres and plants corn, wheat and soybeans. —H.S.

U. of Del. offers six \$500 'insect' scholarships

NEWARK, Del. — The University of Delaware is offering six \$500 scholarships to well qualified entering freshmen (September 1983) interested in majoring in entomology or combined entomology/plant pathology in the College of Agricultural Sciences. Students in these fields often find rewarding careers in the agricultural divisions of major corporations, with pest control companies, with state and federal regulatory agencies, or with the emerging companies specializing in integrated pest management services.

Candidates for the scholarships should have B or better grades in biology, and be in the upper 30 percent of their graduating class. Documentation supporting their interest in the natural world as well as their academic ability would be helpful. Interested individuals should write to Ralph P. Barwick, 114 Agricultural Hall, University of Delaware, Newark, DE 19711.

Entomology is the study of insects from several standpoints including their interaction with other living organisms and the environment, plus insect control including modern concepts of biological control and integrated pest management.

"We have a young, energetic faculty. Our curriculum emphasizes the role insects play in the agricultural ecosystem," says Dewey M. Caron, head of the university's department of entomology and applied ecology.

Students who major in entomology develop the skills to identify the many kinds of insects that affect everyday life. They also learn aspects of insect biology and control.

At the University of Delaware two majors are available to students who are interested in the study of insects: entomology, which emphasizes insects and related sciences; or entomology/plant pathology, which emphasizes the unique association of insects with certain plant diseases.

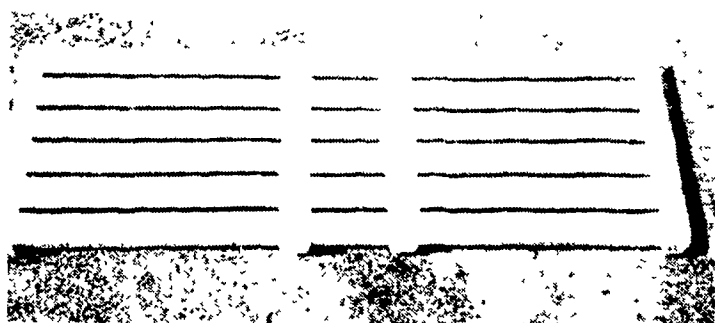

"This is a particularly favorable time for individuals trained in these fields," says Caron. A department survey of recent graduates shows 70 percent are working in the area for which they trained.

There is no application deadline for Delaware residents. Out-of-state letters must be in by the end of March. Prospective candidates are encouraged to apply when they seek admission to the university.

A BALING BREAKTHROUGH

Krone Round Balers

A totally NEW concept in baling machinery, the Krone line of round balers features an endless chain conveyor without belts. Closed chamber reduces problems associated with conventional belt type balers. Less horsepower required for the Krone Round Baler's fewer moving parts means great energy savings. Produces weather resistant bales with hard outer wrap and medium density core for better curing. Available in two models for bale diameters of five or six feet.

If you plan on baling cornstalks this year and don't cherish the idea of fighting problems with your old baler, See for yourself.

Call or write your distributor today to arrange for a demonstration with a KRONE BALER.

HOW DO YOU KNOW SHE'S GETTING THE MINERALS SHE NEEDS?

A cow's mineral requirements are complex, varying according to her lactating cycle, the time of the year, and the quality of feed. That's why you need the professional advice your Wayne® dealer is trained to give you. By analyzing your herd and

your feed, we'll custom design a mineral program around Wayne's Dairy Minerals that will keep your herd producing at peak rate. So you don't have to know everything about minerals, you just have to know your Wayne dealer.

—Only your Wayne dealer has it.—

"LANCASTER" CONVEYORS
TAPER BOARD FEEDERS
BELT FEEDERS

"LANCASTER" BELT FEEDER
The Quiet, Economy Unit
For No Separation Feeding
DOES A BIG JOB FOR LITTLE MONEY

Livestock Feeding is Simple and Easy with a "Lancaster" Taper Board feeder. The conveyor principal of moving the feed is used by cutting a Taper in the bottom to correspond with the length of the feed trough. Feed is distributed evenly on the center of the trough. Silage and grain can be fed with Taper Board Feeders using very low horse power and a minimum of noise. Wood construction of these units assures long life and fewer repairs.

Convey your Haylage, Silage, or Grain with the "Lancaster" Double-Chain Conveyor. Built with long lasting wood construction. Available with #55 or #62 chain. Wood slats move material in great volume and will not rust or corrode. Drive Unit designed for low horsepower. Simple - Quiet - Low Maintenance makes this unit the design that is most asked for in the conveyor market today. Units in stock.

"LANCASTER" CONCRETE STAVE SILOS
NO PRICE INCREASE FOR 1983 ORDERS.
LARGEST SAVINGS EVER FOR EARLY
DELIVERY & EARLY ORDER DISCOUNTS.
ASK US FOR DETAILS ON LEASING OR
DELAYED PAYMENT PROGRAM.

**5 YEAR
SILO
DEPRECIATION**

The Economic Tax Recovery Act of 1981 makes it more advantageous than ever to buy a new concrete tower silo this year! Now you can completely depreciate the structure in only 5 years! Not over 12 or 25 years as in the past. Faster depreciation means Uncle Sam takes less of your hard earned profit. And a lower tax bite means more money in your pocket. So to take advantage of the benefits of the new tax laws, call your accountant. And to take advantage of the benefits of a new concrete silo call us.

ASK OUR SALESMEN ABOUT
HAVING A 20x60 LANCASTER SILO
BUILT FOR YOU FOR ONLY \$280.00
PER MONTH PAYMENT W/OUR
LEASING PROGRAM.

RISSLER FEED MIXERS

More and more farmers are finding that mixed rations are producing healthier and better livestock, plus better feed efficiency. Veterinarians, nutritionists consultants and feed analyst are recommending (TMR) feeding systems. Perhaps you can also increase profits by turning to this system.

This **UNIQUE** design was developed so farmers can have more for less. A 15,000 lb. pintle web with 2" high paddles will tumble feed from end to end. An auger with left and right flighting will bring feed to center and keep the pile crowned. This auger will mix the feed from side to side at the rate of 1200 lbs. of feed per minute and will unload when drop out is opened. Convenient crank allows flow from 0 to 1500 lbs. a minute whatever desired.

Box is coated with urethane on inside with glass like finish that is abrasion resistant. All stress points are lined with 1/4" and 5/16" heavy steel. Heavy duty bearings are all regressable and easily accessible. Takes less HP than conventional mixers.

Optional stainless steel floor. Electronic or mechanical instant-weigh scales.

For more information and our low prices, Call or Write

AG-RAIN WATER-REEL

The reel irrigator with so many advantages all rolled under one name.

- **Radial Inflow Turbine Drive** - originated and patented by Ag-Rain. It's the most efficient turbine drive on the market - it saves energy. Unit is totally gear driven - reel has roller cog drive - no inefficient V-belts.
- **Speed Compensator** - maintains uniform travel speed - assures uniform watering.
- **Tachometer Speed Setting** - convenient, direct read-out of ground speed. Set and forget.
- **No Wasted Water** - all the water goes through the gun sprinkler - none is dumped on the ground.
- **Reel Swivels** - easily on ball bearings - irrigates up to a half mile from one position.
- **Dwell Timer** - delays start of travel - results in uniform end of field watering.
- **Four Models** to choose from - 4 1/2 inch x 900 feet, 4 1/2 inch x 1150 feet, 3 1/2 inch x 1250 feet, or 3 inch x 880 feet.

FARM EQUIPMENT

FARM EQUIPMENT

VEIL ROCK PICKER

Shown below is Size No. 60275 with 6' swath & 2 3/4" tine spacing... the 2 Mounting Brackets and Plates with arms are for a 4 cylinder loader (2 tilt cylinders).

RUGGED 1 1/4" SQUARE SPRING STEEL TINES

No need to rely on others to pick your rocks - just hookup your Front End Rock Picker anytime and do the work of 8-10 men.

When you are finished just pull the pins or release your QUICK-TACH and set the rock picking assembly aside until you need it again.

EXCLUSIVE FEATURES

MODEL EG ADAPTS TO ANY LOADER!

- All regular 4 cylinder loaders
- All QUICK-TACH Loaders
- Skid and Uni-Loaders
- Loaders with trips
- 3 cylinder loaders (1 tilt cylinder in center) require a 3rd Mounting Bracket, Plate & Arms.

Attaches just like your bucket.

Our Patented Brackets & Mounting Plates Clamp on any place on Cross Bar to be in line with your Loader Arms & Cylinders and DO NOT INTERFERE with tines or spacings.

Backed by over 30 years experience
manufacturing rock handling equipment

10% Discount on all cash sales!

3 WEEKS ENDING MARCH 31st

This Is Your Opportunity To Buy At A Special Price And Save

Offset Harrow Model 127

NO SIDE DRAFT Side draft has been eliminated from the Rhino 127 and 167 because we offset the mainframe to the left, shifting the center of gravity on the gangs. This arrangement distributes pressure as needed across the gangs for uniform penetration — and it keeps the harrow running straight behind the tractor at all speeds.

RIGID 1½" SQUARE AXLES Heavy 1½" square, high carbon, cold-rolled steel axles provide maximum strength and resistance to twisting and bending. Axles are precision crafted to keep bearings in perfect alignment.

TAPERED DISCS Two decreasing diameter blades on the outside of the right rear gang eliminate ridges left by most harrows.

In Stock:

Setup, 11 Ft. Cutting Width, Setup w/Dual 11L Tires, 24" Cut Out Blades Front & Rear, 9½" Spacing, Weight 4178 lbs.

Serial #3342 and #3341

SPRINGTIME WHOLESALE DISCOUNT SALE

3 Weeks Ending March 31st

NEW MODEL 315 Bush Hog's 15' Flexible Rotary Cutter

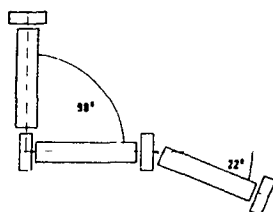

Bush Hog's new flexible model is designed with the center unit to the rear. Weight on the tractor drawbar is reduced by one-half, and wheels on the center unit and side units are positioned so that weight is distributed evenly scalping is virtually eliminated. Rear positioning of the center unit permits a protective band around the center section, an important safety feature.

Wheels on the two side units convert to rear inset wheels for close cutting. Bush Hog offers 3 wheel arrangement options on the center unit: single, tandem, or automotive.

Standard Equipment
adjustable slip clutch front guard flexible
shock absorbing coupling transport safety
latch uplift blades jackstand

Optional Equipment
highway chains winch control available
in three wheel arrangements hydraulic
controls round blade holders

BUSH HOG DESIGN
FEATURES GIVE YOU
MAXIMUM FLEXIBILITY

Free floating hinged side units follow the contour of uneven terrain cut effectively from 90° up to 22° down!

DEMAND BUSH HOG

...world's most copied rotary cutter

The self leveling tongue on Bush Hog's flexible rotary cutter keeps the center unit — and in turn the side units — parallel to the ground at all times. This ensures a smooth even cut. From the heavy gauge metal of the main frame to the heavy duty gussets, braces, axles, tongues and gearboxes, the flexible cutter is built with plenty of Bush Hog's rugged, famous

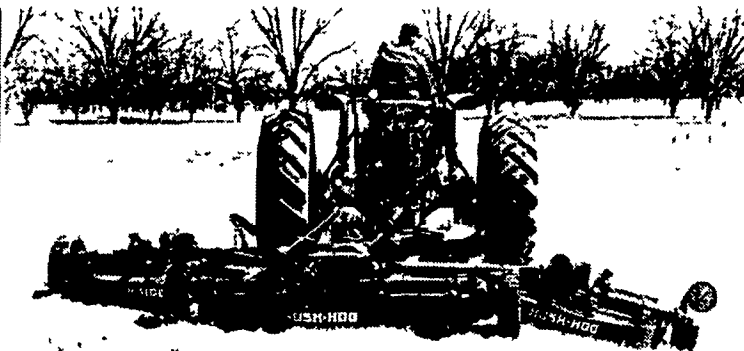

muscle. The three sets of spring steel, free swinging blades overlap 6", assuring a complete cut.

Bush Hog heavy construction and high performance features set this new flexible rotary model apart from the ordinary. Like all Bush Hog cutters it's the most durable, dependable, and versatile of its kind!

RHINO ATHENS MODEL FLEX 90B

No Need To Demonstrate This Machine...
IT HAS PROVEN ITS PERFECTION!

Rhino gives guaranteed satisfaction; Buy with confidence from a reliable dealer - many other farmers have!

SUPERFOLD EXCLUSIVE - Approx. 10'6" Transport Width On Models Up To 19 Foot.

Guaranteed Quadraseal Bearings The unique Rhino double row tapered roller bearing is guaranteed for two years and provides greater life and dependability than competitive bearings. The Quadraseal double row tapered roller bearings offer more capacity than single row ball bearings.

Spring Bearing Hangers reduce shockloads to the blade axles bearings and frame when working in fields with rocks or stumps. The Rhino 1" x 2" spring bearing hangers provide maximum strength add protection and reduce downtime expenses. The Rhino Quadraseal gang bearings are trunnion mounted to the spring bearing hangers to allow the gangs to flex freely without undue stress being placed on the gang axle.

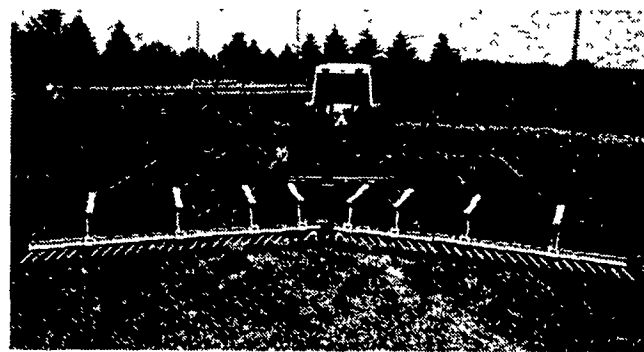

Stop around or call - you will be more than satisfied!

Heavy-duty intake flighting to give added life. Wire screen cage provides protection.

Ruggedly constructed scissor-type undercarriage "tucks away" to get in close to bins for maximum reach. Trussed axle arms for strength and stability at any angle.

Flex tubes are available optional in 3', 5' and 8' lengths for both 6" and 8" augers. Total flexibility allows bending in any direction to funnel flow of grain into hard-to-reach places.

Berks County's Full Line John Deere Dealer
 Serving the Oley Valley 46 years 1936-1982

**Three big reasons
 you can't afford
 to not buy a new
 Deutz-Fahr tractor...
 RIGHT
 NOW!**

DX series
 84 to 140 pto hp

07 series
 43 to 73 pto hp

**1 No interest 'til Jan. '84! *†
 Or 9.9% for up to 48 months!†
 Or up to \$7,000 cash savings!***

Excellent financing — first big reason you can't afford to not buy a new Deutz-Fahr right now. Three great options...choose the one that fits your cash-flow and tax situation best! Cash savings offered on 10 models, 43-140 pto hp (each 2- or 4-wheel drive): D 4507 (43 hp) and D 5207 (51 hp) — \$2,000; D 6207 (60 hp) —

\$2,000; D 6807 (68 hp) and new D 7807 (73 hp) — \$2,500; DX 90 (84 hp) — \$4,000; DX 120 (110 hp) and DX 130 (120 hp) — \$5,500; DX 140 (130 hp) and DX 160 (140 hp) — \$6,500 Cash! Or interest waiver! Or low 9.9% rates! Our financing has never been better... may never be this good again! (Scheduled to expire April 1, 1983)

2 Big fuel savings that help the tractor pay for itself!

Fuel savings of hundreds, up to thousands, of dollars per year! Another big reason to buy now! Find out from your dealer exactly how

much you can save. (And check the additional savings of our exceptionally low repair and maintenance costs and big resale value!)

3 A good dealer who'll make a last-of-its-kind deal and stand behind you!

See your Deutz-Fahr dealer now for all the details... and be sure to ask for a demonstration on your farm!

* 17.0% APR financing available • If financed through Deutz Credit Corporation

NOTE: Rebate on New 78 Series DX Tractors is Slightly Lower.

THE BISON DIESEL

The top "PERFORMER" with more features for your money.

Rugged, powerful and versatile the 30 hp Bison Diesel gives you the speed for large turf applications, the precision for farm field use and the strength for loader and backhoe work.

And the Mitsubishi Bison Diesel has **Standard Features** like, **Power Steering, Dual Clutch and Draft Control**—features that are optional and cost more on other tractors.

Plus:

- Dual-range, eight-speed transmission
- 2 or 4 wheel drive
- Category I, 3-point linkage
- Two step live PTO
- High-ground clearance for row-crop work
- Power and traction for soft or steep terrain
- Vertical muffler for lower noise levels
- Fuel efficiency for low cost operation

Stop by and test drive the "performer" today—one of the finest high-performance tractors in any size category.

NEW IDEA

**It can eliminate
40% of all your engine
maintenance problems.**

A Deutz AirDiesel is a true no-nonsense engine. There are no troublesome components such as hoses, fans and radiators associated with liquid-cooled engines. A Deutz is cooled by air and is engineered to save you up to 20% in fuel over other diesels. Over one million AirDiesels from 5 to 500 HP are working in all fields of application throughout the world.

**KHD
DEUTZ**

90% of all multi-cylinder air-cooled diesels
in service today are Deutz

**GUNITE
Silo Relining
& Repairs**

Extensive tests have
been conducted on
Gunite. Below are
some of the properties
of Gunite:

1. Excellent bonding
2. High Density
3. Extreme strength
and hardness
4. High resistance to
absorption

The excellent physical
properties of the
material are due to the
water content being
only the amount needed
to satisfy chemical
hydration.

Reseal and re-
strengthen your silo
with Gunite

**SUCCESS BREEDS SUCCESS.
AND 65 YEARS OF SUCCESS BUILT
THIS NEW MADISON SILO.**

Today, one out of
every four silos in
America is a Madison!
That's because a lot of
our new structures
are erected on farms
that already have at
least one Madison.
These customers
know that a Madison
is built to last. They
also know that if
there is a new idea
that's better, chances
are Madison will have
it first.

New Madison customers quickly learn
that Madison dealers
do more than talk
about service. For 65

years, our service
people have been
building a reputation
for good service that
can't be beat.

When you're
ready to add upright
storage on your farm,
we invite you to
compare. Look at all
of the structures available. All we ask is
that you include us in
your comparisons.
We'll take it
from there.

Stakeless Bodies

by OMAHA STANDARD

**Real
GRAIN
POWER!**

Heavy gauge steel sides with deep corrugations for maximum strength. The Stakeless is available with either 52" or 60" high sides and standard lengths of 18', 20', 22' and 24'. Greater inside width and length. Ideal for hauling grain, sugar beets, bagged or palletized products.

Rear options include two or three section full opening rear doors and automatic beet or silage gates.

Complete your "Grain Power" package with an Omaha Standard work-proven hoist. Choose from the most complete line of scissor or stabilized "Olympic" telescopic hoists. There's an Omaha Standard hoist for any size Omaha Standard stakeless body.

Compare any of Omaha Standard's full line of steel, aluminum or wood grain bodies and rugged hoists. You'll know why Omaha Standard is the most respected name at work on the farm today.

NO MATTER HOW TOUGH THE JOB, LET BADGER TAKE CARE OF YOUR MANURE HANDLING NEEDS.

SOLID

New!

Badger Northland introduces the Revolutionary QUICK-LINK Chain Connector

Simple and easy to disconnect when necessary but doesn't unhook when you DON'T want it to

And remember these fine Badger Barn Cleaner features:

- Heavy Duty Spur Gear Transmissions
- 10 Gauge Cor-Ten Steel Gutters
- One Piece Cast Iron Frame
- Paddle Tip Up Assures Proper Chain Lubrication

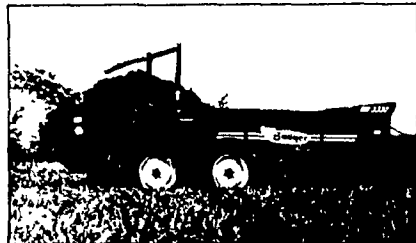

Versatility makes a Badger Barn Cleaner perfect for your operation.

- Any gutter arrangement
- Floor mounts for moving material to transfer pumps
- Paddles up to 4 feet long for under hog slats or calf pens
- Corner tighteners for proper chain tension on floor mounts

Badger chains replace most brands, including those troublesome hook link chains. In most cases it's a simple easy conversion — see your Badger Dealer for details.

Badger Barn Cleaners Now Feature QUICK-LINK Connectors

BADGER'S NEW 3320 BU. SPREADER... WITH GLASS-LIKE FLOOR

Hard, slick and smooth like glass! Hydraulic apron drive in five unloading speeds guaranteed wood floors and sides tandem axle walking beam gear a choice of apron chains and replaceable spindles plus many optional accessories

Here's a Badger Spreader with more capacity and a guarantee that can't be beat!

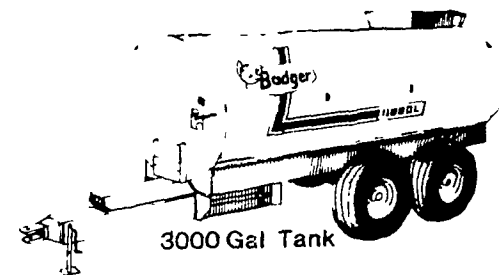

That's why Badger designed their BN3210 and BN3260 Manure Spreaders with extra truck level capacity. The 3210 has a 220 bushel heaped capacity 143 cu ft truck capacity. The 3260 holds 260 bushels heaped and 166 cu ft truck

LIQUID

**3 NEW TANKS
NOW AVAILABLE**

- 5180

**Equals A Total of 9
Badger Liquid Manure Tanks On The Market.**

Pump...Agitate...Fill!

The versatile Badger Northland Pum / Agitator is available now!

The portable Badger Northland BN 103 is built for years of dependable, high capacity performance. Designed to pump and agitate pits or lagoons it can also be used as a manure transfer system for transferring manure from holding pits to lagoons or other storage facilities. Choose the gearbox that matches your tractor's horsepower and PTO RPM.

The BN 103 features an agitator nozzle which sweeps a full 300° for thorough agitation. Reaches all corners of the pit or lagoon.

The pitched blade of the "Souper Charger" moves material into the impeller for smooth, high capacity pumping. The semi cupped design of four paddles develops more pressure for mixing settled solids. Breaks up crust.

Pow-R-Ram Manure Transfer System

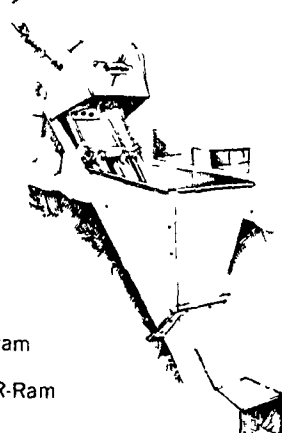

Badger Northland, the manure handling experts have done it again. They've designed a powerful manure transfer system that's unmatched in power, dependability and efficiency.

You'll get your money's worth with this rig brute. The key is the new improved piston design that features doubled bearing areas which assure smooth operation and longer life. The transmission, the business end of the system, is specially designed to perform its strong arm duties quietly and with minimum maintenance.

Three transmission options make this system ideal for stacking, slab-semi solid, basin or structure-liquid operations.

Two hopper options let you tailor to your needs and the Pow-R-Ram easily installs in a self contained concrete form.

Add some punch to your manure handling system with a Pow-R-Ram. See your Badger Dealer now.

The Badger Souper-Trail Lagoon Agitator/Pump for long reach... fast agitation and fast fill.

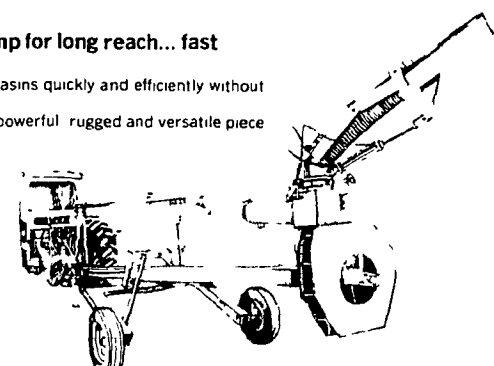

Now you can pump solid or liquid manure from storage basins quickly and efficiently without the need for ramps or docks.

That's right. The Badger Souper Trail Agitator/Pump is a powerful, rugged and versatile piece of equipment. It transports easily behind your tractor.

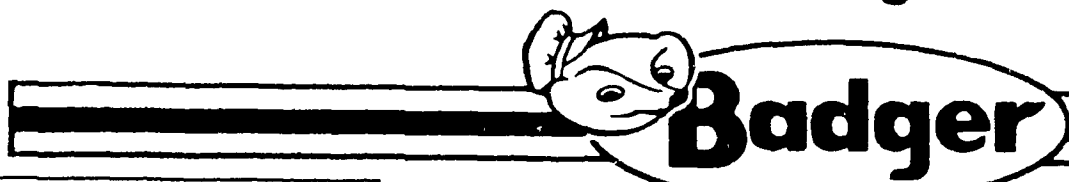

The Souper Trail is easy to position and can be used in any depth lagoon. And its long reach and high capacity pumping allows for fast, economical agitation of large manure basins. It will quickly fill even the largest manure tank.

Other features include a special chopper blade rotating ahead of the impeller housing. The heavy duty hydraulic controlled spout breaks up large clumps and surface crust. Mixes settled solids.

Your dealer has two Souper Trail models available for use with either 540 or 1000 tractors. See him now and count on him for all your manure handling system needs.

Badger Northland is "Setting the Standards" for 1983

Sen. Hayes sees ag development approval

E-Town Young Farmers hear ag legislative report

MOUNT JOY — The Elizabethtown Young Farmers honored outstanding members, installed new officers and heard a state ag legislative report last Saturday night at the chapter's

annual banquet at Hostetter Dining Hall.

Featured speaker at the banquet was Sen. Samuel E. Hayes Jr., State Senate Majority Whip. In his ag legislation report, Senator

Hayes predicted the Ag Development Bill, which will provide the same low-interest loan incentives for ag development as are now enjoyed by industry, will be passed by both state legislative bodies and signed by the governor this year.

Among the outstanding members honored were:

—L. Clair Miller, Outstanding Young Farmer under 30.

—Galen and Lilli Ann Kopp, Young Farmer and Wife Community Service Award.

—Robert N. Brandt, Most Improved Dairy Herd for milk and fat increase. The Brandt herd showed a milk increase of 2,474 lbs. and a fat hike of 93 lbs.

—Meadow-Vista Farms, of the Risser Brothers, the high herd for milk and fat with an 18,057-lb average for milk and 662 for fat.

—Crop production awards went to Robert Brandt, barley; Gilbert Martin, alfalfa hay with less than 10 percent grass; Clair Oberholtzer, corn silage; Gerald Risser, haylage.

New chapter officers who were installed by Vernon Leininger, State YF officer, were:

Dennis Drager, president; Galen Kopp, vice president; Dennis Umbrell, secretary; Gerald Risser, treasurer; Joe Wivell, public relations; and Gilbert Martin, chairman of the nominating committee.

An appreciation award for his continuing service to the chapter was presented to William Erikson, YF and FFA advisor and vo-ag instructor at Elizabethtown High School.

Retiring president of the chapter is James Hershey, who served as banquet toastmaster.

Also participating in the program were Kim Erikson and Gregg Musser, of the Elizabethtown FFA Chapter, who explained the symbolic importance of the five major elements of the FFA emblem.

Senator Hayes, who was honored last year by the National FFA with his Honorary American Degree, reviewed the past legislative session in Harrisburg, stressing the continuing progress in ag bills sponsored and passed into law by the Thornburgh administration.

He defined the 1981-82 session as the "most productive ever for agriculture."

As examples, he cited farmland preservation, noxious weed bill and increased vo-ag reimbursement.

He also explained that the administration is also concerned with the State Extension System and has placed a line item in the Penn State budget to protect Extension.

(Turn to Page D4)

Award for high milk and fat averages among E-Town YF members belongs to Risser Brothers, Gerald, left, and Bryan.

Outstanding Young Farmer under 30 award in Elizabethtown is displayed by the L. Clair Millers.

Galen and Lilli Ann Kopp with Elizabethtown Young Farmer Community Service Award.

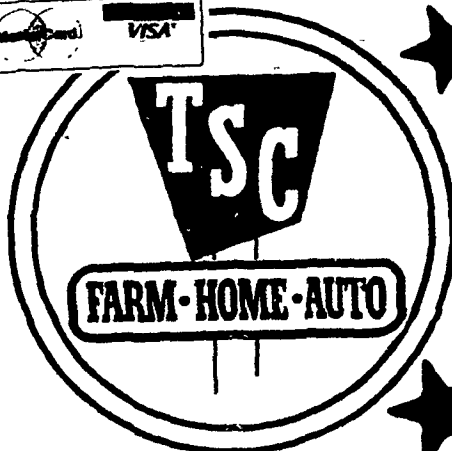

Most improved herd award of Elizabethtown YF went to the Robert N. Brandts.

Crop awards at Elizabethtown YF banquet went to Clair Oberholtzer, left, corn silage, and Gilbert Martin, alfalfa hay.

New officers of Elizabethtown Young Farmers include, from the left, Joe Wivell, public relations; Gerald Risser, treasurer; Dennis Drager, president; Galen Kopp, vice president; Dennis Umbrell, secretary; and Gilbert Martin, chairman of nominating committee.

Wild horse adoption fee is reduced

LEWISBERRY — The fee for adopting a wild horse through the Wild Horse and Burro Adoption Center in Lewisberry has been lowered by \$75.00, the U.S. Interior Department's Bureau of Land Management (BLM) announced. The fee drops from \$290 to \$215 for each wild horse, and remains \$140 for each burro.

"We are reducing the fee in response to public comments we received on our new adoption regulations," BLM Eastern States Director G. Curtis Jones, Jr. said. "By lowering the fee, we hope to increase the number of wild horses adopted, reduce the cost of the program to the Government, and still discourage persons who might adopt merely for purposes of commercial gain."

BLM opened the Lewisberry facility - the first of its kind on the East Coast — in July 1982, in order

to make it more convenient for Easterners to participate in the adoption program. Since the center opened, adopters have come from as far away as Maine to pick up some 300 animals.

Frank Goodlander, who operates the Lewisberry center under contract to BLM, said there are dozens of horses and burros currently at the center to choose from, but added that he expects demand for the animals to jump with the reduction of the fee.

The regulations lowering the fee also require potential adopters to submit a nonrefundable \$25 advance payment with their applications. The advance payment will be applied toward the adoption fee when the applicant picks up his or her animal. According to Jones, the advance payment is being imposed in order to create a more

reliable applicant list. In the past year, he said, less than one applicant in ten actually adopted an animal.

Adopters who paid the \$290 fee for a wild horse in Lewisberry will soon receive a \$75 refund from BLM. "That money could go a long way toward adopting another animal," said Jones, who hopes many past adopters will reinvest their refund in another horse, or perhaps their first burro.

BLM began the adoption program nationwide in 1976, as a means of reducing wild horse and burro herds that crowd overgrazed public lands in the West. Since then, more than 42,000 horses and burros have been placed with adopters in every state but Delaware and Hawaii. Wild horses can be gentled and trained for riding, farming, and other non-commercial purposes for which domestic horses are used. Burros

usually are adopted simply as pets, but also can be used as pack animals.

Adopters, who may pick up as many as four wild horses or burros in a year, must have adequate facilities for their care. For the first year following the adoption, each animal remains the property of the U.S. Government. After that, if the animal has been cared for humanely, the adopter may apply to receive title from BLM.

DVC to hold A-Day

DOYLESTOWN — Delaware Valley College will hold its 35th Annual A-Day on Saturday, April 30, and Sunday, May 1.

Livestock, agriculture products, floral arrangements, science and farm machinery are exhibited and judged at this fair. There are

equestrian, dairy, livestock and farming contests of skill, petting and riding animals for children.

The science and agricultural exposition will be held on Saturday 9 a.m. to 6 p.m. and Sunday from 9 a.m. to 5 p.m.

E-town YF

(Continued from Page D2)

"I have both good news and bad news for agriculture," he said.

As good news he predicted the passage of the ag development bill.

But, he explained, concern must be expressed about the political shift toward metropolitan areas and how it may affect agriculture - the Number One Economic Enterprise in Pennsylvania.

He had praise for Lancaster County's legislators and their efforts on behalf of agriculture,

including Noah Wenger, who has since moved from the House to the State Senate, and State Rep. Kenneth E. Brandt.

Senator Hayes also expressed concern about the efforts to make Lincoln University, a second land-grant university in the state.

"I just don't see any good reason for a second land grant university in Pennsylvania," he said.

"I don't think the proposal is in keeping with good public policy." —DA

Brockett's Ag Advice

By John E. Brockett
Farm Management Agent
Lewistown Extension Office

IS YOUR FARM A BUSINESS

Some people worry about image. Others worry about profits. Those who will succeed worry about neither but are concerned about both. The answer to the question "Is your farm a business?" is yes; but do you run it as such? The answer to that question is a bit more difficult to handle.

Too many farmers do not accept the fact that they are businessmen. A while back the "Wall Street Journal" had an article on the woes of agriculture. One of the questions asked in that article really struck home. It was: "Are there too many farmers?"

I did not like either the question or the connotation. On the other hand, it made me once again realize that farmers are often their own worst enemies. Nothing illustrates this more dramatically than the way they conduct their every day business.

BUSINESS PRINCIPLES

No business is immune to

making management mistakes (a good example would be the Edsel car). But every businessman should use good business principles in making managerial decisions. Two of these principles are: will it increase income enough to justify the cost; and can I prove its merit through budgeting to a skeptic such as a spouse who remembers financial mistakes made on the farm costing money or that guy who writes this column.

Those farm managers who will be the survivors are the ones who are willing to explore and answer both of the above questions.

Notice I said explore and answer in that order. Farm managers who are now operating the farms that will be out of business a few years down the road will answer the questions without exploring them. Their answers will be: "sure it will increase income because the salesman said so or the neighbor has one;" "it should increase income because all the big farmers have one;" "I guess it will increase

income but who cares because it looks nifty;" "that's a stupid question because I don't know the answer;" or "I never gave it a thought."

DEBT CARRYING ABILITY

People love to work with so called "rules of thumb." One rule that works for everyone is never carry more debt than your income can service.

Sounds almost too simple doesn't it? However it is one "rule of thumb" that works practically every time.

Farm managers who are determined to succeed in the highly technological business of farming will learn to calculate their debt repayment ability. If it is not high enough to handle the load that the farmer requires for the job he wants to do, there are some alternatives. The farmer could: increase debt repayment ability by increasing income in relation to expense; refinance debts to meet repayment capacity; decrease debts by selling surplus capital items; put off some desired changes until cash position has become improved; regroup to see if the desired goal could be accomplished for less money or in a less expensive way or with resources already on hand; or go ahead with plans and hope for "pie in the sky."

None of these alternatives are easy and all but Number 6 will take a lot of real thought and hard work.

USDA will release PIK statistics

LEESPORT — The Berks County Agricultural Stabilization and Conservation Committee Chairman, Donald E. Lutz, reports that the U.S. Department of Agriculture's Statistical Reporting Service will issue a special report March 22 at 3 p.m. detailing farmers' signup in the 1983 acreage reduction and payment-in-kind programs.

According to agency administrator William E. Kibler, the report will include data on the number of farms with base acreages and the number of farms enrolled, as well as total base crop acreage and the number of acres enrolled for feed grains, rice, wheat and upland cotton. He said the release will carry both national and state totals for each of the four program commodities.

Data, which will cover all states except Hawaii (but which will include Puerto Rico) will be summarized from raw signup figures channeled from county offices of USDA's Agricultural Stabilization and Conservation Service to Statistical Reporting Service state offices and tabulated

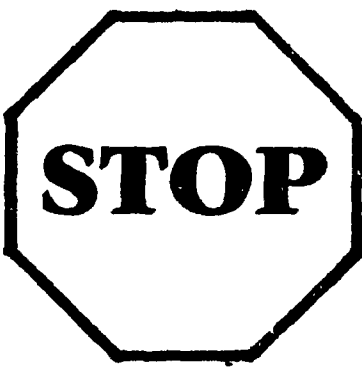

under security at USDA's Washington headquarters.

The special report also will provide state and national data on each of the program signups: acreage reduction, 10-30 percent PIK and whole farm PIK.

Farmers must participate in the previously announced reduced-acreage and paid-diversion programs to be eligible for program benefits such as Commodity Credit Corporation loans and purchases, PIK and target price protection. For wheat and feed grain producers, participation is also required to be eligible to enter the farmer-owned grain reserve.

The report also will indicate the percent of farms and base acreage enrolled, the acres required for conservation use, the base acreage of participating farms and total permitted acreage by states.

Because of the sensitivity of the enrollment and acreage data, the report will be released from the Statistical Reporting Service's lockup facility following the close of commodity markets.

Farm Business News

This MF290 is one of five newly introduced Massey two-wheel-drive utility tractors, also including the MF298, 270, 250, and 240.

MF offering total of 22 new machines for 1983

DES MOINES, Ia. — Massey-Ferguson is introducing 22 new farm machines — including eight two- and four-wheel drive tractors, cultivators, a self-propelled swather, hay tools and material handling equipment — to provide an even broader equipment and price range to meet farmers' needs.

A new series of three mid-range tractors features both two- and four-wheel-drive versions engineered to meet increasing customer demand for highly maneuverable, fuel-efficient tractors with factory-installed cabs to control the operator's environment. This new MF600 series includes the 78-pto-hp MF 698, the 65-hp MF 690 and the 55-hp MF 670.

Massey-Ferguson's new line of two-wheel-drive tractors in the lower horsepower range from 34- to 78-pto-hp include the MF 240, 250, 270, 290 and 298. This new MF 200 series is ideally suited for year-round primary and secondary tillage, light loader applications, dairying, mowing, landscaping, maintenance and general farm chore operations. These tractors are designed to provide maximum operating performance for the investment. Their basic features plus high reliability, fuel economy and price made them a good value.

In haying equipment, the new MF1550 and 1450 provide farmers with a more complete size and price range of round balers. The MF1550 produces a 5' x 6' bale up to 1700 lbs. and the MF1450 produces a 4' x 5' bale weighing up to 1500 lbs.

The new MF228, 224 and 220 rectangular balers contain a number of new features for easier transportation and improved feeding, bale density control and reliability. The new MF212 hydraulic drive bale thrower fits all three balers and has cab-mounted electrical controls for ease of operation.

Massey-Ferguson has added two parallel bar rakes to its current hay tool line. Available in 8-1/2 and 9-1/2 foot widths, the MF585 meets a broad range of hay equipment needs. A spring-cushioned floating basket reduces tooth breakage and the dolly wheel option provides greater stability. The MF588 twin rake is offered for high capacity raking of up to 23 feet of crop — yet it folds to a compact seven foot

transport width.

The new self-propelled, hydrostatically-driven MF885 swather has draper and auger headers with new performance and convenience features. Center-delivery, single-swath draper headers are offered in 15- and 18-foot widths. Double swath shifting deck headers come in 21-, 25- and 30-foot widths. Center delivery auger headers come in 12-, 14- or 16-foot widths with hay conditioners as standard equipment.

Massey-Ferguson is also introducing the MF440 flat-fold row-crop cultivator featuring 180° wing-fold on its massive 7" x 7" tool bar. This bar provides increased strength and reliability for its wide working range for high horsepower tractors.

The new MF151 conservation cultivator is designed for efficient one-trip seedbed preparation and chemical incorporation. The MF151 also chops stubble and incorporates residue to help prevent soil erosion.

The new MF301 Danish tine field conditioner meets farmers' precision needs for seedbed preparation and chemical incorporation as well as secondary tillage. Farmers have a choice of three-point mounted or pull-type hitch, available in rigid or folding versions.

The new MF557 high capacity grinder mixer will grind up to four tons of ration in four minutes. It features a 20"-wide x 26"-diameter hammermill plus 780 square inches of screen area.

A new loader, the MF238, is designed specifically for Massey's new 600 series tractors. It features a 3450-lb. lift capacity to 137" lift height, a new bucket shape and wrap-around, welded cutting edge.

Trade Tech develops forward contract plans

LANCASTER — To help farmers increase money income as well as provide protection from falling prices, Trade Tech Management, Inc., Lancaster has developed a managed forward contract program that uses the futures market to offset the cash market for hogs, cattle, and grains. In this managed program, Trade Tech decides when the market price is right and acts on behalf of the farmer.

Brown's focuses on dairy replacements

BY DONNA TOMMELLEO
Staff Correspondent

BLUE BALL — There can be no question the dairy industry is fast approaching the crossroads of its future. Just who will remain and who will profit amidst impending price cuts are questions dairy producers carefully must examine.

"The keys to staying in business will be making a good bit of milk and making it efficiently," said Carl Brown, one of several lecturers during a series of dairy seminars sponsored by F.M. Brown's Sons, Inc.

More than 100 knowledge-seekers attended the feed company's latest seminar, last Thursday, at the Blue Ball Fire Hall. Participants listened as experts focused their talks on raising young stock.

The road to an efficient dairy operation begins in the calf barn, Brown added.

"You should set a goal to produce a healthy, vigorous calf per year," he said.

However, Brown was quick to point out that calf health begins long before birth and stressed proper dry cow management.

Immediately after birth, producers should concentrate on completing three important items: early colostrum feeding; dipping navels in iodine; injecting vitamins A, D and E.

A newborn should receive about two quarts of colostrum as soon as possible to benefit from its ability to absorb maternal antibodies, said Brown.

The feed specialist suggested painting the navel twice within a 24-hour period and noted that dipping, not spraying, does a more effective job.

Iodine acts as a disease barrier by closing off a route of entry to the young animal and in addition dries up the cord.

Puffy hocks in cows, said Brown, have been traced to organisms that have entered the animal through the navel during the early period of life and have been triggered by stress.

Although the newborn may be a miniature replica of its dam, the calf is not a ruminant and a nutritional program must be geared to its development.

During the early days, colostrum, milk or milk replacer is channeled directly into the calf's abomasum or true stomach via the esophageal groove. Brown noted the importance of nursing a calf while it is standing with its neck outstretched.

In any other position, the milk may travel, instead, to the rumen where it could putrify causing the calf to bloat.

IMC offers beef rebate

STATE COLLEGE — Pennsylvania beef producers can help raise funds to promote their products through a new rebate program being offered by International Minerals & Chemical Corporation, leading producer of growth-promoting anabolic im-

plants. Because farmers produce and purchase livestock and grains on the farm this managed program can help farmers to sell or buy according to market trends. Anyone who would like information about the commodities market or a copy of Trade Tech's track record on the managed accounts for 1982 may write to 1020 Stony Battery Road, Lancaster, PA 17601.

Brown's sales manager Carl Brown, left, presents Grace E. and George E. Seidel, Sr. with a plaque in recognition of the Seidels' 800 pounds fat average. The Berks County couple operate Heindel Farm in Wolmesdorf.

Carl Brown

Ray Murley

Brown recommended feeding the calf colostrum for the first four days followed by a month-long calf replacer program.

He cautioned the participants to check ingredients on a bag of replacer to insure they contain digestible protein, such as milk protein.

Rumen function begins at about three weeks after birth and Brown noted that calves can be offered good hay at three days of age.

When raising that future replacement, Brown urged the group to observe the calves at least twice a day, treat immediately any sick animals and eliminate drafts.

Also at this year's dairy seminar, Ray Murley, former head of Dairy Extension at Virginia Polytechnic Institute and State University, was among the featured speakers. Murley, now a private dairy nutritional consultant, is best known as the co-designer of the Virginia Coun-

terslope Heifer Raising facility.

American Cyanamid representative Hal Hartwick was on hand to discuss Aureomycin and Tramisol — "two of the best friends your heifers and beef cattle ever had." Walter Kennett, F.M. Brown's nutritionist outlined Brown's beef production programs, as well.

Berks County dairy producers George E. and Grace E. Seidel, Sr. were lauded for their 800 pound fat average on 28 Holsteins. The Seidels operate Heindel Farms, Inc. in Wolmesdorf and also recorded a rolling herd average of 20,221 pounds of milk.

F.M. Brown's presented the Seidels with a plaque in honor of their achievements and highlighted one outstanding herd member, Heindel Strophon Le Louis, who turned in a top 3-year-old 365-day record of 24,585 pounds of milk, 3.8 test and 934 of fat.

efforts to convince consumers of the value of beef in daily diets.

Producers using the implants should mail the instruction inserts from the Ralagro or Ralabol cartridges directly to the Pennsylvania Beef Council, 862 Webster Drive, State College, Pa. 16801 with a note as to the name of the producer. The PA Beef Council is increasing promotion/education programs in Pa., as well as increasing the contributions from the Beef Council to the National Live Stock & Meat Board. According to J. Paul Espy, President of the PA Beef Council, "This program and other fund-raising efforts, such as voluntary check-off by producers on feeder cattle and slaughter cattle, will help to increase the promotion/education programs which the beef producers must carry on to keep beef No. 1 on the consumer's table."

Vicon Farm Machinery reorganizes

VIRGINIA BEACH, Va. — Vicon Farm Machinery, headquartered in Nieuw Vennep, Holland, has reorganized its United States operation into three separate operating companies and named individual presidents for each.

Formerly headquartered in Chesapeake, Virginia, that operation will continue at that location and be called Vicon Farm Machinery, Inc., covering the

northeast quarter of the country. Dennis Wright, formerly vice-president of the new organization.

Vicon Southeast will be headquartered in Memphis and responsible for the southeast quarter of the country. Charles F. Scholes has been named president. He formerly headed Agriquip, a Vicon-owned distributorship in Memphis.

Vicon Midwest is headquartered

in Champaign-Urbana, Illinois, and is responsible for Vicon's operations in the Midwest states. New president of Vicon Midwest is John Dougherty.

Western states will continue to be sold through farm machinery distributors, supervised by Clark Swan.

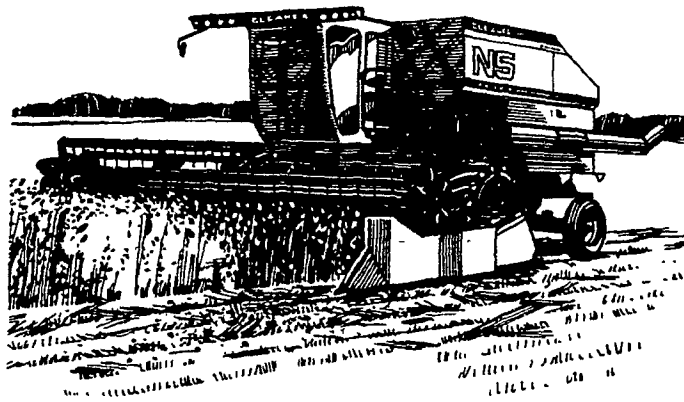

Dennis Wright has been with Vicon for eight years. He formerly was an assistant branch manager

for Rish Equipment. A native of West Virginia, he attended Concord College.

Charles Scholes, president of Vicon Southeast, is a native Tennessean and attended the University of Tennessee. He was with King-Wallace, Inc. for 15 years in Memphis before joining Vicon in 1980 to head up the Agriquip operation. He is former president of the Memphis Farm Equipment Club.

John Dougherty is a native of Florida and holds an agricultural degree from Cornell University. He joined Vicon after four years as director of marketing for Swartz-Arps-Burch-Kewanee, division of Chromalloy Farm equipment. He has spent most of his career in sales or marketing positions with manufacturers or distributors of short line farm equipment.

All three companies are independently managed and are currently staffing their organizations.

USDA extends period for pork comment

WASHINGTON, D.C.

— The U.S. Department of Agriculture has extended to April 25 the public comment period on its proposal to regulate the amount of added water in cured pork products by requiring specified levels of protein.

The original comment period was scheduled to end March 10.

"Extending the comment period 45 days will permit a fuller discussion by all groups of the many complex issues addressed by this proposal," said Donald L. Houston, administrator of USDA's Food Safety and Inspection Service.

The proposal — officially referred to as "Control of Added Substances and Labeling Requirements for Cured Pork Products" — would establish minimum protein requirements for the full range of cured pork products now being marketed. These protein requirements would be tied to the amount of added water remaining in a product at the time the consumer buys it. The proposal was made Nov. 10, 1982.

Public comments should be sent to FSIS Hearing Clerk, USDA, Room 2637s, Washington, D.C., 20250.

The Limerick Veterinary Clinic will sponsor a Herd Health Management program entitled "Nutrition and Production" on March 29, 1983. Speakers will be Dr. Galligan, Dr. Romberg, and Dr. Kronfeld from the Univ. of Penna.'s New Bolton Center. The meeting will be held in the Fellowship Hall of St. James UCC at 321 S. Limerick Rd., Limerick, Pa. Refreshments will follow. For further information call (215) 489-2848.

Southern buyers outline smoking tobacco requirements

LEOLA — Two southern buyers and John Yocum, of Penn State's Southeast Research Laboratory, gave some important tips to Lancaster County tobacco growers who want to grow leaf for the smoking market at a meeting sponsored by Organic Plant Food Co. on Thursday, March 3.

The session, attended by a capacity audience in the Leola Family Restaurant, also included representatives of chemical companies who outlined the latest in management practices for tobacco.

The southern buyers, who participated in the purchase of all of the Maryland leaf grown last year, included Jimmy Johnson, of the James I. Miller Tobacco Co., and E. J. Parker, of the firm of the same name.

Both explained that they are buyers of tobacco for other customers who are the end-users of

the leaf.

Since their customers require different grades of tobacco, both buyers stressed the need to get back in the old practice of sorting the leaf.

"Good grading is your insurance for a market for smoking tobacco," Parker said.

"You have a good opportunity for permanently establishing a market for Pennsylvania smoking tobacco."

Johnson continued:

"We see a market for mature, ripe tobacco. But it must meet the quality standards our customers want. Don't straight-strip your tobacco; it must be graded."

Yocum, who is starting up a tobacco newsletter and received an unsolicited \$1,000 grant from the two buyers, outlined some of the management practices that farmers interested in growing the smoking tobacco must follow.

Participating in tobacco information program, are, from the left, John Yocum, of the Southeast Research Lab at Landisville; E. J. Parker, buyer; Jimmy Johnson, buyer for James I. Miller Tobacco Co.; and Kent Fritz, of Organic Plant Food Co.

Again, he cautioned against using corn-type fertilizer or too much dairy slurry on tobacco fields with the smoking leaf. He recommended that tobacco fertilizer, potassium sulphate, must be used in order to lessen the chlorides in the leaf and improve the burn time.

In seedbeds, he advised the use

of Ridomil and told farmers to watch the amount of fertilizer used on the relatively small beds.

Concerning diseases, he cautioned that Maryland 609 tobacco is not resistant to wildfire or tobacco mosaic. And, a new strain of wildfire was found on one Lancaster County farm that even attacked the Pennsylvania

tobacco.

With tongue slightly in cheek, Yocum said the tobacco farmers could help the milk surplus by washing in milk to prevent tobacco mosaic in the Maryland leaf.

Yocum plans to periodically mail out the tobacco newsletter, which has also received a grant

(Turn to Page D9)

Chemical company representatives at tobacco meeting include, from the left, Tom Tulley, Dow Chemical; Dave Cote, Chevron; Jack Beideman, Ciba-Geigy; and Steve Fisher, FMC.

Tobacco

(Continued from Page D8)

from R.J. Reynolds. It would be sent out at critical times, such as establishing seedbeds, transplanting, about July 4 and then harvest. Interested farmers should get their names and addresses to him.

Jack Beideman, of Ciba-Geigy, outlined Ridomil management practices. He said that it is now available in quarts for seedbed protection of about 60 days. The systemic protection measures in fields include two quarts to the acre with shallow incorporation. Blue Mold has been reported in Central America and he reminded growers how it wintered over here two years ago.

Steve Fisher, of FMC, reported

on use of Furadan 4 Flowable at 4 to 6 quarts an acre as an insecticide and nematocide. Since it is a restricted compound, he advised proper handling or use of a custom applicator, like Organic.

Tom Tulley, of Dow Chemical, explained the use of Lorsban 4E, which was released last year for the first time. For wireworms and cutworms, it should be shallow incorporated for use as a soil contact agent.

Dave Cote, of Chevron, discussed Orthene's use as a contact and systemic in transplant water.

Also on the program was Ray Brubaker, of the Lancaster ASCS Office, outlining the tobacco referendum held last week.—DA

Distributor changes name

OXFORD — To serve local farmers better, a major farm equipment distributor has made arrangements to bring manure handling equipment from the Houle manufacturing plant in Canada.

US Agri-Systems, 3053 Barren Road, Oxford, (formerly US Farm Systems of Pennsylvania) now offers the well-known bull-strong liquid manure pumps, a new line of well-built underground solid manure pumps, a unique new Electromix System to mix and transfer liquid manure from a collection pit to the holding tank

and barn cleaners. This manure equipment now carries the Houle name for local distribution.

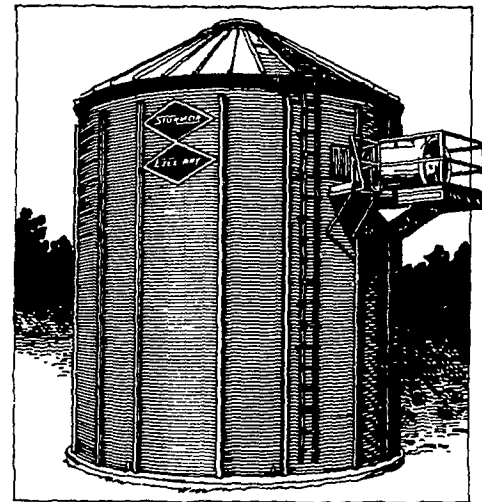

In addition, US Agri-Systems acquired the Wic, Inc. distributorship and serves the more than 30 local Wic farm dealers with bedding choppers, self-loading silage carts and the former US Farm Systems' Simplicity liquid manure spreader now under the Wic label.

Dealers or farmers in Pennsylvania, Maryland, New Jersey and Eastern Virginia may receive more information from US Agri-Systems.

Jacques lets farmers run corn test plots

LANCASTER — Corn yield test plot programs can be conducted in three different ways. The company can set up its own plots and publish the results; or, trials can be conducted and published by the local state university; or, farmers can be permitted to set up their own plots and the results are published.

Many companies have used this last method with good results. Everyone is familiar with driving past a corn field and seeing the sign posted with various seed company varieties.

Often, there is only one company represented. The results from the test plot does demonstrate which varieties of that company appear to be better than others. But how

good are they in comparison to varieties from other companies.

Realizing this problem, the Jacques Seed Company decided to do something about it. A number of years ago they designed a yield test program that would be objective and fair to the farmer. Today, that program is carried on in 26 states and Canada. Pennsylvania, New Jersey, Maryland and Delaware are some of those states.

Here are the guidelines that Jacques uses on setting up test plots. Farmers are picked by their local farmer-dealers. The farmer-dealer looks for a good farmer who has a relatively flat field and who can combine the test plots. The farmer is encouraged to not only

plant various Jacques varieties but other varieties. The farmer chooses the other companies and the varieties.

He is asked not to do anything different than he does when planting his corn normally. No more fertilizer, for instance. If he does Lasso-atrazine, fine. If he cultivates, fine. If he doesn't cultivate, fine.

He is asked to plant all varieties on the same day for a fair yield test. Each variety is planted in four rows by the farmer, 600 feet to 1,000 feet long. All varieties are planted in the same field and receive the same herbicides, insecticides, plant population and fertilizer.

Often the farmers selected never

used Jacques seed before. When it comes down to the harvest and comparison, farmers from the area are invited to not only watch but participate in the combining and weighing the harvested corn.

"We prefer to let the farmer do

all the work or at least let them stand over our shoulder and watch us. It is important for us to demonstrate the fairness of getting the yield results," said Ron

(Turn to Page D12)

Select Sires picks Snider bull

IMLER — Singing-Brook Arlinda Jeb-Twin, a young bull by Obie Snider, of Imler, has been chosen to enter Select Sires' Program for Genetic Advancement (PGA) sire sampling system. Based on his pedigree, this bull calf has been selected as one of only 130 Holstein bulls from throughout the United States to enter the program in 1983.

The dam of this young bull is Paclamar Jetta Tippy-ET, a Very Good (86) daughter of Arlinda Jet Stream. She has records to 26,738

of milk and 881 of fat as a three-year-old. Her Cow Index is +2,183M. She has two maternal sisters that are over 20,000 of milk. One is Very Good (87) and other Excellent (90). The grandam is also Excellent (90-2E) with 140,650 milk lifetime and the third dam is the great All-American Excellent (96-3E) "Tippy" cow. She is the daughter of Fond Matt with 181,430 of milk lifetime.

The sire of this young bull is Arlinda Cinnamon.

Boyertown bank expands agribusiness

BOYERTOWN — The National Bank of Boyertown, is expanding its agri-business operations this year. The bank serves the counties of eastern Berks, Montgomery, eastern Lancaster, northern Chester and southern Schuylkill.

The bank is the oldest and largest National Bank headquartered in Berks County. It has been serving the farming community since 1874.

Today, there are 11 offices including the main office in Boyertown. Charles L. Gehris, Vice President, Agri-Business Department, explains the department will serve the farmer in various ways, including short-term (crop) loans and intermediate (equipment, truck, auto) loans. The bank is full service, including checking and various savings plans.

Charles Gehris

The Boyertown utilizes creative financing, employing flexibility in its loan paybacks which are agreeable to the farmer.

"We want to do business with the farmer and he will find our door open to him at any of our offices" said Gehris. Gehris advises the farmer to make an appointment with him for a meeting which can take place either at the bank or at the farm.

As with any lending institution, the Boyertown Bank likes to see good records including a current balance sheet and cash flow projections. The IRS Tax Return for 1982 would be helpful in any financial discussions.

Gehris was brought up on a dairy farm in Berks County and has a good understanding of the special needs and concerns of farmers.

Paclamar Jetta Tippy is the dam of Singing-Brook bull, which has been picked for Select Sires program.

Broiler chick placements up

HARRISBURG — Placements of broiler chicks in the commonwealth during the week ending February 26 were 2,312,000, according to the Pennsylvania Crop Reporting Service.

Placements were ten percent above the previous week and 13 percent above the corresponding week a year earlier. Average placements during the past nine weeks were one percent below a year ago.

Placements in the 19 states were 82,993,000, two percent above the previous week and five percent above the same week a year earlier. Average placements during the past nine weeks were three percent above a year ago.

Broiler-fryers slaughtered in Pennsylvania under federal inspection week ending Feb. 16 were 1,644,000, with an average liveweight of 4.18 pounds.

Corn test plots

(Continued from Page D10)

Frohm, District Sales Manager for Jacques.

The plot is combined by the farmer. Often other farmers operate the weighing bin and record the weight. Other farmers can take the samples and operate the moisture meter. Each row of corn is measured by farmers using a measuring wheel.

All yields results are recorded and all farmers at the field are allowed to look and record the results.

"Let's face it; we don't always win," said Frohm.

"But that's alright. If we are going to be of service to the farmer than he should be allowed to see

the complete results. I feel we have the best method for farmers to choose their varieties. We have a slogan and that is we tell the farmer not to buy his next year's seed until after the harvest results. This way he has a better chance of choosing the best varieties available on the market," said Frohm.

Jacques makes available the complete results from all of the test plots in their yield book. Nothing is eliminated. The results are published and made available to all farmers by mid-November. And they publish their losses along with their wins. The yield book is designed to be a tool for helping the farmer decide what varieties are best for him next year.

CHICAGO — Steiger Tractor, Inc., Fargo, N.D., recently switched to Strip Mill Plates, a product of Inland Steel Company, for its new line of four wheel drive tractors; The Panther 1000 Series. The new Strip Mill Plates from Inland, available in widths of 24" to 72", are more economical than the wider plate that Steiger used previously. Both are Inland products.

"Inland Steel is a long-standing supplier," said Marian Meyers, Senior Buyer at Steiger. "We've had good working relationships with sales representatives and top management in the past and today. We have found that the new Strip Mill plates are of very high quality with the proper gage and camber control we require in plate steel. They are another advantage that we get from Inland, and the body of our new Panther 1000 Series is largely made up of these plates."

In the new tractor series, 1/4" Strip Mill material is fabricated

for the cab, and 1/2" plate for the front and rear frame side plates, center yoke and engine mount weldments.

The new tractors are available in 325, 360, 400 hp, in either Caterpillar or Cummins turbocharged, high torque rise engines. Productivity is enhanced by the use of an onboard microcomputer which assists the operator in shifting gears through the full range of 12 forward and reverse

speeds. Electronic controls are utilized for operating the optional three-point hitch.

Functions of the tractor are precisely monitored by the computer system. It watches certain tractor functions and warns the operator of a problem. For example, the computer monitors the 16 warning indicators, such as electrical draw, fuel supply, engine oil pressure, engine temperature, etc.

Steiger Tractor recently switched to Strip Mill Plates for the manufacture of the new Panther 1000 Series tractors.

THE AGWAY SEMISOLID MANURE STORAGE SYSTEM LETS YOU SPREAD WHERE AND WHEN YOU WANT—AND SHOW MORE PROFIT TOO!

The following figures are based on five-year records from the Agway Farm Research Center. Your Agway Farm Systems Salesperson will be happy to review them with you in detail.

COMPARATIVE FUEL REQUIREMENTS/COW/YEAR

Daily spreading 5.5 gal
Unloading, hauling and spreading from semisolid storage 2.3 gal

Fuel savings/cow/year 3.2 gal

COMPARATIVE LABOR REQUIREMENTS/COW/YEAR

Daily spreading 2.7 hours
Spreading from semisolid manure 9 hours

Labor savings/cow/year 1.8 hours

COMPARATIVE COMMERCIAL FERTILIZER NEEDED TO PRODUCE 25 TONS OF CORN SILAGE PER ACRE

Using no manure

Nitrogen	P ₂ O ₅	K ₂ O
200 lbs/acre	125 lbs/acre	200 lbs/acre

25 tons daily spread manure

Nitrogen	P ₂ O ₅	K ₂ O
150 lbs/acre	51 lbs/acre	20 lbs/acre

25 tons semisolid manure *

Nitrogen	P ₂ O ₅	K ₂ O
50 lbs/acre	17 lbs/acre	20 lbs/acre

*Spring applied with immediate plowdown

When you consider the reduction in soil compaction and in spreader and tractor repairs associated with daily spreading, is there any other way to handle manure? Get the details from your Agway Farm Systems Salesperson on how to eliminate the drudgery of daily spreading while substantially reducing your labor, energy and fertilizer costs

Vigortone launches 'real' dairy promotion

CEDAR RAPIDS, Ia. — Vigortone Ag Products, a livestock farm supplier headquartered here, is now promoting 'real' dairy products at the retail level in cooperation with dairy processors in more than 10,000 supermarkets across the country.

In response to intrusion by imitation and substitute products in supermarket dairy departments, Vigortone Ag Products, largest manufacturer of vitamin-mineral pre-mix used to fortify feeds, is currently sponsoring a premium-incentive promotion with dairy processors. The promotion is intended to help stimulate sales of real dairy products as well as to bring attention to their nutritional values.

Vigortone, in cooperation with the Norman Rockwell Museum, has made available by special

purchase, sets of four porcelain Rockwell collector mugs at a nominal price. Each order must be accompanied by a proof of purchase from dairy products. In addition, packed inside the carton of mugs, will be a coupon worth 50 cents off their next purchase of real dairy products. Also included

in the carton will be a pamphlet entitled, "Dairy Products and Your Family's Diet."

Vigortone President C. Richard Swarzenruber noted, "Last year we were very pleased with the way our national red meats promotion program was accepted, and this

year we wanted to do something similar for our friends in the dairy industry."

The American Dairy Association is heartily endorsing the promotional effort and is encouraging state organizations to get behind the program by urging

nationwide participation by dairy processors and supermarket chains.

Said Swarzenruber, "This is one small way we can say thanks to our dairymen friends across the nation for the support they have given us down through the years."

Del. gives tips on mare breeding

NEWARK, Del. — A mare is more likely to conceive if she's in good, thrifty, gaining condition, says University of Delaware extension equine specialist C.M. Reitnour. The best reproductive performance occurs from March through July.

Fillies are usually bred for the first time when they are three years of age. However, size and

use are important factors to consider in the final decision.

When using hand breeding or artificial insemination, make sure the female responds to the teaser and shows signs of being in true estrus (heat), Reitnour says. Breeding on postpartum heat (foal heat), which normally occurs seven to 11 days after foaling, can be done if the mare has had no

trouble foaling, no injuries to the reproductive tract, no infections, and is in excellent physical condition. It's good management practice to tease the mare for two estrus cycles (42 to 44 days total) after breeding to make sure she does not return to heat. Test mares for pregnancy 22 to 42 days after breeding.

To obtain maximum reproductive efficiency from a stallion, keep him in excellent, thrifty physical condition, the

specialist says. He must be fed and exercised properly and kept on a sound program of preventive medicine.

A stallion used for hand breeding (bringing mare to stallion) must be well mannered and controlled. The first season a young stallion is used, limit the number of mares booked to him and handle him carefully to prevent injuries. An experienced, qualified person should handle him at all times, Reitnour says.

PGC reports successful deer harvest

HARRISBURG — Pennsylvania deer hunters have reported the seventh largest deer harvest on record. Report cards now on file with the Commission indicate the 1982 season also saw the fifth largest buck harvest and the tenth largest antlerless deer kill ever recorded by Pennsylvania sportsmen.

Executive Director Peter S. Duncan said 72,113 bucks were taken and 66,109 hunters reported tagging antlerless deer, for a total harvest of 138,222.

Duncan noted that in 1981 hunters harvested 73,322 bucks and 75,208 antlerless deer — a total harvest of 148,530. It was the third largest buck harvest on record.

The state's all-time record buck harvest was in 1967, when 78,268 were reported tagged. The second largest reported buck harvest, 74,879, was recorded in 1977, while

the fourth biggest buck kill was 73,196 in 1980.

"This means four of the five largest buck harvests have occurred in the last six years, an impressive indication our deer management program is working well," said Duncan.

Only nine antlerless harvests larger than the most recent one have been registered. The largest, 171,662, occurred in 1938, when there was no open buck season. In 1940, hunters took 145,580. All other annual antlerless harvests have been below 100,000.

Largest total harvests were recorded in 1940 (185,575), in 1938 (171,662), in 1981 (148,530), in 1977 (146,078), in 1967 (144,415) and 1968 (141,874). Of the 20 most successful buck seasons in the state's history, 19 have occurred since 1963.

Potter County, traditionally the leading deer producer, maintained

its reputation in 1982, leading in the number of bucks, antlerless deer and total deer reported taken.

Hunters returned 2,591 buck and another 3,721 antlerless cards, for a total of 6,312 from "God's Country." During the 1981 season, Potter also led in all categories, with 3,706 bucks and another 4,511 antlerless deer, a total of 8,217 whitetails. The 1980 Potter figures were 3,575 bucks, 2,906 antlerless, with 6,481 total whitetails.

Following Potter in bucks

harvester were Bradford, 2,456; Tioga, 2,323; Clearfield, 2,072; and Lycoming, 1,971.

Leading antlerless counties were Warren, 2,951; Tioga, 2,908; Bradford, 2,688; and McKean, 2,159.

Counties other than Potter leading in total 1982 deer were Tioga, 5,231; Bradford, 5,144; Warren, 4,681; and McKean, 3,880.

As in past years, the Game Commission extends an invitation to any individual or group to come

to Harrisburg to examine or count report cards filed by hunters. The same invitation is extended to those persons who wish to examine reports filed on bears harvested during the 1982 season.

New Temik® on Gypsum

It goes down smooth.

Now the best granular pesticide you can buy is even better introducing new TEMIK® 15G aldicarb pesticide formulated on gypsum — the most trouble-free TEMIK granule ever developed.

You'll see why new TEMIK is better the minute you open the new easy-pour spout. The round gypsum granules resist clumping, resist clogging, and flow smoothly through the applicator tubes for a more even distribution.

And they're more efficient. Gypsum granules are so compact, you can pour more TEMIK 15G into the applicator box and cover more acres per fill-up. No granular pesticide is more convenient. Or more effective.

TEMIK protects plants from underground pests like nematodes and root maggots. Then works systemically to control aphids, mites, plant bugs, thrips and other foliar insects.

Crops grow their best - and yield their best when they're protected with TEMIK. New TEMIK 15G aldicarb Performance made it the best. Gypsum makes it better.

Wayne Co. hosts woodlot meeting

HONESDALE — A Woodlot and Marginal Land Management for Wildlife meeting is scheduled for Tuesday evening, March 15, 7:30 p.m. at the Wayne Highlands High School, Terrace Street, Honesdale.

Speakers at this meeting will include: Pat Donahue, Pa. Game Commission Forester, who will speak on "Types of Forest Habitat"; Wilmer Peoples, Pa. Game Commission Land

Management Officer, who will discuss Wildlife Management on Pa. Gamelands; Jack Gearhart, U.S. Forest Service Forester, who will discuss Forest Covers for Landowners and Services Available; Louis Beck, USDA Soil Conservationist, who will talk about Brushland Management; and Tom Callahan, Wayne County Extension Agent, Pa. State University Cooperative Extension Service, who will discuss Re-

juvenation of Old Field Sites.

All of these speakers will also participate in a panel discussion of the topics presented at this meeting. Sportsmen and others in attendance at this meeting will have an opportunity to ask questions of this panel.

This meeting is a general information meeting oriented towards sportsmen and property owners managing wooded areas

and marginal fields. It is designed to demonstrate different procedures land managers may use in order to improve habitat on their properties.

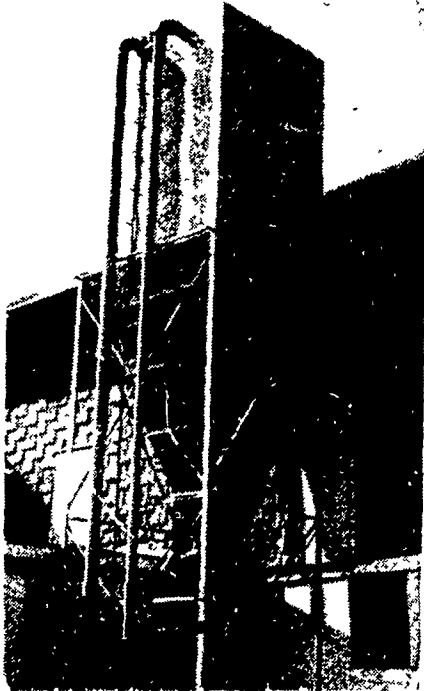

All sportsmen and others interested in learning more about

wildlife and land management are encouraged to attend this informative meeting.

For additional information on this meeting please contact the Wayne County Extension Service by dialing 717-253-5970 ext. 114.

Hallowell will speak at conservation banquet

LANCASTER — The 32nd annual banquet of the Lancaster County Conservation District, is scheduled to be held on Thursday evening, March 24, at the Blue Ball Fire Hall. Tickets are now available from any District Director or at the District Office for \$7.00.

Guest speaker will be Penrose Hallowell, Pennsylvania Secretary of Agriculture.

Hallowell was sworn in as Secretary of the Pennsylvania Department of Agriculture by Governor Dick Thornburgh on Feb. 16, 1979.

Born in the family farm in Bucks County, he was raised there and has been actively involved in farming all his life. He currently

Penrose Hallowell

owns a 290-acre dairy farm, "Pennywell Farm," in Ottsville, Bucks County, in partnership with his son, James. The Hallowells have more than 170 head of registered Holstein dairy cattle.

Hallowell has placed a strong priority on rural economic development and improved agricultural marketing. Under his direction, the State Agriculture Department has coordinated the statewide "Pennsylvania Agriculture—We're Growing Better" campaign, increasing sales of Pennsylvania agricultural products. Efforts to assist Pennsylvania agricultural industries and to promote export sales of Pennsylvania farm products have

been greatly expanded.

He has called farmland preservation a priority issue of the '80's. Governor Thornburgh's family farm preservation initiatives have produced 32 ag-related laws since 1979 which provide incentives for the preservation of Pennsylvania's farmland and farm families.

Hallowell serves as a member of the Ben Franklin Partnership Board, the State Conservation Commission and the Environmental Quality Board. He is a trustee of Penn State.

He graduated from there in 1950 with a B.S. in agricultural economics. He served for eight years as the State Director of the

Farmers Home Administration of the United States Department of Agriculture. During that period, Pennsylvania FmHA was recognized for having the lowest cost per unit of work in the nation (1975, 1976).

He is married to the former Marion "Trish" Wilson. The Hallowells have four children — James, Penrose, Jr., Emily and Susan H. Forrey — and three grandchildren.

Advance reservations are needed to attend this meeting, and must be made Monday.

OUTSTANDING IN THEIR FIELD.

Because Kubota offers the most complete line of mid-size tractors in the world, there's sure to be one just right for your needs. And they're all outstanding in their field.

Our tractors are designed for farm, high-way and light construction work, grounds maintenance, and landscaping.

For small excavation jobs, what could be better than a small excavator? That's the

whole idea behind Kubota's two excavator models. Why not let Kubota help you be outstanding in your field?

Bucks conservation picks Frederick

DOYLESTOWN — Wilmer Frederick, a Buckingham Township dairy farmer, was sworn in for a four-year term as a member of the Board of Directors of the Bucks County Conservation District Tuesday, March 1, in ceremonies at the Warrington Motor Lodge restaurant.

A life-long Buckingham Township resident, he farms in partnership with his twin brother, Charles and his son, John. Their 85-acre farm is part of an original land grant made by William Penn. His grandchildren are the fifth generation of the Frederick family to live on the farm.

Conservation practices are increasing every year on the farm. Last year, they no-tilled 40 acres. Frederick's philosophy is that "You don't farm very long if you

don't use good conservation methods." Last year, a rented 40-acre farm was terraced according to ASCS specifications. The home farm has been surveyed and meets the approval of the ASCS as far as farming practices are concerned.

The Fredericks family farms a total of 350 acres in its dairy, grain and crop operations. They also fatten 100 hogs a year.

As returning GI's after World War II, the brothers began farming with their father. They also attended "ag" school in the evening at the old Buckingham High School under the G.I. Bill of Rights. Frederick is a delegate to the Interstate Milk Producers, a member of the Bucks County Farmers' Association and has been active in Township government. — H.S.

Wilmer Frederick, new Bucks County Conservation District board member, stands in midst of part of his dairy herd.

Pa. broilers up 13 percent

HARRISBURG — Placements of broiler chickens in the Commonwealth during the week ending February 26, 1983 were 2,312,000, 10 percent above the previous week and 13 percent above the corresponding week a year earlier.

Average placements during the past 9 weeks were 1 percent below a year ago. Settings for broiler chicks were 3,098,000, 2 percent above the previous week but 5 percent below the same period a year earlier. The current 3-week total of eggs set is 3 percent below the comparable period a year ago.

Placements in the 19 States were 82,993,000, 2 percent above the previous week and 5 percent above

the same week a year earlier. Average placements during the past 9 weeks were 3 percent above a year ago.

Settings were 104,873,000, 1 percent above the previous week and 1 percent above a year earlier. The current 3-week total of eggs set is 2 percent above the comparable period a year ago.

Expected marketings, based on placements 8-10 weeks earlier less mortality allowance, in Pennsylvania for the week ending April 30, 1983 will be 2,071,000, 1 percent below a year earlier. The 19 States expected marketings should total 77,419,000, 3 percent above last year.

HiPerForm MUELLER

dairy farm equipment

You've known about the HiPerForm of Mueller Milk Coolers for years. You know it's the Number One Cooler selected by dairymen all over the world because of its automatic washing system, its efficient temperature control and its 100% system. It's cooling efficiency, reliability and durability.

The Mueller PRE HEATER saves the energy wasted by your refrigeration unit. The Pre Heater is the first cooler in the line that captures a large portion of the normally wasted heat energy from refrigeration and air conditioning systems and uses this captured heat energy to pre-heat water to approximately 140°F with no additional energy requirement.

Jerry Webb
Delaware Extension

Land values tumble

Farmland values across the country have taken a tumble. While that may be good news for a few, it's proving to be disastrous for thousands of overextended farmers. The phenomena is also haunting a lot of lending institutions who are having serious doubts about some of their earlier loan decisions.

Survey after survey indicates that farmland values have, in fact, reached their peak. The Department of Agriculture, several

months ago in a somewhat questionable survey, found that farm values had peaked and had started to head down. And other reports, both public and private, confirm that the land boom is over — at least for the time being. Here's an example. A survey in Iowa taken last fall shows the first decline in farmland values in that state in more than 20 years. Farmland dropped an estimated \$346 per acre during the year to \$1800. That's slightly more than a 16 percent decline in one year and

the largest single year drop in farmland values since 1933.

Almost 500 real estate brokers who responded to the Iowa State University survey credited low grain prices, high interest rates and general pessimism about the economy for the fall in land values. And while economists see both good and bad points in this situation, to the heavily mortgaged farmer and the nervous lending institution it can only spell trouble.

You see, in Iowa as in many other states, land values increased fivefold in just 10 years. The average Iowa acre went from an estimated \$430 value in 1971 to almost \$2150 in 1981. During that time, farmers used their acres like money in the bank. They could borrow as much money as they needed, knowing that land values would continue to rise, and even if they couldn't pay back a loan, they could refinance based on increasing net worth.

10-year boom ends

The banks went along with this scheme, knowing that this year's \$100,000 farm would be worth \$200,000 in only a couple of years. This kind of inflation and borrowing power covered for a lot of bad farming practices, and thousands and thousands of farmers across the country got themselves into big trouble. They borrowed to the hilt for expansion, buying big machines and fancy buildings. They paid too much land rent and bought acres they really

couldn't afford, knowing that those acres would increase in value and eventually bail them out.

Ten booming years in farmland values and suddenly it ended. Now bankers are trying to get back some of the money they loaned on land that is no longer worth the amount of the loan. Here's an example: A 160-acre farm in northwest Iowa has been appraised at almost \$4000 an acre. Obviously, a lending institution would have loaned a considerable sum on such a farm. But when it was actually sold at auction recently, it brought only \$1800 an acre. Pity the poor banker who loaned money at the rate of \$3000 or even \$2000 an acre.

And consider this. What about a farmer who mortgaged the family farm and bought the adjoining place in the midst of the land boom? Now he finds land values down on both farms, and a nervous lending institution that's beginning to wonder whether it has enough collateral to cover the loan. Let that farmer miss a payment or two and he could very well lose the new farm along with the home place.

Temporary setback

Obviously, the land boom isn't over forever. It's just a temporary setback that could go on a year to two, or maybe more. But no doubt the tempo will pick up again as crop prices improve and as inflation decreases.

There's also a confidence factor that must be considered. When the future of agriculture looks good to enough people, then renewed interest in farmland purchases will spark increased values.

Again, using Iowa data as an example, it's fairly easy to predict that land prices will increase again and probably in the not-too-distant future. The Iowa information shows that land values increased each year of this century, except for a period from 1921 to 1933, and in 1953, 1960, and 1982.

It may be difficult to compare land prices at the beginning of the century with what's happening now, but it is interesting historical information. During the first 20 years of this century, Iowa land prices jumped about as they did during the 1970s. The estimated average-per-acre value of \$43 in 1900 increased sixfold to \$255 in 1920. Then there came a period of harsh times for agriculture — and land values declined each year until they bottomed out at only \$69 an acre in 1933.

The current land bust is only temporary, but the effects will be quite permanent for some overextended farmers who have run out of credit and options. Some of them have been selling out this winter — it's one of the harsh realities of this business we call farming.

WHOLE COTTONSEED

Whole cottonseed is now available in your area at very attractive prices. Cottonseed is a very high energy feed with a good protein level and has a source of fiber that is utilized by the cow to its fullest. We deliver to your farm.

Bucks honors Nonesuch Farm

DOYLESTOWN — The Bucks County Board of Commissioners joined with the Bucks County Farmers' Association at its annual Spring Meeting and family night at the Doylestown Presbyterian Church to pay tribute to the farm families of William and John Yerkes of Nonesuch Farm, Buckingham. They had been named Pennsylvania Master Farmers.

All three Commissioners were on hand for the meeting, and Commission Chairman Elaine Zettick read a proclamation which honored the men for their contributions to Bucks County agriculture and for their years of community service. The 500-acre Nonesuch Farm is situated in Buckingham Valley between Buckingham and Little Buckingham mountains. Mill Creek, the only stocked trout stream in central Bucks that is open to the public, runs through the farm.

Plaques were presented to both families by the Bucks County Farmers' Association in recognition of the Master Farmer titles which were awarded in January at the Farm Show in Harrisburg. County Agent Richard Bailey of the Agricultural Extension Service narrated a slide presentation which depicted various aspects of the operation of Nonesuch Farm.

A direct farm market which sells produce grown on the farm, as well as Pick-Your-Own strawberries

and pumpkins are major parts of the operation. They also raise cattle, and 100 feeders are finished yearly.

Soil on the farm is tested annually. An integrated pest management program for insect control in sweet corn is in effect.

An average of 200 acres of sweet corn is grown every year, and is picked and packed in the evening hours. Nonesuch Farm sweet corn has been a familiar sight on the produce stands of area super markets since the early 1950's. Rye grass is used for winter cover and good conservation practices keep soil erosion to a minimum.

In a surprise presentation retiring President Robert Stover and retiring Secretary Anna Simon were presented with gifts. — H.S.

Bucks County presentation ceremony includes, from the left, John and Leslie Yerkes; Herman Bishop, Farmers Assn. president; Elaine Zettick, Commissioner; William and Nancy Yerkes; and Andrew Warren, Commissioner.

Pennjoy tobacco among Penn State seed releases

UNIVERSITY PARK — New varieties of farm crops, either developed or tested at Penn State, will be available this spring from commercial seed dealers. Included are new oat varieties named Larry and Ogle, Pennrose potato, and Pennjoy tobacco.

Certified seed of Larry and Ogle oats is available from seedsmen and not from Penn State, says Guy W. McKee, agronomist with the Agricultural Experiment Station. He indicated no seed of new varieties is sold at Penn State.

Larry oats is a high-yielding, early-maturing variety with good resistance to lodging or stock rot, McKee announced. Plants of Larry are very resistant to barley yellow dwarf virus, a common disease of small grains. The plants are short in height.

Ogle is a high-yielding, medium

maturity oats. Ogle has high resistance to barley yellow dwarf virus, it was noted. The plants are taller than those of Larry. Grain kernels are more slender than kernels of the common variety Otee. Both oat varieties were tested at Penn State by Harold G. Marshall, following development at the University of Illinois.

Pennrose white potato has red skin, shallow eyes, and is quite resistant to verticillium wilt and to potato viruses A and Y. Yields are good for a red skin potato and somewhat higher than those of Red Pontiac. Limited amounts of certified seed potatoes will be available for planting this season, McKee said.

Pennrose potato was developed and tested by W.E. Webb of the U.S. Department of Agriculture and D.R. Mackenzie of Penn State.

A new tobacco, Pennjoy, has resistance to certain diseases — wildfire, tobacco mosaic virus, black shank, and black root rot. It also has some resistance to etch

virus. Pennjoy was released jointly by the Pennsylvania Agricultural Experiment Station and the U.S. Department of Agriculture. Pennjoy was developed by H.A.

Skoog, research agronomist of the U.S. Department of Agriculture, and J.O. Yocum, superintendent of Penn State's Southeastern Field Research Laboratory at Landisville.

Devereux Soleil symposium & sale on March 26

DOWNINGTOWN — The Missing Link "Performance Symposium" and Private Treaty Sale will be held on Saturday, March 26, beginning at 10:00 a.m. at the Devereux Soleil Farms, Downingtown.

The purpose of the Symposium is to emphasize and show the economic importance of performance records and testing in beef cattle herds, both large and small.

Speakers for the morning will include Les Burdette, Penn State

beef cattle specialist, speaking on "Performance Appraisal vs. Visual Appraisal — How this Can Affect Profits" and Harold Harper, Penn State ruminant nutritionist, speaking on "Feed Efficiency as it Relates to Cow Size and It's Profitability in the Feed Lot." Chet Hughes, Lancaster County Extension Agent, will give a short presentation on "Reading Performance Pedigrees." Following the morning program which will be held at the Bull Test Station, a lunch will be served followed by inspection of the top 30 Angus bulls which have just completed the 140-day performance test.

All top 30 bulls from the test will be offered for sale at private treaty that day for any interested buyers. They will be prices according to their performance on test and will be one a first come first serve basis. A complete performance history of each bull and his family

lines will be available on that day.

Devereux Soleil Farms, managed by Conrad Grove, has been known throughout the country for their total performance program. Three hundred Angus brood cows are kept on the farm with extensive production records on each of them.

All bulls put on test at the farm are run through pin pointers which electronically computes the amount of feed consumed by each individual bull which allows for accurate calculations of feed efficiency for each bull. Steers are fed in the feedlot and then slaughtered right at the plant located on the farm. At the slaughter facility, carcass data is taken on contemporary sire groups along with providing a place for all culls. This entire set up allows for complete production records from conception to consumer.

The Symposium is open to all purebred and commercial cattlemen.

WHAT THIS MAN KNOWS ABOUT FARMING COULD FILL A BOOK... A BANK BOOK.

Farming. It's a complex business. No surprise to you, of course. We only mention it because when it comes to getting a farm loan, we know you don't want to have to start at ground zero and explain the expenses of livestock, machinery, construction, mortgages and operating expenses to a novice loan officer.

Which is why we suggest you turn to Bob Badger, the head of our Agricultural Loan Division. Bob knows farming — inside out and upside down. He's been helping our community's farmers meet their business objectives for years. So when it comes to farm loans, he takes a very interesting point of view... yours.

Next time you need to talk to a banker about financing your business, talk to the banker who understands your business... Bob Badger at Bank of Lancaster County. Visit Bob at our Strasburg office or give him a call and ask him to visit you.

The STIHL® 038

**Runs
all day
and won't lose
its cool.**

Stihl has a solution to overheating — the 038. Even in hot southern climates, it runs all day and starts again and again. So if you need a saw that'll work hard when the heat is on, get the Stihl 038. It keeps its cool, so you can keep yours.

For full season control
of problem grasses in
minimum-tillage
corn

Princep® Caliber® 90

Reduced tillage calls for a strong, dependable grass herbicide. And one that can team up with other herbicides to give you control of both broadleaf weeds and grasses right up to harvest.

You can't buy better grass control at any price. Especially of problem grasses like fall panicum, crabgrass, and foxtail.

And you'll also get all the extra convenience that Caliber 90 dispersible granules offer.

For reduced tillage, Princep Caliber 90 is your best, low cost answer to problem grasses.

Princep® and Caliber® are trademarks of CIBA-GEIGY

Red meat totals 77.9 million lbs.

HARRISBURG — Commercial red meat production in Pennsylvania during January, 1983, totaled 77.9 million pounds, according to the Pennsylvania Crop Reporting Service.

Cattle slaughtered during January, 1983, totaled 75,100 with an average liveweight of 1,167 pounds. Calf slaughter of 23,000 head averaged 164 pounds liveweight. Hog kill totaled 171,400 head. Average liveweight for the month was 233 pounds. The number of sheep and lambs slaughtered was 12,200 and liveweight averaged 104 pounds.

Nationally, commercial red meat production during January 1983 totaled 3.15 billion pounds. This includes slaughter in

federally inspected and other plants, but excludes animals slaughtered on farms.

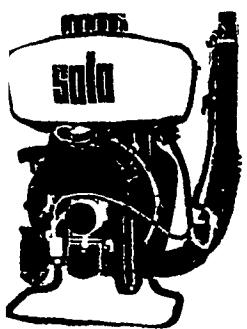

Beef production totaled 1.93 billion pounds; total head killed was 3.06 million head and liveweight averaged 1,077 pounds per head. Veal production was 34 million pounds, with calf slaughter of 244,000 head averaging 237 pounds liveweight. Pork production during January totaled 1.16 billion pounds. Hog kill totaled

6.67 million head, with an average liveweight for the month of 244 pounds. Lamb and mutton production was 30 million pounds, with 522,000 head killed averaging 113 pounds liveweight.

Publication of monthly estimates of commercial livestock slaughter has been reinstated for 1983. Comparative data with 1982 is not available by month but will be published on a quarterly basis.

QUALITY FARM BUILDINGS

Robin Meadows Farm 'shepherds' modern techniques

BY HAROLD SHELLY
FOREST GROVE — The birth of quadruplet lambs is even a rarity on the Robin Meadows Farm of Bill and John Rockafellow, Buckingham Township, where the 100-ewe flock produces some 160 to 175 lambs a year.

The four youngsters were born to a Suffolk crossbred ewe and are reported to be doing very well by the Rockafellows.

Approximately 20 of the best

lambs are kept each year for replacements and 10 of the poorest ewes are culled so that the herd is increasing annually. Suffolk, Dorset and crossbred animals make up the flock.

Lambs that are not sold for the holiday markets are raised for the freezer trade and butchered when they reach 100 pounds. The goal of the farm is to reach this weight

(Turn to Page D27)

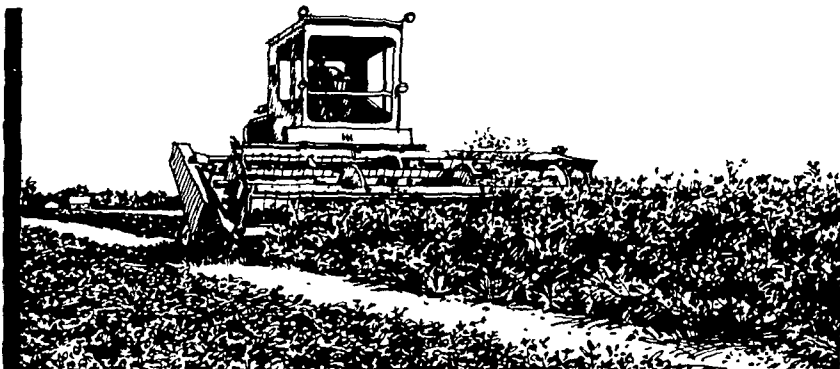

Bill and John Rockafellow work together in lamb pen of Robin Meadows Farm.

Part of ewe flock is shown on Robin Meadows Farm.

New ARMOR

Fast growing, long lasting, big yielding alfalfa.

- Now, the best winterhardiness, disease and insect resistance available in an improved early-maturing alfalfa.
- Outstanding proven yielder.
- Fights Phytophthora root rot ("wet foot" disease), anthracnose, bacterial and Fusarium wilt, pea aphids and leafhoppers.
- Winterhardiness fully equal to Vernal, plus good drought tolerance.
- Fast growth, rapid recovery after cutting.
- Full season performer—starts early in the spring, grows later into the fall.
- Available with GroZone® seed coating.

Robin Meadows Farm

(Continued from Page D26)

Within 100 days. The feed ration includes hay, mixed corn, soybean meal and barley.

There are four rams on the farm. All were production tested rams and were purchased at the Penn State ram test sale. The two Dorsets, Suffolk and Ramboulet were bought to match the type of ewes on the farm with the better qualities of a ram breeding out the poorest qualities of a ewe.

Each lamb is vaccinated for Enterotoxemia by its fifth day. Any lamb not designated directly for market is re-vaccinated when it is three weeks old. An eye problem, called Entropion, where the eyelid turns in, occurs in the Suffolk breed. A special technique has been developed where the eyelid is sutured open with absorbable sutures and treated with an ophthalmic ointment. All of these treatments are handled by John and his wife, Sally, who are graduates of Delaware Valley College with degrees in animal science.

The farm is operated as a full

partnership, with John and Bill sharing the work, with an assist from brother, George. Sally helps with the vet work and keeping the sheep records and Bill's wife, Karen, has the task of keeping the books.

The main crop of the farm is hay which they raise for their own use, and also sell. They purchase all their corn, soybean meal and barley. The hay sales help offset the cost of the grain purchases.

John is also a professional sheep shearer, and most of his time off the farm is spent travelling to various locations throughout the country where he shears large flocks of sheep. In 1981 he won the Eastern National Shearing Contest in Rhinebeck, N.Y. where the 20 best shearers east of the Mississippi competed. He also won the Virginia Invitational last year.

Robin Meadows is the scene of 4-H clinics in sheep raising techniques. The farm sells many lambs for 4-H projects each year. Adult laboratories are also held to teach sheep raising on a commercial scale and the techniques of

tail docking, castration and feeding are taught.

Bill attributes the success they've enjoyed to the care the ewes get when they are lambing. Each animal is confined to a special lambing pen until she delivers. The lambs are fed in creep feeders providing special high nourishment feed, which is not accessible to the ewes.

John said his father always had sheep on the farm to keep the pastures down, and first learned to shear when he was nine years old. He's been at it ever since. He has demonstrated on several television shows, including Captain Kangaroo.

The Rockafellows see a bright future for their industry. The market for lamb is increasing, both fresh killed and frozen, and by employing modern techniques and constant care of the flock, Robin Meadows should be in the forefront of confinement type operations for years to come.

Fox to speak at DVC

DOYLESTOWN — Dr. Michael W. Fox, Director of the Institute for the Study of Animal Problems of the Humane Society of the United States, will be the featured speaker at Delaware Valley College on Thursday, April 7.

The program is sponsored by the Laboratory Animal Science Club and is scheduled for 8 p.m. in the David Levin Dining Hall. Dr. Fox will speak on "Human and Environmental Values and Human Survival."

The Institute has produced numerous publications and developed several technical research programs which applied scientific methods to the investigation of the many uses of

animals, including laboratory, companion, farm and captive wild animals, and using animals in education.

Dr. Fox is a recognized authority on the subject of animal behavior and animal welfare science and is an advocate of animal rights. He was quoted in the February, 1983, issue of Life Magazine concerning the Humane Society's five-fold declaration of animal "freedom": "the freedom to be able to get up easily, to lie down, to turn around, to stretch, and to groom or preen." Fox and his colleagues also believe that social animals - like gregarious livestock - should be allowed some interaction with their own kind.

USDA donates surplus dairy stocks to Mexico

WASHINGTON, D.C. — Secretary of Agriculture John R. Block recently announced the United States has signed an agreement with Mexico to donate more than 30,000 tons of Commodity Credit Corporation dairy products to Mexico to assist the needy. The products were acquired

at a cost of \$80 million.

The donation will include 20,000 tons of nonfat dry milk, 6,460 tons of butteroil, 2,000 tons of processed American cheese and 2,000 tons of cheddar cheese to be delivered from March through December this year.

Block said the dairy products

will be used primarily in school breakfast and lunch programs, as dietary supplements for pregnant women and infants, and at special centers for the elderly, handicapped and mentally ill.

The Mexican government agency responsible for family assistance and social programs will carry out the distribution program for the commodities in Mexico, Block said.

He said that the U.S. products donated to Mexico under this program will not displace dairy products that would normally be purchased on the commercial market for the intended recipients.

This is the sixth donation under recent legislation which amended Section 416 of the Agricultural Act of 1949 to allow the Commodity Credit Corporation to donate its surplus dairy products to help needy people overseas. The Act also authorized domestic donations of these dairy products to help needy Americans.

Computer simplifies crop insurance risk

WASHINGTON, D.C. — Weighing the benefits of crop insurance is easy with new microcomputer software programs called ARCIE, short for All-Risk Crop Insurance Evaluation.

These programs help producers assess their individual crop production risks and evaluate how crop insurance would work for their farms," said Merritt W. Sprague, manager of the U.S. Department of Agriculture's Federal Crop Insurance Corporation.

Sprague said ARCIE is available in two forms. One is a detailed program that takes about 45 minutes to run; the other is a mini-program that takes about 10

minutes.

Farmers calculate results for a single insured unit on a planted per-acre basis.

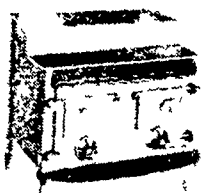

ARCIE was designed and tested by the Cooperative Extension Services at Texas A&M University and Michigan State University, in cooperation with the USDA crop insurance agency.

Franklin honors top growers

County Agent John Shearer, left, presents awards to Franklin County's top alfalfa grower, Grant Gayman, center, and top corn-silage producer, Walter Ocker for 1982. The awards were presented at the Franklin County soils and Forage Day held recently at Lemasters. Gayman, representing Gaymere Farms, Waynesboro, accepted the award for producing 7.3 tons of hay per acre in the Pennsylvania Alfalfa Grower's Program - the highest of eight Franklin County participants. Ocker, tops out of six in the Franklin County Corn Silage Club, produced 30.3 tons of corn silage per acre, utilizing the hybrid, Gutwein 2620.

ROCK-RESISTANT DISK

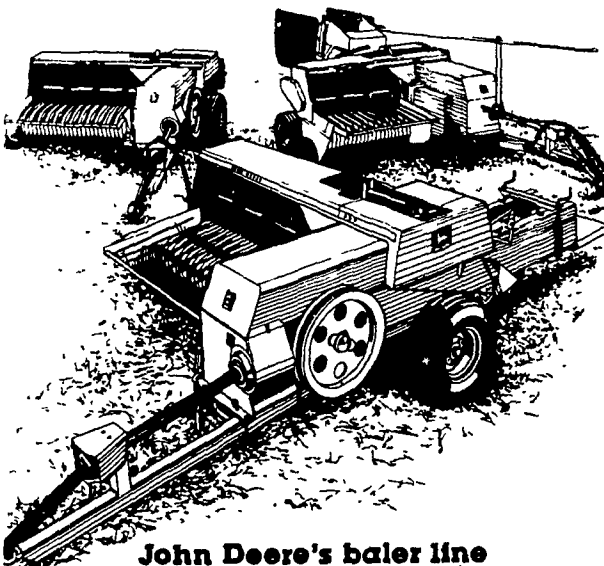

**Exclusive DuraCushion™ disk improves
disking results in rocks**

Special coil-spring standards act like heavy shock absorbers. Individual gang sections flex over rocks.

You get all the Level-Action™ disk features plus a round, larger gang bolt, cast spools, and coil-spring standards in 200 Series DuraCushion disks.

SQUARER BALES

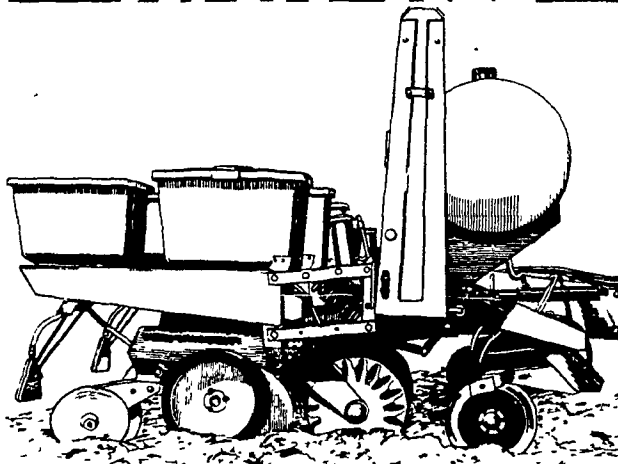

**John Deere's baler line
builds squarer, stackable bales**

To build solid, square-cornered bales consistently, you need consistent control of the hay. And John Deere's 327, 337 and 347 Balers give that control from the moment hay touches the pickup.

A wide pickup with extra teeth lets these balers take in all the hay in today's wider, windrows. There's even a compressor to keep the hay under control.

A floating tapered auger and adjustable feeder forks take over to keep material flowing evenly. The gear-driven knottor puts the finishing touch on these solid, stackable bales from John Deere.

FOR LOW-TILL OR NO-TILL

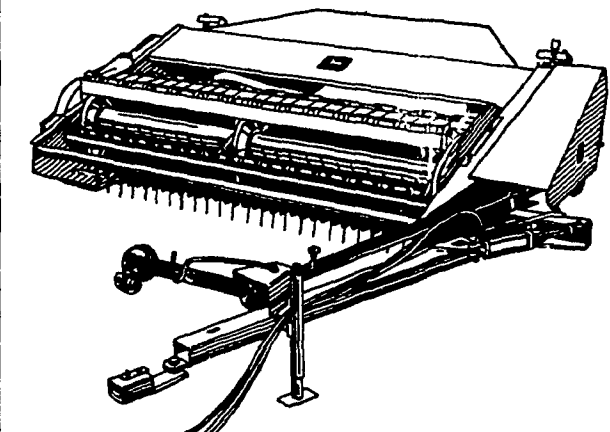

**Save fuel, time, moisture
and soil with a
Max-Emerge® conservation planter**

Here's a rugged planter you can rely on in most soil conditions, including stubble and many sod fields.

Heavy-duty springs help transfer weight from the 7-inch frame to each planting unit to keep unit-mounted coulters in the ground. Frame-mounted coulters and cast-iron firming wheels are available, too, for extra-tough conditions.

Whether you no-till, low-till or conventionally till your ground, these 4-row (30 to 40-inch rows), and 6- and 8-row narrow models can help you save fuel, time, moisture and soil. See us soon for details.

EASY ADJUSTMENTS

**New John Deere
1219 Mo/Co
features simple adjustments
for easy servicing**

Different hay crops have varying conditioning requirements. That's why John Deere's new 1219 Mo/Co gives you the option of changing roll spacing and pressure in just a few minutes.

When crop conditions call for it, simply change the roll spacing to as wide or as narrow as you want. When more or less pressure is needed, just turn the adjusting bolt.

Easy-to-adjust windrow forming shields let you build the type of windrow you want. See the 9-foot 1219 Mo/Co that adapts to your haying conditions.

Is better erosion definition needed?

NEW ORLEANS, La. — In discussions of soil erosion, there is a crucial need for precision, for exactitude in terminology, so that the actual situation is neither exaggerated nor distorted nor oversimplified, says Robert A. Hanson, chairman and chief executive officer of Deere & Company.

Addressing the annual meeting of the National Association of Conservation Districts, here, Hanson said:

"The emphasis is often on crisis, or on pending disaster, and the inference we're left to draw from many articles in the press is that the nation's precious cropland topsoil is washing into rivers or blowing in the wind at an alarming rate.

"Are things really as bad as they

are reported to be? Perhaps, but I certainly don't think so, and neither do agronomists, soil physicists, crop management technicians and other John Deere specialists on soil erosion. To be sure, there's a problem in some places, and we would not diminish it. But it is hardly a national emergency."

Hanson told his audience of conservation district officials that while the United States does not face an imminent soil erosion crisis of catastrophic proportions, where the problem does exist it must be dealt with calmly, coolly, and with due diligence. He suggested that it should be emphasized that soil erosion is a natural process, although one that can and often is accelerated when humans interact with the soil, as in

farming.

It should also be emphasized, he said, that eroded soil is not necessarily "lost" soil; it may have moved only a few feet further down the slope, or into the next field. Nor is cropland the only source of erosion; other sources include stream banks and construction sites among others.

"In fact," he said, "cropland accounts for less than half of all the soil eroded by wind and water."

Hanson suggested four principles, or guidelines, for use in developing erosion control or soil conservation policies:

The bulk of soil conservation efforts should be targeted at major problem areas. "We know where they are," he said, "let's work on them."

Laws and regulations relating to

erosion control should address results desired rather than methods used to achieve results.

Erosion control practices should be aimed at solving specific problems at specific sites.

Local citizens are often best equipped to decide the degree and methods of erosion control to be used in their area.

In his conclusion, Hanson said:

"It is my hope that the problem of excessive soil erosion can be approached calmly, and be addressed by all concerned with great care — care as to how severe it is, care in determining exactly where it is severe, care in ascertaining its possible effects on our country's future agricultural productivity, care in estimating the costs involved in its correction."

Wayne to handle bee order

HONESDALE — The Wayne County Beekeepers Association will coordinate an order for package honey bees this spring. A package of bees will consist of three pounds of Italian bees plus a queen and will be delivered to Marshall Machinery, Inc. about April 20. Orders must be placed by April 1 by contacting the Wayne County Agricultural Extension Office, Court House, Honesdale,

The bees will be brought into the county by truck from Georgia. Last year eighty-five packages were delivered under a similar effort.

Additional information about hive package bees can be secured by calling the Wayne County Extension Office (717) 253-5970, Ext. 114.

Pa. observes Weights Week

HARRISBURG — Governor Dick Thornburgh joined in last week's observance of "Pennsylvania Weights and Measures Week" and urged citizens to recognize the importance of accurate weights and measures in their daily lives.

Thornburgh said, "Honest weights and measures are indispensable, not merely to the economy of the commonwealth but to each individual consumer and business. Goods are bought and sold by weight; wages and bonuses in certain industries are paid by weight of work done; and scales are often the 'brain' of automatic machines controlling production in modern factories.

"Without accurate measurement, commerce and industry as we know it could not be carried on," Thornburgh said. "Indeed, we depend upon accuracy

to determine weight, length and measure," he added.

According to State Agriculture Secretary Penrose Hallowell, who oversees the operation of the state's Bureau of Standard Weights and Measures, Pennsylvania Weights and Measures Week is being held in conjunction with a national observance marking the anniversary of the signing of the first weights and measures law in the United States on March 2, 1799.

Hallowell said, "Equity and fairness in the marketplace are especially important to protect consumers, merchants and food processors against inaccurate weights and measures."

The delivery of stated quantities and eliminating misrepresentations are under Bureau Director Fred Thomas, who heads an administrative staff in Harrisburg

and more than two dozen inspectors throughout the state. All counties and some cities also employ their own weights and measures sealers.

Thomas said, "Many people take the accuracy of weights and measures for granted. But it requires many thousands of man-hours to inspect, test and check-weight items offered to the consumer to insure this accuracy."

Weights and measures inspectors are busy in the agricultural community assuring that farmers are fairly treated, checking the accuracy of such items as grain moisture meters, bulk milk tans, livestock market scales and even thermometers used to test milk temperatures.

DVC host home gardening expo

DOYLESTOWN — The first Annual Home Gardening Expo to be held at Delaware Valley College on Saturday, March 26 is scheduled just in time for spring.

According to Expo Chairman, Neil Vincent, the Home Gardening Expo will offer technical seminars, lectures and demonstrations concerning a variety of subjects relating to home gardening. Unlike A-Day, the College's Annual Open House which will be held later in the spring, this Expo promises to address itself to the needs specifically of area home owners and gardeners.

With almost 30 different subject

areas to choose from, those attending will also have an opportunity to browse through exhibits featuring the latest in lawn and gardening equipment set up by local merchants.

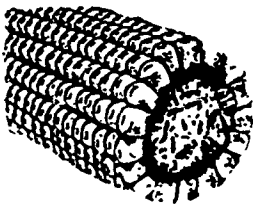

The program begins with registration (8 a.m. to 9 a.m.) in the lobby of the Feldman Agriculture Building on Saturday, March 26. The seminars will begin at 9 a.m. and conclude at 4:30 p.m.

A registration fee of \$10.00 (per adult, 18 or older) is tax deductible with proceeds to be used toward the Plant Science Scholarship Fund of Delaware Valley College.

Master Mix Multiphase™ concentrate.

The answer to today's efficiency questions.

Once again Master Mix® brings you the answer to the age-old question of how to boost the efficiency of the dairy cow.

Simple, flexible, and profit-making, the answer came just in time, because today more than ever you need a feeding program that squeezes more net profit from your cows...to cover operating expenses and pay yourself

a good income.

Based on the concept of phase feeding, the program includes Master Mix Multiphase™ dairy concentrate and two Density Plus Nutrient Pacs — Silage Pac and Legume Pac.

This Master Mix Phase Feeding Program fits any type of operation. Use Multiphase as the foundation concentrate for the entire herd, then add the appropriate

Density Plus Nutrient Pac when you need to boost the nutrient density of the grain ration.

Nothing could be simpler for phase feeding. Multiphase allows you to feed each cow for optimum production. This allows the cow to reach maximum milk production without the costly waste of over-feeding. That means more net profit from

each cow every day of the year.

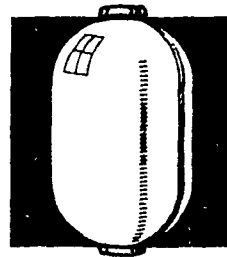

The Breakthrough People.

Stop in today for all the details on the Master Mix Multiphase Feeding program.

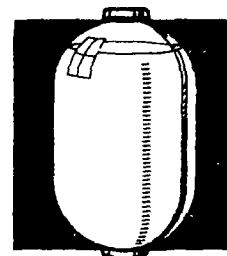

Higher efficiency at every phase for high net profit.

Phase 1

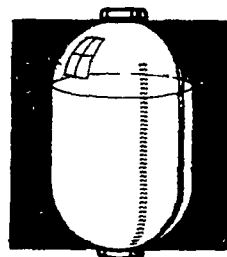

This is the early lactation period, lasting about 10 weeks. During this time, the cow usually cannot physically consume enough feed to support her peak production. Multiphase dairy concentrate and the appropriate Density Plus Nutrient Pac with the recommended levels of grain allows the cow to peak at the highest possible level. This is critical to profitability since each additional pound at peak equals 200 pounds over the course of the lactation.

Phase 2

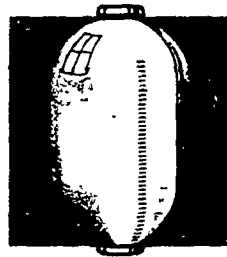

During this phase, milk production begins to decline, feed intake peaks and the cow's body weight stabilizes. The cow is still producing at a high level and her nutritional needs remain high. Shorting her nutrient needs would cause her milk production to drop faster than the normal 10% per month. The appropriate Master Mix Density Plus Nutrient Pac along with Multiphase and grain will help maintain maximum milk production.

Phase 3

The cow continues her natural decline in production during the final 24 weeks of lactation. However, her appetite stays strong, and she can consume more feed than needed to maintain her lower production level. Feed cost can be cut by keeping feed intake in line with milk production. Density Plus Nutrient Pacs are not normally needed during this phase. Proper feeding during Phase III minimizes the amount of grain needed during the dry cow period.

Phase 4

Proper feeding during this eight week period reduces disorders such as overfat cows, off feed, displaced abomasum, calving difficulty, and retained placenta. For most cows, average or good quality roughage supplemented with the proper amount and balance of minerals is an adequate diet. Cows that are in poor body condition may need additional grain ration to build body reserves. To prepare the dry cow for her next lactation, start feeding the milking ration two weeks before calving. Lead feeding allows the dry cow to adjust more easily to high levels of grain consumption at freshening. Do not exceed 1 percent of body weight before calving.

Turkey Conference speakers offer keys to industry growth

BY M. EILEEN GRAHAM

GETTYSBURG — Turkey burgers, turkey ham, bologna, hot dogs, sausage and salami are all products resulting from the further processing of whole turkeys and seem to be the key to growth in the turkey industry, according to speakers at the Penn State University Turkey Conference, here Wednesday.

"Each year we now produce 3.3 billion pounds of live turkeys," said Floyd A. Lasley, economic researcher for USDA. The increase in production (up from 2 billion pounds in 1966) is directly related to increased national consumption of turkeys during the non-seasonal first three quarters of the year, Lasley said.

Americans now consume almost a pound of turkey per month, Lasley said, noting that poultry consumption on a capital basis surpassed pork consumption last year.

Because the increased consumption has not occurred during the Thanksgiving-Christmas holiday season, it is clear that people can be persuaded to eat more turkey by further processing the meat, he said.

In addition, the real price of turkey has dropped. "Consumers recognize that they're getting a bargain and they have responded," he continued.

But turkey producers are decreasing in number. Ag census reports, last completed in 1978, show that less than 7,000 producers were selling 141 million turkeys and that two-thirds of those birds were grown on less than 700 farms Lasley noted. "A lot of your neighbors no longer produce turkeys."

He indicated that a relatively small number of turkey producers handle such a large volume that just a few producers can have an impact on the market and that 90 percent of turkey production-marketing is coordinated through contract or direct ownership.

Turkey processing plants are also becoming bigger and fewer according to the census information: 128 plants slaughter turkeys, 175 section the birds and 445 process them with the processing plants consuming 70 percent of the 1.1 billion pound increase in production since 1965.

Although Pennsylvania ranks 11th among the top 12 turkey-producing states, it literally "is the North Atlantic turkey industry, with 92 percent of the total slaughter in that region," Lasley said.

"In our state," he continued,

"further processing accounts for more than two-thirds of the volume slaughtered, while cut-up turkeys take one-sixth. During the period from March through June we further process a volume almost equivalent to our slaughter and even exceed slaughter in May by importing dressed turkeys from other states."

Lasley concluded with a summary of implications for the industry:

—The holiday season will continue to be the time of heaviest consumption;

—Further processed products will utilize even more turkey and processors will require a supply on a year-round basis, using fresh rather than frozen turkey;

—Year-round production may make heavy stocks more difficult to move;

—Problems will arise between the Traditional frozen bird system, the fresh market and the further processing systems;

—Different types of production and marketing contracts will also present problems; and

—A bumper turkey crop may prove disastrous if we are in the inelastic part of the demand curve.

Dr. Robert J. Eckrode, poultry veterinarian at the Pennsylvania University Diagnostic Center at New Bolton provided insight into what laboratory services can and cannot do for turkeymen.

Eckrode repeatedly stressed that the labs can't do much if they have no communication from turkeymen, noting that 85 percent of his work is with poultry because poultrymen use his services most of the time. "I'm never going to be a real turkey expert unless some of you challenge me."

There are four diagnostic centers in the state where necropsy or post-mortem animal examinations are done, with the closest area located in Summerdale. Each of the four is state-supported and charges \$10 per case, he said.

"If a diagnostic lab can do one thing for you, at least it can help you rule out some known disease," he said, concluding a list of tests which included microscopic evaluation of tissue, virology, antibiotic sensitivity tests, bacteriology and blood tests, and began with simple examination of the birds for lesions.

Eckrode stressed the importance of a preventative medicine program including efforts in sanitation (cleaning out, spraying down and gassing), and properly applied and tested vaccinations.

Regular necropsy examinations

Penn State Turkey Conference speakers, from left included: Paul Wipple, Pennfield Corp., Lancaster; Floyd Lasley, USDA; and Elmo Long, Sleepy Creek Farms, North Carolina. Bill Murray, assistant Adams County Extension agent, right, coordinated the conference.

should also be part of a preventative program, he said, "If you don't do it routinely when they're not sick, then how do you know what's normal?"

Farmers can learn to autopsy birds themselves with a small amount of training, he noted.

In addition, Lasley advised isolation: keeping strangers out of the poultry house, locking doors, changing boots and clothing, washing up and using foot baths. "Look at your investment and then ask yourself if it's worth it. You might have an organism there that's going to take all your profit this year."

Repeatedly, the veterinarian emphasized the importance of selecting the right bird for necropsy: "If you don't have the right bird, you've wasted your time."

Fresh dead birds are a necessity, he said. Cull birds are not useful because they aren't indicative of the problem. "If you have a lameness problem, we obviously want to look at lame birds," not birds that have been defective from the beginning, he exclaimed.

Elmo Long, representing Sleepy Creek Farms of the Goldsboro Milling Corporation in North Carolina, told participants about some of the techniques his company uses in its mammoth turkey production.

North Carolina is first in the leading turkey-producing states.

Elmo Long, Sleepy Creek Farms poultry expert for the Goldsboro Milling Corp. of North Carolina, shared insights in how that state's top turkey producers cooperate to accommodate the opportunities and problems associated with the rapid growth of the industry there.

with the industry centering itself in two distinct regions there and benefitting from a surplus of corn in the state's eastern region.

Grower awareness in those regions helped control and eradicate one serious disease and resulted in a state quarantine law which benefits the turkeymen, he noted.

Although there is some increase in dust, Elmo said, his company has switched from conventional ventilating fans to the use of variable speed circulating ceiling fans in their turkey houses. Spaced about 36 feet apart, the fans save energy and keep the birds warmer in winter and cooler in summer.

Concluding the program was Paul Wipple, representing the Pennfield Corporation in Lancaster. Wipple advised keeping a month-by-month cash flow chart and adequate written records as a necessity in obtaining insurance and loans. In addition, the farmer must also have adequate equity, he said.

Banks often require quarterly statements from an accountant before lending money, Wipple noted, adding that although it seems like a lot of work, people who keep records of their cash flow do a better job of managing their finances.

Adams County participants Glenn Kime, left, and Robert McMaster, and Stan Michonski, Commonwealth National Bank representative, note details concerning the production, processing and marketing of turkey. Kime, owner-operator of Sunny Slope Poultry Farms, chaired the program.

MORE FOR LESS.

The Storage System for the future. Here Now!

THE AG-BAG SYSTEM

MORE FEED. MORE STORAGE. MORE HIGH QUALITY TDN & PROTEIN.

Select from three models of AG-BAG Machines. Motorized, Hydraulic, and Gear-Driven. AG-BAG lets you match the machine to your job. Big or small. Whether you're DAIRY or BEEF AG-BAG will store More For Less. The AG-BAG System. Air-tight storage with more versatility than any other system. Just look at these AG-BAG ADVANTAGES:

1. UNLIMITED oxygen-limiting storage
2. Storage for ALL forages & grain

3. Transportable
4. Easy to use and little maintenance
5. NO dangerous silo gases
6. Silo fires WON'T occur
7. Higher moisture forage
8. NO unloader to break down
9. Extra income and potential from custom bagging
10. THE Forage System for the 80's

JUST LISTEN TO WHAT THESE AG-BAG BELIEVERS HAVE TO SAY:

Kenneth Popham of Floresville, Texas

Kenneth runs a 465 cow Dairy and said this about AG-BAG: "At today's interest rates you can't afford any other type of storage... Even with the yearly cost of bags it's still inexpensive storage... a whole lot cheaper than building barns and hiring help. I put up 13 bags last year and after seeing the results, I'll put up 25 bags this year. The bags are a good thing"

Don Carter of Parkdale, Oregon

"The best move I ever made"... says Don Carter in reference to his switch to bagging silage on his dairy near Parkdale, Oregon. "I get 18% more feed from the same acreage and the feed lasts three times as long. I used to clean my bunks after three days, now I only need to clean them after 10 days."

Roland Rasmussen of Blair, Nebraska

"In addition to everything else, it's a management tool"... says rancher, Roland Rasmussen of Blair, Nebraska.

Roland farms 350 acres west of Blair, Nebraska, and fattens about 650 cattle from 600 lbs. to finish.

"By labeling every bag as to date and kind of feed, I can mix my feeds and eliminate the guess work in making a ration. I feed alfalfa silage, corn silage and ground ear corn stored exclusively in the bags, purchasing only my minerals and vitamin supplements."

"The AG-BAG system has enabled me to increase carrying capacity per acre at a reduced cost of gain."

Bert Anderson of Sceptre, Saskatchewan

"At least 30% more feed... I can guarantee at least that"... says rancher, Bert Anderson, of Sceptre, Saskatchewan.

"I've been able to cut my grain feeding costs in half since converting to the bagging. It's just like feeding grass. I've also eliminated the need for a liquid supplement that we always fed before going to the AG-BAG System..."

HERE'S WHAT THE AG-BAG SYSTEM CAN DO FOR YOU

1 BAG	150 TONS
6 BAGS	900 TONS
12 BAGS	1,800 TONS
24 BAGS	3,600 TONS
48 BAGS	7,200 TONS
96 BAGS	14,400 TONS

Pennsylvania Dairy Herd Improvement Association

York County DHIA Monthly Report

January, 1983

A total of 1,032 lbs. BF and 28,259 lbs. milk was produced in 305 days by Ausee an 8-year-old Holstein owned by Beshore Farms, 389 Old York Rd., New Cumberland. Second high was Lucky a 7-year-old Holstein who produced 1,011 lbs. BF and 24,798 lbs. milk in 305 days, owned by Wayne E. Myers, 3870 S. Salem Church Rd., Dover.

High herd was Lynn Wolf, R1 Abbottstown with 57 Holstein cows producing 21,113 lbs. milk and 798 lbs. BF. Second high was Smyser's Richlawn Farms, 2691 E. Berlin Rd., York, with 68 Holstein cows producing 21,906 lbs. milk and 787 lbs. BF.

Get to know your GMS evaluator.

Talk about increasing production...
Talk about improving conformation...
Talk about keeping up with new genetics...
Talk about controlling semen costs...

Make each mating count.

The sooner you get to know your GMS evaluator and put your breeding goals to work with ABS' Genetic Mating Service (GMS) program, the faster you'll improve your herd's production, conformation and overall profitability.

Because today the ABS-GMS sires provide you a predicted difference advantage of over 600 pounds more milk than the average A.I. sire.

When you combine this production edge with the sound genetic principles and linear trait evaluation that GMS offers, you get a more effective breeding program and a higher return on your investment. After all, that's what counts in today's competitive market.

Share in the success thousands of U.S. dairy-men are enjoying from the largest and most successful mating service in A.I. Let GMS help you make every mating count.

Discover the genetic progress
GMS can bring your herd.

- ☐ Send me my copy of the ABS Genetic Mating Service brochure
☐ I'm interested in using GMS, have a GMS evaluator contact me.

LOMBARDINI

The Powerhouse

Diesel for Dairy, Shops
and Equipment

26 powerhouse models to choose from.
We have the right size, weight, shape,
price and engine available.

4 to 68 H.P.

Lombardini Diesel Uses 1/2 or Less
Fuel Than Gas Engines
Less Downtime Than Gas Engines

For years Lombardini has been
Europe's largest supplier of small,
air-cooled diesel engines. Now,
after several years in this country
Lombardini is the fastest growing
line of air-cooled diesels in North
America. Lombardini specializes
in small air-cooled diesels.

TAKE ADVANTAGE OF:

1. 12 month warranty or 2,000 hours
2. Low fuel consumption
3. Low maintenance.
4. Price per horsepower
5. Easy starting.
6. 100% back-up with parts and service.

Delaware prepares market pamphlet

NEWARK, De. — The Delaware Department of Agriculture is preparing its 1983 Delaware Roadside and Pick-Your-Own Markets pamphlet. In response to the growing popularity of this pamphlet, the 1983 edition has been expanded to include agricultural markets that sell fruits and vegetables; nursery and garden

stock; Christmas trees; shrubs; honey; flowers; and bedding plants directly to consumers.

This publication is a voluntary listing of markets. Any roadside or pick-your-own marketers that

have not been contacted by the Department and wish to be listed, please contact the Department by March 14, 1983 (800) 282-8685 or (302) 736-4811 in Kent County.

IMPROVE FEED PALATABILITY AND PROFITABILITY BY USING LIQUID AND DRY MOLASSES PRODUCTS IN YOUR FEED FORMULATION FOR ANIMALS FROM ZOOK MOLASSES CO.

Flies are a problem!

Fogging, larvicides and spreading chemicals around the barn can only offer you a temporary solution...

An automatic fly control system from COASTAL FLY CONTROL takes care of flies all season long, automatically. None of your valuable time is involved.

We also install and service your system!

Call us today before the spring rush!

Rebates Up To \$9,600 On New MF Combines

Act now! Buy a new MF combine — without MF financing — and you can earn a rebate of up to \$9,600, depending on the model you select. With MF financing, you can get up to \$5,300 back. Either option gives you cash to keep or apply to the combine purchase price.

Action Option Rebates!

Model	Without MF Financing	With MF Financing
MF 540	\$6,800	\$4,300
MF 550	7,200	4,300
MF 850	8,500	4,700
MF 860	9,600	5,300
MF 851 (pull-type)	4,100	2,500

Action Option Financing, Too!

If you select the Action Option Rebate with MF financing, you can take your choice of two great money-saving financing options:*

1. Waiver of Finance Charges

Grain Combines until June 1, 1983
Corn/bean/rice Combines until Sept. 1, 1983

OR

2. Low-rate Financing

Get special financing at annual percentage rates ranging from 9.4% to 14.9%, depending on the repayment period you select. See us for full details.

USED COMBINE SPECIAL!

Buy one of our selected used combines, and the Action Option financing described above is available on that machine, too. Plus, you'll receive a free MF Parts Certificate worth \$500 that's good through October 31, 1983!

Take action now...and save! See us for all the details.

Local Distributor for vac-u-vator®
Dealer inquiries invited in some areas.

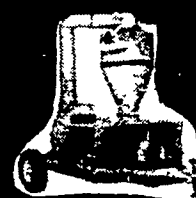

Compare the cost effectiveness
of a vac-u-vator® before
spending money to repair or
extend your present
auger or belt conveyor system

Pneumatic conveyors are used by all major seaports around the world to discharge and transfer shiploads of grain. The reason is pneumatic conveyors have proven to be most cost effective way to move grain. Most grain farmers and grain transfer storage companies think of Vac-U-Vators as being a versatile, practical supplement to their existing mechanical conveying systems—and they are. However, Vac-U-Vators are also a highly cost effective alternative to mechanical conveyor systems. So, instead of investing money to repair, replace or extend your present bucket, belt or auger system, we suggest you consider starting to switch over to a modern, efficient Vac-U-Vator pneumatic conveying system.

Efficient
dependable
operation
1. Vacuum pulls grain into the system
2. Gravity separation in the cyclone allows grain to pass through the 3 airlock and into the 4 pressurized airstream which pushes it to its destination

VAC-U-VATOR

JOE POPP ESTATE

PUBLIC AUCTION

**FARM REAL ESTATE, FARM MACHINERY
ANTIQUES AND HOUSEHOLD GOODS
SATURDAY, MARCH 19, 1983**

9:00 A.M.

To be held on the premises located at RD1 Palmyra, N. Londonderry Twp., Lebanon County, Penna. Take Railroad St. North off Rt. 422 at the square in Palmyra past the Gravel Hill Church and turn right onto Eisenhower Rd. and then right onto Edison Road to first farm on left.

Real Estate being a farm of 57 acres more or less to be offered in 2 tracts and as a unit. Tract 1 contains appx. 40 acres of farmland, pasture and woodland with a spring fed stream flowing through pasture and road frontage on both Eisenhower and Edison Roads. Improvements include large frame bank barn, silo, 2 machinery storage sheds, combination corn shed and machinery storage building and a small hog pen. Large 12 room house with 1st floor containing 6 rooms and 2nd floor containing 6 bedrooms with 1/2 bath. Home heated by oil hot water baseboard heat with a 1000 gal. underground storage tank. New elect. service and drilled well. Semi detached 1 1/2 story summer house. Tract 2 is appx. 17 acres adjoining tract 1 with 5 acres of woodland and the balance in farmland.

Inspection by calling Robert Popp at 838-4321 or Betty Batz at 865-6836. Real Estate to be offered at 1:00. Terms to be 10% down with the balance in 30 days. This is a good productive farm with lots of road frontage and plenty of buildings and certainly merits your inspection.

There is a 1½ acre farm pond with covered foot bridge stocked with trout and perch. The stone farm house built in 1947 has a large farm family size modern eating kitchen, 6 large bedrooms, 1½ baths, formal dining room, large living room with a stone fireplace. The home has hardwood floors a full enclosed porch, and is heated by a Lousch coal stoker boiler and full basement.

The property is ideally located in the Menonite Community of Adams Co. and is a great producing farm.

AUCTIONEER'S NOTE. This farm is being offered for Public Auction with reserve and also subject to prior sale.

TERMS: 10% down day of sale. Possession of land on or before April 1, 1983. Possession of house and barn on or before May 1, 1983. Balance of purchase price due and payable at time of settlement and possession of buildings.

A new way to market more profitable eggs.

We'd like to show you how you can sell more profitable eggs.

Simply use your current market conditions to determine your most profitable egg size. Then, with our Accu-Lay™ feed rations, you'll be able to increase or decrease egg size.

Accu-Lay rations are accurately formulated with the energy and necessary nutrients (amino acids, vitamins and minerals) to get and keep maximum production levels, while regulating egg size to meet your market needs.

Purina researchers have also accurately formulated pullet rations to help you get—and keep—your pullets at the target weight recommended by breeders.

If you'd like more information on this new way to market more profitable eggs, attend Accu-Line™ Programs For Profit.
